<b>Total Bank Facilities</b>	<b>77.20</b> <b>(₹ Seventy-Seven Crore and Twenty Lakhs Only)</b>		

Details of instruments/facilities in Annexure-1.

### Detailed rationale and key rating drivers

The ratings assigned to the bank facilities of Gujarat Credo Alumina Chemicals Limited (GCACL) continues to derive strength from experienced promoters, location advantage, reputed clientele with healthy orderbook and availability of bauxite through its group company which has long-term raw bauxite supply agreement with Gujarat Mineral Development Corporation Limited (GMDC). The ratings also factors in its healthy growth in scale of operation in its short track record of operations.

However, the ratings are continue to remain constrained by moderate capital structure and debt coverage indicators, capital intensive operations with low return indicators despite healthy profitability, strong competition in the industry and susceptibility of profitability to volatile raw material prices and fluctuations in forex rates.

### Rating sensitivities

#### Positive factors – Factors that could lead to positive rating action/upgrade:

- Stabilization of new project with TOI of more than Rs.200 crore with PBILDT of more than 35% on sustained basis.
- Improvement in debt coverage indicators of the company marked interest coverage of more than 4 times and total debt to GCA of less than 5 times.

#### Negative factors – Factors that could lead to negative rating action/downgrade:

- Delay in project implementation or cost overrun.
- Significant decline in TOI and/or PBILDT margin falling below 20% on sustained basis.
- Any further deterioration in capital structure with overall gearing above 2.5 times.

### Detailed description of the key rating drivers

#### Key rating strengths

##### Experienced and resourceful promoters

GCACL is a wholly owned subsidiary of Credo Mineral Industries Ltd (CMIL), which has resourceful promoters. CMIL is majorly incorporated by three high net-worth families with few other HNIs. Gujarat Apollo Industries Ltd. (Gujarat Apollo, listed company) holds ~ 20% in CMIL. Mr. Rakesh Shah & his family holds ~23% stake whereas Omkareshwar Mines & Minerals Pvt Ltd. (held by Mr. Naman Patel & family who also holds directorship in other credo group entities and GAIL) holds ~17% stake. M/S. Chem Asia Technologies Pte Ltd (Chem Asia), an investment and Trading Company based in Singapore (Global distributor of ATH products) hold ~12% stake. Balance stakes are held by other HNIs and retail shareholder. Promoters had infused need-based support in the company. CMIL also has another subsidiary, Gujarat Credo Minerals Private Limited (GCMIL – rated CARE BBB; Stable/ CARE A3+) was incorporated in March 2012, as a Joint venture between Credo Mineral Industries Limited (CMIL) and Gujarat Mineral Development Corporation Limited (GMDC) and is engaged in beneficiation of law grade bauxite and manufacturing of Zeolite.

Mr. Rakesh Shah (FCA, FCS, LLB, ISA, B.COM) is highly qualified and having vast experience in the field of finance, law and taxation. He has over twenty years of experience in investment management, private wealth management and corporate finance. He co-promoted Credo Group in 2003 and has been a significant contributor to the evolution and growth of group's business. Mr. Naman Patel, MBA, having more than 15 years of experience in this field of business and look after the operations of the company.

##### Location advantage of setting up manufacturing plant at Mundra SEZ

GCACL has entered in to 30 year lease with Adani Ports & Special Economic Zone Ltd. to set up its manufacturing facility at Mundra SEZ, Gujarat having proximity to Mundra Port. Furthermore, the company derive various fiscal benefits along-with ease in export of ATH. GCACL has benefits of single window clearance of all statutory clearance and relaxed labor laws and is eligible for 100% exemption on export profits for first 5 years commenced from FY20 and 50% for the next 5 year under Income Tax Act. GCACL is also exempt from electricity duty for 10 years from the date of commencement of operations.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

### **Availability of key raw material i.e. Bauxite through GCMIL which has long-term raw bauxite supply agreement with GMDC**

GMDC is a GoG owned company having bauxite mines in the state of Gujarat including district Kutch. It has bauxite reserves of approx. 176 Lakh MT spread over 2055 hectares of land. Raw bauxite is one of the scarce mineral and GCMIL; a JV with GMDC is acting as an entry barrier for other players to enter in this business. Beneficiated bauxite manufactured by GCMIL is used as a raw material by GCACL for manufacturing ATH at its manufacturing facility at Mundra Special Economic Zone (SEZ), Gujarat with an installed capacity of 65,000 MTPA (started operations in June 2019) which increased to 72,000 MTPA as on March 31, 2022.

### **Growing scale of operations with healthy profitability**

GCACL's total operating income is continuously growing with addition of new customer and is supported by higher utilization of its capacity. Further, it underwent de-bottlenecking in FY22, making the process more efficient which has increased the capacity of the company to 72000 MTPA from FY23 onwards. During FY22, TOI has increased to Rs. Rs.147.79 crore (PY – Rs. 90.28 crore). For the first two months of FY23, GCACL has achieved revenue of ~Rs. 38 crore. Considering the oligopoly in the market and high demand of the product company had reported healthy operating margin of 33.69% during FY21 with GCA of Rs.16.71 crore. However, with sudden increase in raw material prices of caustic and coal, profitability took significant hit in FY22 to 20.93% due to annual nature fixed price nature of contracts whose prices are revised in FY22 and tenure is also shortened. Going forward the operating margins are expected to remain above 35%.

### **Reputed clientele**

GCACL is getting benefit in terms of long-standing presence and synergetic product profile of Credo group in growing clientele base within very short span of commencement of operation. Top 5 customers contributing ~54% of net sales in FY21 and ~49% in FY22 (Provisional) reflecting moderate customer concentration. However, clientele base of GCACL includes reputed players from Glass, detergent and water treatment industry having leading positions in their respective industry segments. GCACL has earlier entered into yearly fixed price contracts which has been revised to half yearly/quarterly price revision contracts in FY23 considering the volatility in input prices.

### **Key rating weaknesses**

#### **Moderate capital structure and debt coverage indicators**

GCACL's project is majorly debt funded and it has short track record of operations resulting in leveraged capital structure marked by overall gearing of 2.33x as on March 31, 2022. The debt coverage indicators of the company remain moderate marked by interest coverage of 2.13x and very high TD/GCA of 16.19x as on March 31, 2022. In the presence of on-going capex plans, i.e. zeolite production unit, over the medium term and with progressive repayment of term debt, financial risk profile is expected to remain moderate.

#### **Capital intensive operations with low return indicators**

GCACL's operations are highly capital intensive marked by low asset turnover ratio of 0.42x for the year ended March 31, 2022. Thereby, despite healthy profit margin, return indicators marked by ROCE and RONW remain low at 4%-5% and is expected to increase but remained moderate at 10%-12% going forward with expected PBILDT margin of over 35%.

### **Project risk**

The company is undertaking a capex of approximately Rs. 80 crore for setting up a synthetic zeolite plant to be completed by end of FY23. Out of Rs.80 crore, Rs.51 crore will be financed from SBI term loan and the remaining will be financed from internal accruals and promoter infusion. The plant will be set on an annual capacity of 25,000 MT. Company had incurred part cost though funds from GECL loan/working capital changes. Considering initial stage of project and high project gearing, there is risk associated in terms of timely completion of project within cost parameters as well as achievement of envisaged level of scale and profitability in light of anti-dumping duty on imports expiring in 2023.

### **Competition from established player in the market**

On the basis of end-use industry, the ATH market is segmented into plastic industry, paper industry, paints and coatings industry, adhesives industry, chemical industry, pharmaceuticals industry and others. The industries using ATH as their raw material are facing one major issue of timely availability of material at competitive rates. In the current scenario there is largely one single domestic supplier of ATH (i.e. Hindalco with captive bauxite mines) who has a dominant domestic market share which allows it to dictate prices and quantities to be sold.

### **Susceptibility of profitability to volatile raw material prices and fluctuations in forex rates**

Bauxite, caustic soda and coal are key raw material for GCACL comprising more than 70% of total raw material consume. These raw materials are commodity in nature deriving prices from global demand supply dynamics. Due to the volatility in caustic soda and coal prices, GCACL took a hit in profit, as the price of the products were decided on an annual basis and with increase in prices of raw material, GCACL was not able to pass on its prices. Also, the orders were on CIF basis, so the increase in freight cost was burdened on the company. However to mitigate the above mentioned issues, in FY23 the company has shifted to shorter duration orders so that price volatility will be factored in every fresh orders. Also, in case of export orders which are on CIF basis, price escalation clauses have been incorporated. Further, GCACL has majority of its borrowings in the form of Foreign currency loans (FCTL - o/s Rs.169.72 crore as on March 31, 2022) against which GCACL's exports comprise around 35% to 40% of its sales. The profitability of GCACL is susceptible to volatile forex rates, however, with natural hedging, same is mitigated to an extent.

### Liquidity analysis - Adequate

GCACL has adequate liquidity position marked by healthy cash accruals against high debt repayments, healthy cash and bank balance but moderate utilization of fund based limits and operating cycle. The company has policy to offer a credit period of 30 days and beyond that company takes bills as security. However, considering nature of raw material (i.e. Bauxite) company needs to maintain high level of inventory to mitigate any lead time pressures. The average fund based working capital utilization for past twelve months ended on March, 2022 remained high at 84%. Going forward, company has moderate term loan instalment repayment obligations of around Rs.28-30 crore against it is expected to generate adequate GCA of around Rs.35-45 crore. Current ratio remained lower at 1.09 times as on March 31, 2022. During FY22, company has reported healthy cashflow from operations of Rs.38.15 crore (FY21: Rs.23.49 crore). Further, as on March 31, 2022 cash and bank balance stood at Rs.14.22 crore and Rs.4.13 crore was lien marked FDs.

**Analytical approach:** Standalone while factoring in linkage in form of company being a part of Gujarat based Credo Group

**About us:**

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

**Disclaimer:**

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
