### Detailed Rationale & Key Rating Drivers

The reaffirmation of the long term rating continues to derive strength from the long operational track record of the company in the water and irrigation infrastructure segment, vast experience of the promoters in the construction industry, demonstrated track record of project execution, healthy and geographically diversified order book position providing revenue visibility in the medium term and moderate capital structure.

The ratings strengths are tempered by high working capital intensive nature of operations, extended collection days and presence in highly fragmented and competitive industry. CARE notes that the revenue and profit level has been impacted in FY21 (FY refers to period April 01 to March 31) which is attributable to the impact of the COVID-19 pandemic and slowdown in execution during H1FY21. The execution picked up significantly during H2FY21 with improvement in labour availability and supply chain dynamics. The performance during Q1FY22 has been better on a y-o-y basis although margins have been impacted due to rising commodity prices. While execution has picked up, the debtors position has not witnessed traction resulting in increased pressure on working capital position and higher interest cost impacting the overall profit. In light of the above circumstances, CARE has revised the short-term rating downward and also the outlook on ratings to negative. CARE believes that the issues pertaining to realization of receivables are likely to persist in medium term and can have an impact on the financial metrics and liquidity position of the company. Any improvement in the said position may lead to revision in the outlook to stable.

### Rating Sensitivities

#### **Positive factors-Factors that could lead to positive rating action/upgrade:**

- Growth in scale of operation with improvement in profit level and margins
- Improvement in collection days to less than 250 days on a sustained basis
- Improvement in debt coverage metrics with TD/GCA improving to 6x or below

#### **Negative factors-Factors that could lead to negative rating action/downgrade:**

- Elongation in overall collection period beyond 300 days on continued basis
- Weakening of overall gearing ratio to 2.0x and above on sustained basis

### Key Rating Strengths

#### **Established track record with demonstrated project execution capabilities**

IHP has over nine decades of experience in the Engineering, procurement, construction (EPC) business in India. Over the years, IHP has been able to establish its position as one of the major players providing EPC services in water supply, irrigation and sewerage-related projects. The company has an extensive track record in execution of these projects in different parts of the country with presence in 12 States.

The company has been promoted by Mr. Rajas R. Doshi and the promoters are well supported by other Directors and professional management.

#### **Healthy, growing and diversified order book**

IHP has a strong order book position of around Rs. 4,652 crore as on July 31, 2021 executable over a period of 24–30 months. Despite slowdown in the sector, the company has been able to maintain healthy order position with work orders approx.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE publications

Rs.1000 crore added over the last one year. The work orders are spread across 12 states in the country with majority of orders from States of Uttar Pradesh, Karnataka, Tamil Nadu, Andhra Pradesh and Maharashtra.

The strong order book position provides revenue visibility over the near to medium term (3.7x times FY21 total operating income) A large proportion of the orders have price escalation clauses safeguarding the company to a great extent against any severe raw material price fluctuations.

#### ***Moderate capital structure***

The company has a long presence in the industry which has resulted in a moderate networth position and hence despite rising debt level, the capital structure has remained at satisfactory level. However, given the lower profit level, the other debt coverage metrics have remained subdued. The total debt to GCA of the company deteriorated from 8.77x during FY20 to 11.70x during FY21 on account of decline in GCA levels (Rs.66.60 crore during FY21 as against Rs.93.63 crore during FY20). The other debt coverage indicator, PBILDT interest coverage ratio of the company, remained comfortable, although declined from 2.54x during FY20 to 1.71x during FY21 on account of lower PBILDT levels during the year.

#### **Key Rating Weaknesses**

##### ***Subdued financial performance during FY21 with impact of covid***

The construction industry was impacted in FY21 due to execution slowdown with lockdown on account of covid pandemic, migration of labour resulting in labour availability issues and supply chain restrictions. In line with same, the financial performance of the company was also impacted severely during H1FY21 wherein revenue dropped by ~40% on a y-o-y basis. The execution picked up in H2 with improvement in the overall scenario and the revenue degrowth during H2FY21 was marginal at ~4%. Cumulatively, the overall revenue declined by 23% which trickled down to the profit level and margins also.

Backed by a comfortable order book position and better preparedness during second wave of covid, the performance during Q1FY22 has been better vis-à-vis last year. The company registered revenue growth of ~33% during the quarter and reported profit vis-à-vis loss last year. However, the rising commodity prices and time lag in passing on same resulted in lower operating margin to 8% during the year (against average margin of 10-11%).

##### ***Elongated operating cycle as a result of higher receivables***

The company operates in a working capital intensive industry and there has been extension of receivable days due to milestone-based payment terms as well as retention money being built up. The collection days has been witnessing continuous increase over the past three years and significant drop in revenue has resulted in further elongation of average debtor days during FY21 (from 359 days in FY19 to 419 days in FY21). This in turn has pressurized the working capital position with the average working capital utilization high at 89%. The ability of the company to optimize the collection with subsequent reduction in debt levels is important from credit perspective.

##### ***Presence in fragmented industry with high level of competition:***

IHP operates in the EPC industry which is highly competitive in nature. EPC industry in India is heavily dependent on order inflow from the government agencies. With the government's push towards increased spending on infrastructure, the prospects of the company seems to better as players with diverse presence across various states are expected to benefit from the same. However, the operating profit margins of the players in the industry have remained moderate due to fragmented nature of industry with presence of large number of players in the market. Players with superior execution capabilities and financial flexibilities are better placed to overcome the competition in the market.

#### **Liquidity: Adequate**

The liquidity position of the company although weakened from previous level has remained at an adequate level due to lower scheduled debt repayment obligation vis-à-vis the cash accruals. The company has reduced the scheduled obligation with payment of Rs.110 crore of working capital demand loan during FY21. However, continued stretch in the gross current asset days may impact the liquidity reducing the headroom available for managing any unforeseen requirement as the average utilization of fund based limits for the past 12 months ending July 31, 2021 stood at ~89%.

**Analytical approach:** Standalone

### About the Company

Incorporated in July 1926, The Indian Hume Pipe Company Ltd. (IHP) is engaged in providing Engineering, Procurement, Construction and Commissioning services in water supply, irrigation and sewerage related projects. With more than 9 decades of experience, the company is considered a pioneer in the field of water supply industry. The company has presence in almost all water supply related activities, viz. Urban & Rural Water Supply, Penstock for Hydro Power Generation, Tunnel Lining, Large diameter Irrigation pipelines, Head Works including pumping machinery, Treatment Plants, Overhead Tanks and other allied Civil Construction. Over a period, IHP has evolved from contract manufacturer of pipes to executing EPC contracts in water supply contracts as well. The company majorly deals with government projects floated by various State and Central Government agencies. With increased focus in EPC contract business, the pipe manufacturing segment contributes less than 10% to the total revenue of the company.

**About CARE Ratings:**

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

**Disclaimer**

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
