

CARE Ratings Debt Quality Index (CDQI) – September’18

CARE Ratings Debt Quality Index (CDQI) denotes the quality of debt that can be interpreted over time and juxtaposed with other developments in the financial sector. The CDQI captures, on a scale of 100 (index value for the base year FY12), whether the quality of debt is improving or declining. Intuitively an upward movement indicates improvement in quality of debt benchmarked against the base year. As it is contemporary with minimum time lags, the health of the debt and credit markets is encapsulated on a near-real-time basis.

The dataset comprises of 1,597 companies from CARE’s portfolio of 2,980 companies as of March 2012. The dataset is revisited at regular intervals and is replaced suitably with a new set of companies with a similar rating and an approximate volume of outstanding debt rated in case if an entity ceases to have a rating coverage. Currently, the volume of debt of the sample companies stands at Rs.34.38 lakh crore in September 2018.

Movement in index:

CDQI has been showing an improving trend in the nine months ended August 2018. In September 2018, it fell marginally.
