<b>Total Bank Facilities</b>	<b>191.81</b> <b>(₹ One Hundred Ninety-One Crore and Eighty-One Lakhs Only)</b>		

Details of instruments/facilities in Annexure-1.

#### Detailed rationale and key rating drivers

The revision in the rating assigned to the bank facilities of Delhi Duty Free Services Private Limited (DDFS) factors in improvement in operational and financial performance of the company during FY22 (refers to the period from April 01 to March 31) and Q1FY23 (Unaudited; Q1 refers to the period from April 01 to June 30) characterised by healthy improvement in total operating income and profitability. The improvement was largely on account of healthy year-on-year and month-on-month improvement in international passenger traffic. During March 2022, the international travel has been opened by Government of India (GOI) as COVID-19 pandemic recedes leading to improvement in revenue and profitability of the company. The ratings continue to derive strength from its monopolistic position as the exclusive operator of the large duty-free space at Indira Gandhi International Airport (IGIA) and the long-standing experience of its international promoter in duty free retailing. The ratings also continue to take comfort from the company's healthy capital structure and strong liquidity position. The ratings, however, continue to remain constrained by minimum monthly guarantee (MMG) obligation towards concessioning authority and the concentration risks, both in terms of the high proportion of revenue derived from liquor and tobacco and its entire revenue being derived from IGIA. The ratings are further constrained by the competitive nature of industry with strong linkage of the company's business volumes with the prospects of the travel and tourism industry.

#### Rating sensitivities

##### Positive factors – Factors that could lead to positive rating action/upgrade:

- Timely revival in passenger footfall at the stores of the company to pre-covid levels resulting in sustained improvement in the total operating income to above Rs.1300 crore and sustained EBITDA Margin of more than 15%

##### Negative factors – Factors that could lead to negative rating action/downgrade:

- Slower than envisaged ramp-up in international passenger traffic numbers
- Depletion in liquidity buffers of the company on account higher than envisaged cash outflow in the form of dividend and/or loans and advances resulting in stretched liquidity position of the company
- Any higher than envisaged debt funded capital expenditure resulting in deterioration of overall capital structure

#### Outlook: Positive

The revision in outlook to 'Positive' takes into account CARE's expectation of further improvement in the international passenger traffic at DIAL on month-on-month basis which is expected to reach to pre pandemic levels by the end of FY23 which shall result in further improvement in overall financial risk profile of the company going forward. The outlook may be revised to 'Stable' in case of lower than expected recovery in international passenger traffic.

#### Detailed description of the key rating drivers

##### Key rating strengths

**Improvement in income and profitability of the company during FY22 and Q1FY23 owing to recovery in international passenger traffic**

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

The financial performance of the company improved during FY22 with a growth of ~137% in total operating income over FY21. TOI reported during FY22 stands at Rs.645.95 crore as against Rs.272.23 crore during FY21. Similarly, EBITDA and PAT also improved significantly during FY22 and stands at Rs.101.50 crore & Rs.188.34 crore respectively as against negative EBITDA of Rs.21.65 crore and net loss of Rs.30.13 crore during FY21. The company has received GST refund of Rs.180.43 crore during FY22 which has boosted the liquidity of the company. Since sales and purchase made by the company is free of GST. However, company has to pay GST on various expenditures done during the ordinary course of business like rent of the premises, concession fees or MMG etc.

#### **Improvement in capital structure and debt coverage indicators**

The company's capital structure continues to remain comfortable with low outstanding term debt of Rs.9.01 crore and very low utilization level of working capital borrowing as on March 31, 2022. The overall gearing improved to 0.21x as on Mar 31, 2022, as against 0.49x as on March 31, 2021. The company does not have any debt funded capex plans in the near term. Interest coverage stood at 9.35x and Total Debt/GCA stood at 0.36x in FY22. Going forward, any deterioration in the capital structure of the company marked by increase in overall gearing shall be a key monitorable.

#### **Location advantage and exclusivity agreement**

The fortunes of a duty-free operator are directly related to the international passenger traffic at the airport in which it is operating. DDFS is the sole operator of duty-free shops located at the Terminal T3 of IGIA in Delhi. DDFS benefits from the fact that IGIA is the busiest airport in India, and among the busiest airports in the world. As per the concession agreement, there is exclusivity provided to DDFS for the sale of items falling under the category of liquor and tobacco (the two items contributed about 68% of the total sales in the last three years). As the two categories elicit high rates of duty in India, DDFS has a natural advantage and is a preferred destination for purchase by arrival passengers.

#### **Long standing experience of one of the promoters**

DDFS is jointly promoted by Delhi International Airport Limited (DIAL), AerRianta International (ARI) through Yalorvin Limited and GMR Airports Limited (GAL). The management team has rich experience in handling the duty-free business in the global and domestic markets. ARI is a wholly owned subsidiary of the Dublin Airport Authority, Ireland. It manages airports' retail business at a number of airports in Middle East, Cyprus, India, Canada, Eastern Europe, Russia, Ukraine, the Caribbean and China.

#### **Key rating weaknesses**

##### **High cost by way of minimum monthly guaranteed obligation towards license fee**

As per the licence agreement, DDFS is required to pay to DIAL a monthly licence fee; marketing fee of 1% of the sales and Rs. 921/sqmt towards airport services charges. There is a provision of minimum monthly guarantee (MMG) in the agreement, which ensures fixed payment to DIAL in case revenue share payable is less than MMG. The MMG is calculated @ US\$ 2.18 per projected passenger and the same is paid in advance to DIAL on 7<sup>th</sup> of every month. However, until now, the risk has been partially mitigated by consistent growth in spend per passenger levels owing to which the license fee has been paid in line with the applicable revenue share, and thus effectively a variable charge. Further, since the onset of the pandemic and subsequent fall in international passenger traffic, DIAL had waived off MMG payment until June 2022. But from July 2022 onwards, Company is paying higher of MMG or applicable revenue share.

##### **Geographical concentration risk with entire revenue being derived from Delhi International Airport**

DDFS derives its entire revenue from IGIA reflecting geographical concentration risk. The revenues are directly linked to air passenger traffic which may be impacted from upcoming airports in the region. Besides, the licence term for a major area is 15 years which would expire in July 2025. The revenues are directly linked to air passenger traffic which may be impacted from upcoming airports in the region.

##### **Exposure towards group company**

Company has made an inter corporate deposit of Rs.67 crore with one of its group companies i.e., GMR Airport Developers Limited at an interest rate of 8% p.a. As per agreement, GMR Airport Developers Limited shall repay the loan within 2 years from the date of agreement i.e. (January 22, 2022) or at demand. Further developments in this regard, pertaining to the timely receipts of the funds and going forward any higher than envisaged exposure towards group companies shall remain a key rating monitorable.

##### **Liquidity: Strong**

The liquidity profile of the company is strong with free cash and bank balance of Rs.58.70 crore as of July 31, 2022. Going forward, company has low term debt obligation as against expected healthy GCA. Further, the company has Rs.100 crore of

sanctioned fund-based limits which had average utilization at ~14.00% during the last 12 months ended May 2022. The current ratio for the company stood at 1.52x as on March 31, 2022. Further, the comfortable capital structure provides sufficient headroom for the company to borrow in case of any exigency.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
