Ratings

Facilities	Amount (Rs. crore)	Ratings ¹	Rating Action
Long Term Bank Facilities	6.78 (Reduced from 9.64)	CARE BB; Stable (Double B; Outlook: Stable)	Revised from CARE B+; Stable (Single B Plus; Outlook: Stable)
Short Term Bank Facilities	8.75	CARE A4 (A Four)	Reaffirmed
Total Bank Facilities	15.53 (Rs. Fifteen Crore and Fifty- Three Lakhs Only)		

Details of facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The revision in the ratings assigned to the Bank Facilities of Nilachal Carbo Metalicks Private Limited (NCMPL) is on account of sustained financial performance with satisfactory liquidity and debt coverage indicators over the last two years. The ratings further derive strength from strategic location of the plant. However, the ratings continue to remain constrained by its small scale of operations, volatility in the prices of raw material and finished goods, customer concentration risk and cyclical nature of steel industry.

Rating Sensitivities

Positive Factors - Factors that could lead to positive rating action/upgrade:

- Improvement in scale of operations beyond Rs.180 crore and improvement in PBILDT margin at more than 12%
- Overall gearing below 0.5x and Total debt to gross cash accruals reducing below 1.5x
- Sustenance of operating cycle at the current level

Negative Factors - Factors that could lead to negative rating action/downgrade:

- Decline in scale of operations and moderation in PBILDT margin below 5%
- Deterioration in overall gearing and TD/GCA above 1.5x and 5x respectively

Key Rating Weaknesses

Small scale of operation

With an installed capacity of 75,000 tpa, NCMPL is relatively a small player. With its small size, the company does not get benefit from economies of scale and during financial stress it may impact the business as compared to large players in same industry. The capacity utilization (CU) level improved and stood at 71% in FY21 (57% in FY20) on the back of modification done in the plant such as replacement of refractory lining in the ovens leading to lower cycle time. The CU also increased due to usage of better quality of coal with high yield ratio (with low volatile matter).

Volatility in the prices of raw material and finished goods

Coking coal is the major raw material cost for NCMPL (constituting ~71% of cost of sales in FY21). Since the raw material is the major cost driver and the prices of which are volatile in nature, the profitability of the company is susceptible to fluctuation in raw material prices. Given that any sharp decline in raw-material prices needs to be immediately passed on to consumers whereas any sharp increase in prices are passed to the consumers with a certain time lag, the profitability of the company is susceptible to fluctuation in raw-material prices.

Customer concentration risk

Majority of the revenue for the company is derived from few players who are ferro alloy producers. In FY21, NCMPL derived around 78% (85% in FY20) respectively of its revenue from top 4 customers which indicates customer concentration risk. However, long standing relationship with these clients for over the years mitigates the risk to some extent.

Cyclical nature of steel industry

NCMPL is in the business of manufacturing of LAM coke which is required in the manufacturing of steel and ferro alloy industry so there is a high degree of dependence on the fortunes of the steel industry, which is cyclical in nature.

Key Rating Strengths

Experience of the promoters

NCMPL commenced its operation in 2003 under Dr. B D Chatterjee along with Mr. Bibhudatta Panda. Subsequently the entire stake was bought by Mr. Panda in 2012. Mr. Panda started his career as a trader of imported minerals and coal before venturing into LAM coke manufacturing and having 27 years of overall experience. The day to day operation of the company is managed by Mr. Panda with the help of other experienced professionals.

Strategic location of the plant

NCMPL procures coking coal from local suppliers who in turn imports coking coal from Australia and its manufacturing unit is located at Baramana (Dist. Jajpur) Odisha which is ~100 km away from Paradip port which facilitates NCMPL to readily transport coal to its plant location, thereby enabling it to save on its inward freight cost. Moreover, the manufacturing facility is also strategically located at a distance of 60-130 kms from various Ferro Alloy plants which require metallurgical coke as raw material, thereby enabling it to save on its freight outward cost.

Satisfactory capital structure and debt coverage indicators

Overall gearing ratio and debt coverage parameters remained at satisfactory level post one-time settlement of debt and write-back of liabilities resulting in improved network as on March 31, 2020. The overall gearing ratio remained satisfactory at 1.15x as on March 31, 2021 and 1.22x as on March 31, 2020. Interest coverage improved from 2.39x in FY20 to 3.34x in FY21 (Prov.) on account of low interest expenses. Total Debt/GCA stood stable at 2.99x as on March 31, 2021 as against 2.73x as on March 31, 2020.

Sustained financial performance in FY21

The total operating income of the company remained stable at Rs.115.78 crore in FY21 (Prov.) (Rs.113.84 crore in FY20) on account of stable overall realisation and sales volume. Similarly, PBILDT margin also stood stable at 9.59% in FY21 (Prov.) (9.88% in FY20). The company reported GCA of Rs.8.11 crore vis-à-vis debt repayment obligation of Rs.2.69 crore in FY21. The financial performance remained consistent over the last two years.

Industry Outlook

The finished product of NCMPL is Low Ash Metallurgical (LAM) coke which is majorly used as a fuel in chemical industry as well as in iron & steel industry. India coal production reported 46.5% M-o-M fall in April 2021. Lower demand due to uncertainty caused by the second wave of coronavirus impacted offtake. Besides, higher inventory levels and casualties due to second wave led to slower ramp up of mining operations at coal mines.

However, CARE do expect production and offtake to improve in the coming months as inventories at power plants remain low and utilities would look to restock their supplies ahead of the monsoon season. Besides, demand from steel, cement and DRI sectors are also expected to improve in the coming months as labour and oxygen supply issues gets resolved with fall in the number of covid cases which had peaked in March 2021.

Liquidity: Adequate

Liquidity is marked by gross cash accruals of Rs.8.11 crore vis-à-vis debt repayment obligations of Rs.2.69 crore and free cash balance of Rs.0.20 crore as on March 31, 2021. The fund based bank limits and non-fund based limits are utilized on an average to the extent of ~77% and ~98% in last 12 months ended March 31, 2021 and April 30, 2021 respectively. The current ratio stood below unity at 0.89x as on March 31, 2021.

The working capital cycle of the company was comfortable and stood negative mainly on the back of usage of LC (procurement of coking coal) of usage period of 30-90 days. NCMPL sells its finished product to its customers on a credit period of 10-15 days. The average inventory period was 21 days in FY21 (16 days in FY20).

Analytical approach: Standalone

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
