

CARE's Policy on Default Recognition

[In supersession of CARE's Policy on Default Recognition issued in [February 2020](#)]

1. Background

CARE's ratings are an opinion on the relative ability and willingness of an issuer to repay debt (including interest and other obligations) in a timely manner. CARE follows a concept of 'one-day-one rupee' delay for default recognition in respect of all debt instruments and CARE has made this stance public through its various communications in the past.

CARE's default recognition policy is updated in line with the SEBI guidelines issued from time to time¹, wherein, in respect of ratings for instruments/bank facilities with a pre-determined repayment schedule, 'one-day-one-rupee' delay is considered as default, whereas for facilities with no pre-determined repayment schedule, a 30 day 'grace period' is considered prior to categorising as default. This apart, SEBI has stipulated criteria for default recognition in case the rated instrument is rescheduled as also specific 'curing' period when a rating may be revised upwards from 'Default grade' (CARE D). These changes have been carried out in CARE's policy on default recognition.

This document explains in detail the instrument-wise definition of default followed by CARE, and the criteria for treatment of defaults while assigning initial ratings and reviewing outstanding ratings.

CARE's Policy on Default Recognition

2. Instrument-wise definition of default followed by CARE

| Facilities * | Rating Scale | Definition of Default |
|--|-----------------------|--|
| Fund-based facilities & Facilities with pre-defined repayment schedule # | | |
| Term Loan | Long Term | A delay of 1 day even of 1 rupee (of principal or interest) from the scheduled repayment date. |
| Working Capital Term Loan | | |
| Working Capital Demand Loan (WCDL) | | |
| Debentures/Bonds | | |
| Certificate of Deposits (CD)/ Fixed Deposits (FD) | Short Term/ Long term | |
| Commercial Paper | Short term | |
| Packing Credit (pre-shipment credit) | Short Term | Overdue/unpaid for more than 30 days. |
| Buyer's Credit | Short Term | Continuously overdrawn for more than 30 days. |
| Bill Purchase/ Bill discounting/ Foreign bill discounting / Negotiation (BP/BD/FBP/FBDN) | Short Term | Overdue/unpaid for more than 30 days. |
| Fund-based facilities & No Pre Defined Repayment Schedule | | |
| Cash Credit | Long Term | Continuously overdrawn for more than 30 days. |
| Overdraft | Short Term | Continuously overdrawn for more than 30 days. |
| Non fund-based facilities | | |
| Letter of credit (LC) | Short Term | Overdue for more than 30 days from the day of devolvement. |
| Bank Guarantee (BG) (Performance/ Financial) | Short Term | Amount remaining unpaid for more than 30 days from invocation of the facility. |
| Other Scenarios | | |
| When rated instrument is rescheduled: | | Non-servicing of the debt (principal or interest or both) as per the existing repayment terms in anticipation of a favourable response from the banks of accepting their restructuring application/ proposal shall be considered as a default. Rescheduling of the debt instrument by the lenders prior to the due date of payment will not be treated as default, unless the same is done to avoid default or bankruptcy. |
| When instrument backed by a guarantee is in default | | CARE rates instruments backed by the guarantor on the strength of the guarantor in case the entire debt is backed by a guarantee. The recognition of a default on such instrument is based on the guarantor becoming aware of his obligation to pay on invocation and his ability to make the payment within the stipulated time once the guarantee is invoked. Hence, post invocation of the guarantee by the trustee / banker/ investor, failure by the guarantor in servicing the debt obligation (principal or interest or both) of issuer within the stipulated time shall be construed as default. |
| Curing Period@ | A | 90 Days – for revision from Default to Speculative Grade |
| | B | Generally 365 Days for revision from Default to Investment Grade |

*For bank loan ratings, default recognition will need to be in line with the RBI guidance

If the sanctioned terms allow grace period for payment after due date, CARE considers the due date taking into account the grace period

@ CARE may deviate from the stipulated curing period as elaborated in CARE's policy on curing period available at www.careratings.com.

3. Treatment of default in Initial Ratings

In case of **initial ratings**, a rating of 'CARE D' is assigned in case of ongoing delays in debt repayment of the rated instrument. In case of instances of past delays in repayment of any debt instrument, the following four dimensions of delay are analysed: a) the extent of delay (number of days of delay), b) frequency of delay (number of times the delay occurred in the past one year), c) severity of delay (amount not paid vis-à-vis amount due) and d) status of an ongoing delay (facility in default). A non-default rating would not be assigned if the curing period post an earlier default on any instrument of similar seniority has not lapsed. For subordinate instruments and structured instruments, curing period will apply on instrument level.

Rating Action

- In case of (d) above, a rating of 'CARE D' is assigned if the delay is in respect of the rated instrument.
- In other cases, the rating would take into account the extent, frequency and severity of the delay as also how recent the delay has occurred. A default free track record of 90 days is required to assign ratings in the speculative grade other than CARE D [i.e. from CARE BB+ to CARE C- (long term rating) and CARE A4+ or CARE A4 (short term rating)], and generally a default free track record of 365 days is required to assign an investment grade rating. CARE may deviate from the stipulated curing period as elaborated in CARE's policy on curing period available at www.careratings.com.

4. Treatment of default in review of outstanding ratings

Whenever CARE becomes aware of any missed payment on a rated instrument, the rating of that instrument is brought down to 'CARE D'. The rating of all other instruments rated by CARE which have the same seniority as the instrument which has defaulted, would move to near default grade as the circumstances which caused a delay in debt servicing on one instrument may also affect the debt servicing of other instruments. However, CARE Ratings may in certain situations not move the ratings on all other instruments to near-default grade if strong instrument -specific mitigating factors exist to conclude that instances of delinquencies/defaults on other instruments are unlikely to lead to default on the rated instrument. After curing of the delay, the default grade rating can be moved within the sub-investment category based on

extent, frequency, severity and the date of occurrence of delay. A default free track record of 90 days is required to move an instrument/facility's rating from CARE D to other ratings in the speculative grade and generally a default free track record of 365 days is required to move an instrument/facility's rating from CARE D to investment grade. CARE may deviate from the stipulated curing period as elaborated in CARE's policy on curing period available at www.careratings.com.

5. Default on instruments not rated by CARE Ratings

In case an issuer with an outstanding CARE rating defaults on any instrument (other than the rated one), which has same seniority as the instrument rated by CARE, the rating of the instrument rated by CARE (which is not in default) will move to near default grade. This is because the factors which caused the delinquency/default on other instruments may also affect debt servicing on the rated instrument. However, CARE Ratings in certain situations may not move the ratings on all other instruments to CARE D/near default grade, if strong instrument-specific risk mitigating factors exist to conclude/believe that instances of delinquencies/defaults on other instruments are unlikely to lead to default on the rated instrument.

6. Treatment of default in case of hybrid instrument ratings

The terms of the hybrid instruments may allow deferment of principal and / or interest payment in case of invocations of certain pre agreed clauses. Any delay in payment of interest/principal (as the case may be) following the invocation of the lock-in clause, is considered an event of default as per CARE's definition of default and as such, these instruments may exhibit a somewhat sharper migration of the rating compared with conventional subordinated debt instruments.

7. Treatment of default in case of technical delay / dispute

CARE examines the reasons for default from the rated entity, duly corroborated by the investor / lender. If as per CARE's assessment, the delay was not caused by liquidity stress at the issuer level but due to some technical problem, then default is not recognised. However, based on the assessment, severity and frequency of such incidences, the credit rating of the issuer may be reviewed.

'Technical problem' referred above is a procedural issue which may result in delay in payment

CARE's Policy on Default Recognition

and not a credit issue related to the ability of the entity to meet the debt obligations. Technical problem would typically be with respect to transfer of funds or mechanism of transfer of funds and not related to availability of funds and willingness of the issuer to meet obligations on time.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
