

## Aggarwwal Exports

February 06, 2023

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term Bank Facilities	2.50	CARE BB+; Stable	Assigned
Long Term / Short Term Bank Facilities	7.00	CARE BB+; Stable / CARE A4+	Assigned
Short Term Bank Facilities	30.50	CARE A4+	Assigned

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The ratings assigned to the bank facilities of Aggarwwal Exports (AGEX) are primarily constrained by its modest scale of operations and elongated operating cycle. Further, the ratings are also constrained by risk associated with foreign exchange fluctuation risk, constitution of the entity being a partnership firm, raw material price volatility risk and its susceptibility to intense industry competition & threat of substitution from synthetic menthol.

The ratings, however, draws comfort from experienced partners coupled with long track record of operations, favourable location of manufacturing facility, moderate profitability margins, capital structure and debt coverage indicators.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Volume driven growth in business leading to improvement in scale of operations as marked by total operating income of above Rs.120.00 crore on sustained basis.
- Improvement in the gross operating cycle of the firm for less than 95 days.
- Strengthening of partner's capital base and improvement in capital structure as marked by overall gearing ratio of below 0.80x.

#### Negative factors

- Deterioration in the capital structure as marked by overall gearing ratio of above 2.00x.
- Decline in profitability margins as marked by PBILDT margin of below 3.50% on a sustained basis.

### Analytical approach: Standalone

#### Key weaknesses

**Modest scale of operations:** AGEX's scale of operations stood modest as evident from total operating income (TOI) of Rs.77.08 crore and gross cash accruals of Rs.5.17 crore respectively, during FY22 (FY refers to the period April 1 to March 31) as against Rs.77.90 crore and Rs.3.66 crore respectively, during FY21. Moreover, AGEX's scale of operations remained declining for the period FY20-FY22 (refers to the period April 1 to March 31). The same was mainly on account of lower intake from its existing overseas customers. Nevertheless, the scale remains modest, it limits the firm's financial flexibility in times of stress and deprives it of scale benefits. Further, the firm has achieved total operating income of ~Rs.58.37 crore during 9MFY23 (refers to the period from April 1, 2022 to December 31, 2022; based on provisional results) and is expected to clocked turnover of Rs.80.00 crore for FY23.

**Elongated operating cycle:** The operations of the firm stood elongated as marked by operating cycle of 136 days for FY22 as against 139 days for FY21. Owing to large product portfolio, the firm is required to maintain adequate inventory at each processing stage for smooth running of its production processes and finished goods to ensure prompt delivery to its customers resulting in an average inventory holding period of around 86 days for FY22. Owing to highly competitive industry, the firm has to offer liberal credit period of around 1-2 months to its customers resulting in an average collection period of 52 days for FY22. Further, the firm receives an average credit period of around a week from its suppliers resulting in an average creditor's period of 1 day for FY22. The average utilization of working capital borrowings remained almost 80% utilized for past 12 months period ending December, 2022.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

**Foreign exchange fluctuation risk:** AGEX's operations are primarily focused on the export market and its export contribution to total sales stood around 58% in FY22. However, the raw material is mainly procured from domestic markets. With initial cash outlay for procurement in domestic currency and significant chunk of sales realization in foreign currency, the firm is exposed to the fluctuation in exchange rates. However, the firm has a policy of hedging around 70-80% of its foreign currency receivable. Nevertheless, for the uncovered portion; the firm's profitability margins are exposed to volatility in foreign exchange rate. Moreover, any change in government policies, either domestic or international is likely to affect the firm's revenues. Earnings are also susceptible to strict regulatory policies relating to tariff barriers (custom duty), non- tariffs barriers (restriction on the quality of imports), anti- dumping duties, international freight rates and port charges. During FY22, firm has booked profit of Rs.1.07 crore from foreign exchange fluctuations.

**Constitution of the entity being a partnership firm:** AGEX's constitution being a partnership firm has the inherent risk of possibility of withdrawal of the partner's capital at the time of personal contingency and firm being dissolved upon the death/retirement/insolvency of partner. Moreover, partnership firms have restricted access to external borrowing as credit worthiness of partners would be the key factors affecting credit decision for the lenders.

**Raw material price volatility risk:** Mentha oil, DMO, menthol, epichlorohydrin, etc. are the major raw materials required for the production. Since, the basic raw materials are petrochemical derivatives, AGEX is exposed to the risk of volatility in the prices of crude oil/natural gas which are primarily driven by international demand and supply scenario. Thus, margins are vulnerable to fluctuation in raw material cost. Adverse fluctuations in raw material prices can affect the AGEX's margins adversely. However, to mitigate the same, company negotiates mentha oil prices with farmers and traders in advance to reduce risk of volatility in prices to a certain extent. However, firm does not have any long-term contracts with its clients, it usually enters into a contract of 3-4 months with its clients and prices are negotiated and fixed at that time of entering into the contract.

**Susceptibility to intense industry competition & threat of substitution from synthetic menthol:** AGEX operates in the menthol industry, which is low capital or technology-intensive, resulting in low entry barriers. Consequently, the industry is highly fragmented which results in intense industry competition. Further, there is limited differentiation in products of different players, because of which buyers have a high bargaining power and limits the pricing power of the manufacturers resulting in low profitability. The firm also faces competition with synthetic menthol manufacturers wherein the cost of synthetic menthol is lower and as it is readily available with large organised players, it has found acceptance among the erstwhile users of natural menthol. While synthetic menthol capacities are expected to increase going forward, rising demand for menthol products is expected to absorb part of the rising capacity, softening the impact on natural menthol demand. Synthetic menthol could become a possible substitute to natural menthol as the same is not dependent on the vagaries of nature. However, natural menthol, being organic, is generally preferred over synthetic menthol for the food and beverage industry who are the major users of menthol products.

## Key strengths

**Experienced partners coupled with long track record of operations:** AGEX is a family run business. Mr. Lakshmi Narain Gupta, Mr. Neeraj Gupta, Mr. Pranjal Varshney and Mr. Lakshya Varshney are the partners of the AGEX and they collectively look after the overall operations of the firm. Mr. Lakshmi Narain Gupta is graduate by qualification and has accumulated experience of nearly four decades in menthol industry through his association with this entity and in individual capacity. He is well supported by his son; Mr. Neeraj Gupta; who is post graduate by qualification and holds experience of more than two decades in menthol industry through his association with this entity. The other partners of the firm namely; Mr. Pranjal Varshney and Mr. Lakshya Varshney helps in managing day-to-day operations of the entity. The firm is having a considerable track record in this business which has resulted in long term relationships with both suppliers and customers.

**Favourable location of manufacturing facility:** AGEX's manufacturing facility is located in Rampur, Uttar Pradesh, which is known as Mentha-based industry due to the easy availability of the raw materials in districts like Bareilly, Chandausi, Shambhal, etc. Proximity of manufacturing plant to major mentha oil producing region gives AGEX advantage in terms of regular supply of raw material and lower lead time of purchase. The products manufactured by the firm finds its application in pharmaceutical industry, home care products industry, food & beverages industry, perfumery industry, soap manufacturing industry, etc.

**Moderate profitability margins, capital structure and debt coverage indicators:** The profitability of the firm stood moderate for the last three financial years (FY20-FY22) wherein the company reaps benefits of its established image in the regional market. Further, PBILDT margin of the firm improved and stood at 8.04% in FY22 as against 5.84% in FY21 owing to spurt in the prices of products sold by the firm in addition to proportionate decline in overhead expenses such as raw material

cost. Similarly, PAT margin also improved and stood at 6.25% in FY22 as against 4.24% in FY21 backed by increased PBILDT levels. Further, during 9MFY23, PAT margin stood at 7.70%. The profitability margins of the firm as marked by PBILDT margin is expected to improve further and remain range-bound between 9.00%-11.00% in the projected period since, the firm will be able to sell its products at higher margins owing to its abundant demand in the market.

The capital structure of the firm stood moderate as on the past two balance sheet dates ending March 31, '21-'22 on account of limited debt levels against the net worth base. Overall gearing ratio stood at 1.10x as on March 31, 2022 showing improvement from 1.17x as on March 31, 2021 mainly on account of lower utilization of working capital borrowings as on balance sheet date. Further, on account of limited debt levels, the debt coverage indicators of the firm as marked by interest coverage ratio and total debt to GCA stood moderate at 6.04x and 3.34x respectively, in FY22 as against 5.12x and 4.91x respectively, in FY21. The improvement in coverage indicators is on the back of increase in PBILDT owing to rise in the prices of products sold by the firm consequently leading to higher gross cash accruals.

### Liquidity: Adequate

The liquidity position of the firm remained adequate characterized by sufficient cushion in accruals vis-à-vis nil repayment obligations. The firm has reported gross cash accruals (GCA) to the extent of Rs.5.17 crore during FY22 and is expected to generate envisage GCA of Rs.5.30 crore for FY23 against nil repayment obligations in same year. Further, the firm has adequate free cash & bank balances which stood at Rs.2.96 crore as on March 31, 2022. However, the average utilization of its working capital limits remained almost 80% utilized for the past 12 month's period ending December, 2022.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
