Detailed Rationale & Key Rating Drivers

The reaffirmation in the ratings assigned to the bank facilities of Bhagyanagar India Limited (BIL) continue to derive strength from experienced promoter group with long established track record of operations, steady improvement in total operating income during FY21 (refers to the period April 01 to March 31) and Q1FY22, reputed clientele, and stable industry growth prospects. The rating strengths are, however, partially offset by thin profitability, moderate leverage and coverage indicators, elongated operating cycle, volatile raw material prices and forex risk.

Key Rating Sensitivities
Positive factors: Factors that could lead to positive rating action/upgrade

- ✓ Improvement in PBILDT margins at 4% or above, on a sustained basis with consistent improvement in scale of operations.
- ✓ Improvement in overall gearing ratio to less than 0.75x and total debt to PBILDT below 4x.

Negative factors: Factors that could lead to negative rating action/upgrade

- ✗ Working capital cycle stretching to beyond 90 days thereby impacting the liquidity position of the company
- ✗ Decline in PBILDT margin to below 2% in future
- ✗ Any notable decline in TOI, going forward
- ✗ Overall gearing deteriorating to above 2x, in future.

Detailed description of the key rating drivers
Key Rating Strengths
Established group with vast experience of promoters

Founded in 1978, the Surana Group is a Hyderabad based well diversified business conglomerate with focus on areas of Telecommunications, Copper rods, Copper Pipes, Copper Sheets, Copper Foils and Power Cables, Wind Power, Solar Power generation. Bhagyanagar India Limited (BIL) was founded by Mr. G M Surana in 1985 is the Chairman and head the Surana Group of companies based out of Hyderabad. He is a graduate in Commerce and Law from Osmania University having about two decades of experience in Ferrous and Non-Ferrous metal industry. The business operations are well supported by team of qualified professionals.

Established and strong brand name with reputed clientele

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

Being one of the oldest copper product manufacturing companies with over four decades of experience, BIL has been able to establish itself as one of the leading players in the copper products due to which the company is successful in developing long term relationships with major players in automobile and electrical segments. Few of the customers of BIL includes Lucas-TVS, Fine cab Wires and Cables Private Limited, HBL Power System Limited, Valeo products LLP and Esennar Transformers Pvt Ltd among others. Further, the client base of the company is also highly diversified with the top five customer together contributing only to 22.62% of the TOI in FY20 (PY: 26.12%). Further, Lucas TVS Limited is the major customer of the company and have been doing business with the group from more than six years.

Improved scale of operations in FY21 albeit low profit margins

The total operating income of the company increased from Rs.563 crore in FY20 to Rs.787 crore in FY21 registering y-o-y growth of 39% on account of increase in sales from BCPL from Rs.143 crore to Rs. 348 crore with first full year of operations coupled with improvement in sales realisation. 99% of the revenue derived from the copper division. BIL also operates wind power plant in Karnataka State. BIL has entered into Power Purchase Agreement (PPA) for the entire capacity for a period of 20 years (valid through 2026) with Hubli Electricity Supply Company Limited (HESCOM) and Gulbarga Electricity Supply Company Limited (GESCOM) at a fixed tariff rate of Rs.3.40 per unit. BCPL diversified its operations to export market as well and derived around 30% of revenue from export sales.

The PBILDT margin of the company continues to remain thin at 2.35% in FY21 (PY:2.77%). The profitability margins of the company dependent on fluctuation of raw material prices coupled with sales made from various segment. Out of the total cost, 90% comprise of raw material (copper) where the prices are volatile. Nevertheless, the PAT margin marginally increased from 0.18% in FY20 to 0.44% in FY21 at the back of reduction in interest cost with lower ROI charged by banks.

Liquidity analysis: Adequate

The company is generating sufficient accruals to meet its debt obligations. The company has projected a gross cash accrual of Rs. 14 crore as against debt repayment obligation of around Rs 4.00 crore. The company has not availed the COVID moratorium for the debt repayment. The liquidity is supported by above unity current ratio at 1.51x and unutilized working capital limits around 22%.

Stable Industry outlook

The global refined copper production is expected to reach 27.61 million tonnes in 2025, growing at a CAGR of 2.94%, for the time period 2021-2025. Factors such as rising copper annual capacity in renewable energy, growing use of copper in smart home appliances, expansion of construction industry, increasing manufacturing of electrical equipment and growth in scrap copper supply would drive the growth of the industry. Copper is considered as an important element of economic growth worldwide. An increase in the price of copper is an indication that the global economy is recovering from the COVID-19 disruption. Copper is outperforming other base metals such as aluminium and zinc due to its high demand for industrial applications, which is contributing to the growth of the global copper market.

Key Rating Weaknesses

Moderate capital structure as on March 31, 2021

The capital structure of the company moderated as on March 31, 2021. The overall gearing ratio deteriorated from 0.54x as on March 31, 2020 to 1.22x as on March 31, 2021 on account of higher outstanding working capital bank borrowings as on closing balance sheet dated March 31, 2021 due to increase in unsecured loans of Rs 15 crore and GECL loans of Rs. 8.72

crore availed during the year. Accordingly, the coverage ratio of the company marked by total debt/GCA deteriorated from 10.84x in FY20 to 15.65x in FY21. Nevertheless, the PBILDT interest coverage ratio improved to 2.23x in FY21 (PY:1.64x) with better operational profits and lower interest expenses.

Volatile raw material prices resulting in thin profitability.

The key raw materials required for BIL is copper. Copper prices are highly volatile and depend on several international economic parameters. Profitability of the company is impacted due to fluctuations in raw material prices. To manage this volatility, the company generally keeps adequate stock of raw materials at the perceived lowest prices during a period to ensure stable profitability margins. Also, as the company operates in a competitive industry which imposes further pressure on its profitability margins.

Forex Risk; albeit hedge exists

BIL imports around 40% of raw material and have export sales of 15% which exposes it to forex fluctuation risk. Nevertheless, the company has robust framework in place to protect its interest from risks arising out of market volatility. Almost 50% to 60% of the inventory is always hedged on the MCX thereby insulating it from any volatility risk

Analytical approach: Consolidated

CARE has analyzed the consolidated financials of Bhagyanagar India Limited and its 100% owned subsidiary, Bhagyanagar Copper Private Limited while arriving at the ratings of Bhagyanagar India Limited.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
