

[Issued in September 2021]

Background

CARE Ratings' ratings are an opinion on the relative ability and willingness of an issuer to repay debt (including interest and other obligations) in a timely manner.

CARE Ratings' default recognition policy is updated in line with the SEBI guidelines issued from time to time¹, wherein, in respect of ratings for instruments/bank facilities with a pre-determined repayment schedule, 'one-day-one-rupee' delay is considered as default, whereas for facilities with no pre-determined repayment schedule, a 30 day 'grace period' is considered prior to categorising as default. This apart, there are specific guidelines on default recognition in case the rated instrument is rescheduled and 'curing' period post which a rating may be revised upwards from 'Default grade' (CARE D). Changes concerning these have been carried out in CARE Ratings' policy on default recognition.

This document explains in detail the definition of default followed by CARE Ratings and the criteria for treatment of defaults while assigning initial ratings and reviewing outstanding ratings.

1. Instrument-wise/Facility-wise definition of Default

Facilities *	Rating Scale	Definition of Default
Fund-based facilities & Facilities with pre-defined repayment schedule #		
Term Loan	Long Term	A delay of 1 day even of 1 rupee (of principal or interest) from the scheduled repayment date
Working-capital Term Loan		
Working-capital Demand Loan		
Debentures/Bonds		
Certificate of Deposits/ Fixed Deposits	Short Term/ Long Term	
Commercial Paper	Short Term	
Packing Credit (pre-shipment credit)	Short Term	
Buyer's Credit	Short Term	
Bill Purchase/ Bill discounting/ Foreign bill discounting / Negotiation (BP/BD/FBP/FBDN)	Short Term	
Fund-based facilities & No Pre-defined Repayment Schedule		
Cash Credit	Long Term	Continuously overdrawn for more than 30 days
Overdraft	Short Term	Continuously overdrawn for more than 30 days
Non-fund-based Facilities		

¹ SEBI Circular no. SEBI/ HO/ MIRSD/ CRADT/ CIR/ P/ 2020/ 87 dated May 21, 2020 incorporated

Letter of Credit	Short Term	Overdue for more than 30 days from the day of devolvement.
Bank Guarantee (Performance/ Financial)	Short Term	The amount remaining unpaid for more than 30 days from the invocation of the facility.
Other Scenarios		
When the rated instrument is rescheduled:		<p>Non-servicing of the debt (principal or interest or both) as per the existing repayment terms in anticipation of a favourable response from the banks of accepting their restructuring application/ proposal shall be considered a default.</p> <p>Rescheduling of the debt instrument by the lenders before the due date of payment will not be treated as default unless the same is done to avoid default or bankruptcy.</p>
When an instrument backed by a guarantee is in default		<p>The recognition of default is generally based on the structured payment mechanism mentioned in the guarantee document. In case the payment mechanism is not adhered to and there is a missed payment, default is recognised on the said facility/ instrument.</p> <p>It has been observed that in the case of guarantees given for bank facilities, there is generally no structured payment mechanism. In such cases, notwithstanding whether the guarantee is invoked or otherwise if there is a missed payment CARE Ratings would recognise default on the said facility/instrument.</p>
Curing Period@		90 Days – for revision from Default to Speculative Grade.
		Generally 365 Days for revision from Default to Investment Grade.

*For bank loan ratings, default recognition will need to be in line with the RBI guidance

If the sanctioned terms allow a grace period for payment after the due date, CARE Ratings considers the due date taking into account the grace period

@ CARE Ratings may deviate from the stipulated curing period as elaborated in CARE Ratings' policy on the curing period available at www.careedge.in.

2. Treatment of default in Initial Ratings

In the case of initial ratings, a rating of 'CARE D' is assigned in case of ongoing delays in debt repayment of the rated instrument. In case of instances of past delays in repayment of any debt instrument, the following four dimensions of delay are analysed: a) the extent of delay (number of days of delay), b) frequency of delay (number of times the delay occurred in the past one year), c) severity of delay (amount not paid vis-à-vis amount due) and d) status of an ongoing delay (a facility in default). A non-default rating would not be assigned if the curing period post an earlier default on any instrument of similar seniority has not lapsed. For subordinate instruments and structured instruments, the curing period will apply on the instrument level.

Rating Action

- In the case of (d) above, a rating of 'CARE D' is assigned if the delay is in respect of the rated instrument.
- In other cases, the rating would take into account the extent, frequency and severity of the delay as also how recent the delay has occurred. A default-free track record of 90 days is required to assign ratings in the speculative-grade other than CARE D [i.e. from CARE BB+ to CARE C- (long term rating) and CARE A4+ or CARE A4 (short term rating)], and generally a default-free track record of 365 days is required to assign an investment-grade rating. CARE Ratings may deviate from the stipulated curing period as elaborated in CARE Ratings' policy on the curing period available at www.careedge.in.

3. Treatment of Default in Review of Outstanding Ratings

Whenever CARE Ratings becomes aware of any missed payment on a rated instrument, the rating of that instrument is brought down to 'CARE D'. The rating of all other instruments rated by CARE Ratings, which have the same seniority as the instrument which has defaulted would move to near default grade as the circumstances which caused a delay in debt servicing on one instrument may also affect the debt servicing of other instruments. However, CARE Ratings may in certain situations not move the ratings on all other instruments to near-default grade if strong instrument-specific mitigating factors exist to conclude that instances of delinquencies/defaults on other instruments are unlikely to lead to a default on the rated instrument. After curing the delay, the default grade rating can be moved within the sub-investment category based on the extent, frequency, severity and the date of occurrence of the delay. A default-free track record of 90 days is required to move an instrument/facility's rating from CARE D to other ratings in the speculative grade and generally, a default-free track record of 365 days is required to move an instrument/facility's rating from CARE D to investment grade. CARE Ratings may deviate from the stipulated curing period as elaborated in the policy on the curing period available at www.careedge.in.

4. Default on Instruments Not Rated by CARE Ratings

In case an issuer with an outstanding CARE Ratings' rating defaults on any instrument (other than the rated one), which has the same seniority as the instrument-rated by CARE Ratings, the rating of the instrument-rated by CARE Ratings (which is not in default) will move to near default grade. This is because the factors which caused the delinquency/default on other instruments may also affect debt servicing on the rated instrument. However, CARE Ratings in certain situations may not move the ratings on all other instruments to CARE D/near default grade, if strong instrument-specific risk-mitigating factors exist to conclude/believe that instances of delinquencies/defaults on other instruments are unlikely to lead to a default on the rated instrument.

5. Treatment of Default in Case of Hybrid Instrument Ratings

The terms of the hybrid instruments may allow deferment of principal and/or interest payment in case of invocations of certain pre-agreed clauses. Any delay in payment of interest/principal (as the case may be) following the invocation of the lock-in clause, is considered an event of default as per CARE Ratings' definition of default and as such, these instruments may exhibit a somewhat sharper migration of the rating compared with conventional subordinated debt instruments.

6. Treatment of Default in Case of Technical Delay/Dispute

CARE Ratings examines the reasons for default from the rated entity, duly corroborated by the investor/lender. If as per CARE Ratings' assessment, the delay was not caused by liquidity stress at the issuer level but due to some technical problem, then the default is not recognised. However, based on the assessment, severity and frequency of such incidences, the credit rating of the issuer may be reviewed.

'Technical problem' referred to above is a procedural issue which may result in a delay in payment and not a credit issue related to the ability of the entity to meet the debt obligations. The technical problem would typically be concerning the transfer of funds or mechanism of transfer of funds by the issuer/obligor and not related to the availability of funds and willingness of the issuer/obligor to meet obligations on time.

About:

CareEdge (earlier known as CARE Group) is a knowledge-based analytical group that aims to provide superior insights based on technology, data analytics capability and detailed research methods. CareEdge Ratings is one of the leading credit rating agencies in India. It has an impressive track record of rating companies for almost three decades and has played a pivotal role in developing the corporate debt market in India. CareEdge provides near real time research on all domestic and global economic developments. The wholly owned subsidiaries include CareEdge Advisory & Research arm focused on providing advisory and consultancy services and CareEdge Risk solutions a platform that provides risk management solutions

Disclaimer:

The ratings issued by CARE Ratings Limited are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings Limited has based its ratings/outlooks based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings Limited have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings Ltd. or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE Ratings Limited is, inter-alia, based on the capital deployed by the partners/proprietor and the current financial strength of the firm. The rating/outlook may undergo a change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE Ratings Limited is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE Ratings.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
