Rating

Facilities/Instruments	Amount (Rs. crore)	Ratings	Rating Action
Long Term Bank Facilities	12.80	CARE BB-; Stable (Double B Minus; Outlook: Stable)	Reaffirmed
Total Bank Facilities	12.80 (Rs. Twelve Crore and Eighty Lakhs Only)		

Details of facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The reaffirmation in the ratings assigned to the bank facilities of Mohammed Khan Jewellers Private Limited (MKJPL) is constrained by declining trend of scale of operations during FY19-FY21 (refers to the period April 01 to March 31), working capital intensive nature of business, geographical concentration risk and company's presence in a highly competitive industry. The ratings also take cognizance of COVID-19 impact of the business operations of the company. The rating, however, derives comfort from experience promoters, established brand image, improvement in profitability margins in FY21 and comfortable financial risk profile.

Key rating Sensitivities:

Positive Factors- Factors that could lead to positive rating action/upgrade

- ✓ Increasing the scale of operations with TOI improving to Rs 50 crore and above while maintaining PBILDT margin above 12% on a sustained basis.
- ✓ Improvement in liquidity position with average working capital utilisation levels falling below 80% and operating cycle improving to less than 200 days on a sustained basis.

Negative Factors- Factors that could lead to negative rating action/downgrade:

- ✗ Significant decline in the TOI and PBILDT by more than 30% y-o-y
- ✗ Deterioration of capital structure represented by overall gearing ratio weakening beyond 1.5x, in future.

Detailed description of the key rating drivers

Key Rating Weaknesses

Declining and small scale of operation

The Total operating income (TOI) of the company has been on a declining trend since FY19-FY21. The TOI declined by 33.44% y-o-y during FY20 and further by 18.71% y-o-y during FY21. The fall in TOI during FY19 and FY20 was primarily because of increase in gold prices and heavy competition. Subsequently, with outbreak of COVID-19 pandemic, the company witnessed significant impact on the demand of gold jewellery with resulted in subdued revenue in FY21 as well. Furthermore, the retail outlets of the company were completely shut during the lockdown period which further impacted the sales.

Elongated inventory holding and extensive reliance of working capital borrowing

The working capital cycle of the MKJPL continues to remain elongated for FY21 and stood at 474 days. Gems and Jewellery retail industry is characterized by heavy competition and in order to survive and meet the demand quickly, MKJPL maintain high level and variety of inventory for window display and sales to the customers at all of its showrooms. The elongated operating cycle and high inventory level affects the liquidity and results in higher utilisation of bank credit. Hence, MKJPL's dependence on working capital limits continued to remain high at 80.79% average utilisation of working capital limits for the last 12 months ended May 2021.

Geographical concentration risk

The company's operations continue to be concentrated to three showrooms in the Hyderabad area which increase its susceptibility to geographical concentration risk. Majority (99%) of the revenue comes from Nampally location. Its revenue remains vulnerable to any adverse circumstances and sentiments prevalent in the city such as any political unrest, strikes, or other economic/ environmental factors that vary from region to region and may prove to be detrimental to the operations of an organisation.

Highly competitive, regulated and fragmented nature of Gems and Jewellery industry

The G&J industry in India is a largely fragmented, unorganized and export driven industry, with intense competition among players that operate on thin profitability, seasonal demand and working capital intensive operations. Also, this industry is highly regulated by various restrictions and duties imposed by the Government in order to control the current account deficit arising

mismatch in exports and import of gemstones, gold and cut/un-cut diamonds. The government has reduced import duty for Gold & Silver (from 12.5% to 7.5%) to bring down the prices of precious metals in the local market also government made hallmarking mandatory for gold jewellery and artefacts from June 2021.

Key Rating Strengths

Experienced promoters and established track record

MKJPL is a closely held company, managed by family members of the promoters, who belong to Mohammed Khan & Sons Group. The company operates under its family brand 'Mohammed Khan and Sons' which is a well-established jewellery house in the state of Telangana for over two decades. Dr. Niyamathulla Khan (Chairman and Managing Director), Mr. Mokhtyar Ahmed (Director) has experience of over two decades in the jewellery business.

Comfortable financial risk profile

The capital structure of the company marked by the overall gearing ratio remained comfortable at 0.89x as on March 31, 2021 backed by steady TNW and accretion of profits. The debt levels increased to Rs. 15.45 crore as on March 31, 2021 as company availed total covid loans of Rs. 3.84 cr. during the year. The interest coverage ratio and TDGCA improved to 2.70x (FY20: 1.25x) and 8.95x (FY20: 33.27x) in FY21 respectively because of lower interest cost as the requirement of working capital limits were low owing to lockdown and reduced operational requirements.

Improvement in profitability margins in FY21.

The PBILDT margin of the company improved to 12.26% in FY21 (FY20: 7.30%) primarily backed by company's increased focus on sale of gold and studded jewellery which carry better margins as compared to plain jewellery (margin of 3.00-3.50%) along with decreased wholesale gold prices during FY21. Also, company took measures to reduce employee cost and selling expenses during FY21 which resulted in better operating profit. Further, PAT margin improved by 484 bps from 0.50% in FY20 to 5.34% in FY21 owing to lower interest cost on account of reduction in working capital utilisation.

Liquidity Analysis – Stretched

The liquidity position of the company is stretched marked by highly utilised working capital bank limits and modest cash balance. Cash accruals are low and tightly matched with the projected debt repayment obligations. However, the company has sufficient gearing headroom with below unity overall gearing ratio and liquidity is supported by an above unity current ratio of 1.87x as on March 31, 2021.

Analytical approach: Standalone

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
