Total Bank Facilities	8,878.00 (Rs. Eight Thousand Eight Hundred Seventy-Eight Crore Only)		

Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The revision in the ratings assigned to the bank facilities of MMTC Limited (MMTC) is on account of invocation of corporate guarantee given by MMTC to Neelachal Ispat Nigam Limited (NINL) for the bond payment and non-payment of the same by MMTC. As intimated by the debenture trustee, the repayment was due for the final instalment of bond payment on February 19, 2021, however, despite repeated reminders vide letters dated 22.02.21 and 26.02.21 the repayment was not made and corporate guarantee was invoked for immediate repayment.

CARE also notes that MMTC has applied for one-time restructuring of its loans as per 'Resolution Framework for COVID-19 related stress' announced by RBI on August 6, 2020 and the lender banks have invoked resolution process, in principle and inter-creditor agreement has been signed by the banks.

The ratings of MMTC, however continue to factor in its position as the largest international trading house in India along with predominant ownership by the Government of India (GoI) and long and established track record of trading in diverse commodities.

Going ahead, the ability of MMTC to enhance its overall financial profile while efficiently managing its working capital requirements, timely completion of its divestment in NINL along with recovery of its investment and advances post divestment shall be key rating sensitivities.

Key Rating Sensitivities

Positive Factors: *Factors that could lead to positive rating action/upgrade*

- Successful completion of divestment of NINL resulting in recovery of loans & advances extended by MMTC.
- Successful implementation of its one-time restructuring of loans as per 'Resolution Framework for COVID-19 related stress' announced by RBI on August 6, 2020.

Detailed description of the key rating drivers**Key Rating Weaknesses**

High group exposure & increased fund-based support to NINL leading to moderation in the financial & liquidity profile of MMTC

The company reported a decrease of ~16.64% in revenue from Rs. 28891.4 cr in FY19 to Rs. 24167.17 cr in FY20. The same is on account of non-recognition of other trade income (which is commission from NINL). MMTC provides operational

support to NINL by purchasing coking coal for NINL and selling NINL's products (pig iron) on commission basis. MMTC earns 3% commission on the sales made on behalf of NINL which is shown under other trade income in the books of MMTC. In FY19, total commission earned was Rs. 223.94 crore (PY: Rs. 156.51 crore).

Further, the revenue recognized in first 3 quarters of FY20 was also written off in Q4FY20; resulting in negative revenue from the 'Metals Segment'. This has also resulted in negative PBILDT for FY20. The interest cost was partly funded through internal accruals and partly through working capital borrowings. The company reported a PAT loss of Rs. 227.11 crore in FY20 (PY: PAT of Rs. 81.43 crore)

The capital structure of the company also deteriorated in FY20 due to increased working capital borrowings and reduction in Networth due to loss reported in FY20. Further, for executing of one tender for import of Urea, MMTC requested Department of Fertilizer (DoF) to arrange for loan from National Small Savings Fund (NSSF) to avoid any cash-flow mismatch and thus short-term loan from NSSF of Rs. 1310 crore was disbursed. The funds were released from DoF and the loan was repaid in April 2020. This resulted in significant increase in total debt as on March 31, 2020. Also, working capital borrowings were higher on account of operational support extended to NINL. However, the debt marginally reduced to Rs. 2353.85 crore as on June 2020 with the repayment of NSSF loan.

However, the off-balance sheet exposure of the company continues to remain high which includes corporate guarantee of Rs. 1345.82 crore in favor of the lenders of NINL as on March 31, 2020.

MMTC being the 'Managing Promoter' for NINL extends short term credit facility to NINL upto a limit of Rs. 1425.00 crore for its day-to-day operational activities on continuing basis and a trade related financial facility in the form of loans and advances. MMTC's equity investment in NINL is Rs. 459.11 crore as on June 30, 2020. In addition, the company's total advances recoverable from NINL as on June 30, 2020 are Rs. 3294.13 crore (Rs. 2594.57 crore as on March 31, 2019) inclusive of interest accrued not recognized as income of Rs. 252.21 crore for FY20 and Rs. 72.82 crore for Q1FY21. MMTC has extended total advances of Rs. 2328 crore to NINL from FY17 to Q1FY21.

The overall gearing after considering the corporate guarantee and deducting advances to related parties from net-worth of MMTC Ltd, turns negative.

H1FY21 Performance: The company has reported a decrease of ~42% in total operating income on Y-o-Y basis in H1FY21 to Rs. 7,641.83 crore vis-à-vis Rs. 13,196.93 crore in H1FY20 primarily due to non-recognition of income for purchase of coking coal on behalf of NINL and due to the nationwide lockdown in the country amidst the outbreak of Covid-19. The company has also reported negative PBILDT and PAT margins in H1FY21.

Key Rating Strengths

MMTC's position as India's largest International trading house and established track record of trading in diverse commodities

MMTC, established in 1963 is the largest international trading company of India and the first Public Sector Enterprise to be accorded the status of "FIVE STAR EXPORT HOUSE" by the GOI for long-standing contribution to exports. It is the largest non-oil importer of the nation. MMTC has been awarded the 'Mini Ratna' status and stands as a leading international trading house in India. It has consistently won various prestigious awards for export performance. MMTC is involved in diverse trading activities in exports, imports and domestic trading of goods. It is the largest exporter of minerals from India, single largest importer/supplier of bullion and non-ferrous metals viz. copper, aluminum, zinc, lead, tin and nickel in the country. The company has a wholly-owned international subsidiary in Singapore to support its international trade. MMTC has formed Joint Ventures with various entities in order to diversify and increase its area of operations.

Industry Prospects

MMTC plays a vital role in association with the government of India in policy formulation to support Gems & Jewellery industry in India and development of jewellery sector on Pan-India basis. The government of India launched Gold monetization scheme with a view to promote circulation of domestic gold within the domestic economy to curb bullion imports and save forex outgo. The demand for gold is expected to remain firm owing to its traditional and religious importance. However, the near-term prospects for the gems and jewellery industry are not too bright owing to expectations of rising prices of precious metals, economic slowdown negatively impacting disposable incomes and leading to low consumer sentiments. However, gradual recovery is expected from Q3FY21 onwards, which marks the onset of the festival and wedding season demand for which may not be at pre-covid levels owing to fall in number of wedding days in this year and gold prices showing no signs of receding. Long term prospects remain stable owing to growing consciousness of branded jewellery, increasing purchasing power in the Tier 2 & 3 cities, growing population of working females and increasing preference towards diamond jewellery.

Fertilizers: As per CARE, the underlying macros for the Indian fertilizer industry look promising despite the coronavirus pandemic and macroeconomic uncertainty. With surplus reservoirs levels, record high kharif crop sowing and plentiful rainfall during the monsoon season, demand for the procurement of fertilizers is expected to be promising. Sales increased sharply by 25.10% during FY21 (from April till August) and going forward with the increase in liquidity of farmers, good prospect for the Rabi season coupled with the revival of the rural economy, demand for fertilizers for the rest of FY21 seems optimistic for the industry. The overall fertilizer production is expected to grow by 4-6% by the end of FY21.

Liquidity: Stretched

As intimated by the debenture trustee, the unconditional and irrevocable corporate guarantee given by MMTC for the bond payments of NINL was invoked vide their letter dated March 26, 2021 on account of non-repayment of principal and interest to the bond holders which was due on February 19, 2021. The repayment required to be made by MMTC immediately was of Rs. 52.62 crore (principal & interest due) plus extra applicable default penal interest. However, MMTC on account of its weak liquidity, could not meet the said repayment. Earlier the company had defaulted in repayment of two Short-term Loans (STL) in the month of September 2020 of Rs. 300 crore and Rs. 160 crore. Subsequently, the company had requested its lenders for one-time restructuring of its loans as per 'Resolution Framework for COVID-19 related stress' announced by RBI on August 6, 2020. The lender banks have invoked resolution process, in principle and inter-creditor agreement has been signed by the banks.

The liquidity position of MMTC has been stretched on account of increase in debt which has primarily been extended as operational support to NINL which is presently under divestment process. Further, the Department of Investment and Public Asset Management (DIPAM) has issued a global invitation for Expression of Interest (EOI) on January 25, 2021 for 100% divestment of NINL with the due date for EOI being March 29, 2021.

Analytical approach: Standalone (Factoring in the support provided to its subsidiaries and associates in the form of corporate guarantees and loans and advances).

Note: MMTC Ltd has an associate company Neelachal Ispat Nigam Ltd (NINL) with 49.78% shareholding however it is in a completely different business and hence it has not been consolidated, however, the impact of its investment has been factored in the analysis.

About the Company

MMTC, a public sector undertaking, was incorporated on September 26, 1963, to facilitate foreign trade in India and canalize the export and import of essential minerals and metals. It is under the administrative control of the Ministry of Commerce & Industry, and Government of India (GOI) held 89.93% stake in the company as on June 30, 2020. MMTC deals in multiple products and markets. The business operations of the company span across six major divisions i.e. minerals, metals, precious metals, agro products, fertilizers & chemicals and coal & hydrocarbons. MMTC has also set up a 15-MW wind energy mill in Karnataka. MMTC is one of the few agencies, apart from banks, permitted by the GOI for import of bullion in the country.

Neelachal Ispat Nigam Limited (NINL); associate company of MMTC was incorporated in 1982 to set-up an Integrated Steel Plant (ISP) to undertake the manufacture and sale of pig iron. Originally, the main promoters were Industrial Promotion & Investment Corporation of Orissa (IPICOL) and Orissa Sponge Iron Ltd (OSIL). Subsequently MMTC Limited, a majority owned undertaking of Govt. of India, was inducted as the main promoters since FY16 with equity share holding of 49.78%. The Cabinet Committee on Economic Affairs (CCEA) has given an 'in-principle' approval for strategic disinvestment of 100% equity of NINL in January 2020. As per the management, MMTC has taken 'in principle' decision to divest its equity in NINL through Department of Investment & Public Asset Management.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
