

ABS & MBS Pool Performance Update

CARE has rated more than 493 Asset Backed Securitisation (ABS) / Mortgage Backed Securitisation (MBS) pools across 79 Originators and pools aggregating to around Rs. 91,000 crore covering various asset classes, which include - Auto Loans, Commercial Vehicle loans, Construction Equipment loans, Two-Wheeler loans, Personal Loans, Microfinance loans, Gold Loans, Multi Originator Loans, Consumer Durable Loans and Mortgage Loans.

This report analyses the performance of all rated transactions live as on recent date. It covers the characteristics of pools at the time of origination and their key performance indicators. Key performance indicators include 90+ DPD levels, 180+ DPD levels, Cumulative Collection Efficiency Ratio, Prepayments etc. CARE also calculates the Break-even Collection Efficiency ratio to determine the minimum collection efficiency required on pools future cash flow to be able to serve the payouts on time. It also covers the Credit Enhancement Utilization and Coverage at 90+ DPD levels & 180+ DPD levels. Detailed performance report and interpretation of each term are briefed in the later sections.

Moratorium Update:

Pursuant to RBI notification dated March 27, 2020 permitting all lending institutions to allow a three month moratorium on payment of instalments of term loans falling due between March 1, 2020 and May 31, 2020, which was further extended till August-20 vide press release dated May 22, 2020, the originators had sought moratorium on the corresponding payouts due. The investors had largely agreed to grant moratorium for the PTC Payout with the exception of 1 transaction (duly disclosed with comments below the performance table). CARE had received confirmation email/s from originators/trustees/investors. In cases where moratorium was not received from investor/s prior to the payout dates, the payments were duly made to the investor/s without any disruption.

The originators have shared reports after giving due effect to the moratorium extended to the underlying contracts where availed. CARE has based its ratings/outlooks on information obtained from the originators / trustees that it believes to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information.

Largely the pools so far continue to be comfortably placed in terms of low/nil utilization of credit enhancements. Break-even Collection Efficiency and Enhancement coverage for all the rated pools shows that they are comfortably placed.

Post Moratorium i.e. after Sep-20 payout, almost all the pools have been impacted in terms of low/moderate collection efficiency (compared to pre moratorium period) and moderate increase in Overdue (as % of initial POS). The reason for this rise in OD and low collection efficiency could be attributed to the moratorium momentum as Sep'20 was first month of regular collections after the moratorium was lifted. Expectedly, the 0+DPD bucket went up the next month i-e Oct'20 for all the pools.

After Jun'21 payout, the below-mentioned pools are largely placed comfortably with high/moderate collection efficiencies. The second wave of the COVID-19 pandemic has had an effect on the performance of these transactions. However, the support available in the form of credit enhancement and EIS is commensurate with the outstanding ratings of these transactions.
