### Detailed Rationale & Key Rating Drivers

The reaffirmation of the ratings to the bank facilities of The Kolhapur Steel Limited (TKSL) continues to derive strength from its strong promoter group (Kirloskar Group) with Kirloskar Brothers Limited (KBL) holding majority of TKSL's shares, financial support from the parent company in the form of inter-corporate loans and extended corporate guarantee towards TKSL's debt obligations, and capability of TKSL to produce large size sound castings. The ratings, also factor in the management's plan to turn around TKSL's operations through third party consultant and achieve sustainable business going forward.

The rating strengths, however, are constrained by modest scale of operations and continuous losses registered by the company, weak solvency position, and susceptibility to volatility in raw material prices.

The ratings also consider the subdued performance of company during H1FY21 (Unaudited, refers to April 1 to September 30) due to the outbreak of COVID-19.

### Rating Sensitivities

#### Positive Factors - Factors that could lead to positive rating action/upgrade:

- Sustained improvement in scale of operations and operating profits leading to positive cash accruals to service its debt obligations
- Improvement in interest coverage to 2 times or higher
- Improvement in capital structure with positive net worth and resultant decline in overall gearing to 2 times or lower

#### Negative Factors - Factors that could lead to negative rating action/downgrade:

- Weakening of linkages with parent company

### Detailed description of the key rating drivers

#### Key Rating Strengths

##### **Strong Parentage of the Kirloskar Brothers Limited (KBL)**

TKSL is a subsidiary of KBL (holding 99.74%) which is one of the leading manufacturer and exporter of pumps catering to the requirements of sectors such as oil and gas, water resource management, irrigation, power, distribution and construction. TKSL acts as a backward integrated unit for KBL, from where required castings are procured, on an arm's length basis. TKSL derives around 60%-70% of revenue from Kirloskar Group entities including KBL. In addition, around 50% of the TKSL's installed capacity is reserved for Kirloskar Group. The board of TKSL is chaired by KBL's key personnel, which aids in sound decision making. The management has appointed third party consultant to revive the operations of TKSL.

##### **Financial support from the parent company**

TKSL has had reported cash losses in the past and the working capital requirements along with debt obligations are met through funding support from KBL in the form of either equity or inter-corporate loan. In FY20, KBL has infused funds in TKSL in the form of unsecured loans worth Rs.15 crore to fund the losses along with repayment of debt obligations. Further, during FY21, the total estimated amount of fund infusion by KBL in the form of non-cumulative compulsory convertible

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE publications

preference share (CCPS) @ 6 % is Rs.15 crore. Out of which, the parent has already infused Rs.7.50 crore during H1FY21 and is expected to infuse funds balance funds by March 2021. Additionally, KBL has extended corporate guarantee to the bank facilities of TKSL. Going forward, continue financial support from KBL to TKSL will be the key rating monitorable.

#### **Capability to produce large size sound castings**

TKSL has been in manufacturing of large size castings (ranging from 300kg to 14000kg in weight) since inception. These castings are mostly used in the segments such as large size pumps for oil extraction, irrigation projects and water treatment projects. Since these pumps are put to test for extreme conditions and operations and are used in harsh climatic conditions, acceptance for these products plays a vital role and it is not easy for customer to change the supplier.

#### **Key Rating Weaknesses**

##### **Modest Scale of operations and Operating Losses**

The scale of operations is modest over the past five years with below 50% capacity utilization on account modest orders from KBL and other group entities. The TOI was in the range of Rs.30 crore – Rs.46 crore during FY16-FY20. During FY20, the TOI declined by 14% from Rs.36.14 crore in FY19 to Rs.30.94 crore in FY20. The decline was on account of slowdown in end-user industry resulting in lower order intake. Further, with high employee and raw material cost the company registered operating losses in FY20.

In H1FY21 (UA, refers to the period from April 1 to September 30), TKSL has reported decline in TOI of the company as compare to H1FY20 driven by sluggish demand in Q1FY21 on account of the outbreak of COVID – 19. On account of high employee cost the company reported operating losses in H1FY21. The ability of company to improve its scale of operations significantly and registering operating profit will remain the key rating sensitivity.

##### **Weak capital structure and debt coverage metrics**

Accumulated losses over the years resulted in negative net worth and subsequently in weak capital structure and debt coverage indicators for the company. Despite the expected fund infusion by KBL, the capital structure is expected to remain weak in the near term.

##### **Susceptibility to volatility in raw material prices**

The key raw material of the company – Steel scrap and Ferro alloys, are highly volatile in nature. Furthermore, large portion of orders usually doesn't have escalation clause built in, which keeps its operating efficiency vulnerable to the movements in raw material prices.

#### **Liquidity: Stretched**

TKSL's liquidity is constrained by cash losses, high working capital limits utilization and modest cash & bank balances. However, the liquidity is supported by financial support of parent, KBL. TKSL incurred cash loss of about Rs.10.28 crore in FY20 and is expected to incur cash losses in FY21 as well. The loss funding and debt obligation is expected to be met by the fund infusion from KBL.

Further, the company relies largely on working capital utilization as indicated by average utilization of working capital limits of nearly 68% for the past 12 months ended September 30, 2020. Operating cycle of the company for FY20 was seen at 16 days as against 31 days in FY19. Over the years, TKSL has been able to manage the operating cycle below 30 days mainly on account of garnering better credit terms with the suppliers, which is partially on account of its strong parentage.

During FY21, TKSL was availed moratorium for repayment of principal portion for term loan from March 2020 to August 2020.

#### **Analytical approach: Standalone**

CARE has adopted a standalone approach. However, substantial operational and financial linkages in the form of procurement of key raw material, channel usage, fund infusion and corporate guarantee extended by the parent –KBL, have been factored in while analyzing the company. TKSL is strategically important for the operations of KBL as part of its backward integration.

### About the Company

TKSL is the subsidiary of Kirloskar Brothers Limited (KBL, holding 99.74% stake). TKSL which has its manufacturing facility located at Shiroli, Kolhapur (Maharashtra), was established on May 26, 1965 by Agashe family. It was taken over by KBL in September 2007 and is currently managed by C M Mate (Chairman) and Ravindra Samant (Managing Director) who also hold key positions in the parent company, KBL. TKSL is engaged in the manufacturing mild steel and stainless steel castings which are used in various end user sectors like pumps, valves, turbines (steam and hydro), marine, rubber machinery, mining and general engineering. TKSL has a total production capacity of 6000 MTPA producing castings weighing in range of 300kg to 14000 kg (single piece).

| Brief Financials (Rs. crore) | FY19 (A) | FY20 (A) |

#### About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

#### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
