*Backed by an unconditional and irrevocable corporate guarantee of Ircon International Limited valid until 180 days from the commercial operations date or the receipt of the first full annuity, whichever is later.

Unsupported Rating	CARE A- (Single A Minus) [Assigned]
---------------------------	--------------------------------------------

Note: Unsupported rating does not factor in the explicit credit enhancement.

Detailed rationale and key rating drivers for the credit-enhanced debt

The rating assigned to the bank facilities of IRCON Bhoj Morbe Expressway Limited (IBMEL) primarily factors in the unconditional and irrevocable corporate guarantee (CG) of Ircon International Limited (IRCON; rated 'CARE AAA; Stable/CARE A1+), a Government of India (GoI) enterprise and a Miniratna Category-I public sector undertaking (PSU), which will be valid until 180 days from the commercial operations date (COD) or the receipt of the first full annuity whichever is later, thereby covering the risks associated with the project during the entire construction period.

The rating is underpinned by the inherent strengths of the hybrid annuity model (HAM)-based road projects such as (i) lower project funding risk with 40% of the bid project cost (BPC) available as a grant from the National Highways Authority of India (NHAI; rated 'CARE AAA; Stable') during the construction period, inflation-indexed annuity to be received for construction and favourable clauses introduced in the concession agreement (CA) to mitigate challenges to project execution, (ii) lower post-implementation risk on account of inflation-indexed annuity to be received for operations and maintenance (O&M) of the road, and (iii) receipt of the marginal cost of lending rate (MCLR)-linked interest annuity.

Furthermore, the rating of IBMEL also derives strength from the fixed-price engineering, procurement and construction (EPC) contract with the sponsor – IRCON, which has an established track record of constructing roads and highways. The rating also favourably factors in the credit quality of the underlying annuity receivables from the NHAI subsequent to the commencement of the operations. Furthermore, the comfortable debt coverage indicators, the liquidity support mechanism such as upfront creation of a debt service reserve account (DSRA) on achievement of the COD, the proposed major maintenance reserve (MMR) and the sponsor undertaking to arrange additional amounts and funds to mitigate any liability arising due to the change in the base case business plan or the assumptions made in the base case business plan are some of the other credit positives.

The above rating strengths are, however, tempered by the inherent construction risk associated with the project execution, wherein the company has to undertake tunnel works. Furthermore, the absence of cushion between the annuity due date and the repayment date, resulting in ad-hoc support from the sponsor to address possible cash flow mismatches if any, and susceptibility to changes in operations and maintenance (O&M) cost and interest rate, are other credit deterrents.

Detailed rationale and key rating drivers of Ircon International Limited

The detailed rationale of the CG provider, IRCON, is available at the link: [Ircon International Limited](https://www.irconinternational.com).

Key rating drivers of IBMEL

The Unsupported rating assigned to the bank facilities of IBMEL takes into account the inherent strengths of the HAM-based road projects, including the credit quality of the underlying annuities to be received post-implementation. The liquidity support mechanism such as the upfront creation of a DSRA on the COD, the proposed MMR, and the undertaking extended by the

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

sponsor to arrange additional amounts and funds to mitigate any liability arising due to the change in the base case business plan or the assumptions made in the base case business plan, including any deficit in annuity payment on account of non-compliance of the maintenance obligations for the entire debt tenure, lends additional comfort.

The above rating strengths are, however, tempered by the construction risk associated with the project. Furthermore, susceptibility to changes in O&M risk and interest rate risk are other credit deterrents.

Rating sensitivities

Positive factors – Factors that could lead to positive rating action/upgrade:

- Completion of project on or before the scheduled COD.
- Track record of the timely receipt of annuities.

Negative factors – Factors that could lead to negative rating action/downgrade:

- Deterioration in the credit profile of the sponsor, IRCON, or counterparty, ie, NHAI.
- Delay in project progress including the achievement of project milestones, leading to levy of penalty by the NHAI, thereby affecting the financial risk profile.

Detailed description of the key rating drivers

Key rating strengths

CG from IRCON until the receipt of first annuity: The detailed rationale of the CG provider, IRCON, is available at the link: [Ircon International Limited](#). As per the CG, until the receipt of the first full annuity or 180 days from the COD, whichever is later, IRCON unconditionally and irrevocably guarantees to cover any event of default on the part of IBMEL towards debt servicing or compliance with any of the terms, conditions, and covenants contained in the facility agreements.

The guarantee stipulates that in the event of default by the borrower in repayment of the obligations, for the time being due and payable to the lender in respect of the facilities, the lender will invoke the guarantee immediately subsequent to the lapse of the cure period (if any) after the occurrence of an event of default at any time during the validity period. As per the facility agreement, the 'cure period' with respect to all the events of default is 60 days, except in case of a payment default on interest or principal wherein no cure period is to be provided to the borrower. Subsequent to the invocation, the guarantor will pay the amount of guaranteed obligations to the lender forthwith immediately upon invocation of the guarantee by the lender, failing which, the lender will be entitled to approach the court of law for legal recourse and to file a recovery suit against the guarantor, after serving them 15 days legal notice to pay or repay the guaranteed obligations.

With this limited-period guarantee, construction and other risks that may materialise until the commissioning of the project are supported by the guarantor, which is viewed as a comforting factor.

Favourable clauses of hybrid annuity concession: The CA – in line with the model CA for HAM projects – includes clauses that serve to partially secure the project and its lenders against construction risks, including delays in land acquisition. Such clauses include stipulating the achievement of at least 80% right of way (RoW) as a precedent condition for declaring the appointed date for the project. Besides, there is a provision for granting deemed completion of the project in case 100% of the work is completed on the RoW, which becomes available to the concessionaire within 180 days of the appointed date. In addition, stringent clauses for levy of damages, encashment of performance security, as well as the requirement of additional performance security in case of delay in execution due to reasons attributed to the concessionaire, act as significant disincentives against slippages in execution.

Low funding risk and permitted price escalation: The HAM model entails lower sponsor contribution during the construction period considering 40% construction support from the NHAI and the availability of 10% mobilisation advances on the BPC. The BPC and O&M cost will be inflation-indexed (through a price index multiple [PIM]), which is the weighted average of the wholesale price index (WPI) and consumer price index (CPI) in the ratio of 70:30. The inflation-indexed BPC protects the developers against price escalation to an extent.

Cash flow visibility: During the operational phase, cash flow is assured in the form of annuity payments from the NHAI on a semi-annual basis covering 60% of the project completion cost along with interest at an 'average of one-year MCLR of the top five scheduled commercial banks plus 1.25%' on the reducing balance and inflation-indexed O&M annuity.

Low counterparty credit risk: Incorporated by the GoI under an Act of the Parliament as a statutory body, the NHAI functions as the nodal agency for the development, maintenance, and management of the national highways in the country. The outlook on the NHAI reflects the outlook on the sovereign, whose direct and indirect support continues to be the key rating driver.

Demonstrated track record of IRCON in executing road projects: The company has entered into a fixed-price EPC contract with IRCON, which has executed nation-building infrastructure projects in the roads, buildings, electrical substation and distribution, airport construction, commercial complexes, metro, and railway segments. IRCON has successfully commissioned four road projects in the public-private partnership (PPP) mode and has over four decades of experience in the construction and infrastructure sector and is ably supported by a team of qualified engineers with significant expertise in road and highway construction.

Undertakings for meeting exigencies and proposed DSRA/MMRA: IRCON, as a sponsor, has extended an undertaking to the lenders to fund cost overruns beyond the budgeted cost and to arrange additional amounts and funds to mitigate any liability arising due to a change in the base case business plan or the assumptions made in the base case business plan, including any deficit in annuity payment on account of non-compliance of the maintenance obligations for the entire debt tenure.

Furthermore, as per the terms of the facility agreement, the company proposes to create and maintain a DSRA equivalent to the debt servicing requirement of three months of interest and one ensuing principal repayment upfront on the COD of the project. The facility agreement also stipulated the maintenance of an MMRA as per the base case business plan.

Key rating weaknesses

Inherent project execution risk: Notwithstanding the availability of about 83% of RoW and the demonstrated track record of IRCON as an EPC contractor in executing similar road projects, IBMEL is exposed to inherent construction risk attached to road projects. The company is yet to receive the appointed date and the project implementation works are yet to commence. Nevertheless, the demonstrated track record of IRCON as an EPC contractor in executing large-sized road projects mitigates the execution risk to an extent.

Inherent O&M risk associated with the project: While the inflation-indexed O&M annuity partly mitigates O&M risk, the disparate movement in the inflation index (70% WPI; 30% CPI) and the O&M cost poses a risk. Besides, the company can face the risk of a sharp increase in the O&M cost in the event of the wear and tear on the road or road facilities being more than the extent envisaged during the bidding and aggressive bidding in O&M cost. However, the presence of a sponsor undertaking to fund any deficit in annuity payment on account of non-compliance with the maintenance obligations by the borrower mitigates the O&M risk to an extent.

Inherent interest rate risk: IBMEL is exposed to inherent interest rate risk considering the floating rate of interest with a reset clause linked to the reset of spread every month. Although, the reimbursement of the interest cost in the form of interest annuity payable by the NHAI biannually at an interest rate equal to the average of one-year MCLR of the top five scheduled commercial banks plus the spread of 125 bps on 60% of the project completion cost (on the reducing balance), mitigates the risk arising in the earlier Cas due to the lag effect between the bank rate and the MCLR.

Liquidity: Adequate

For IBMEL: The financial closure for the project has been achieved. The company is awaiting the appointed date, post which, the execution of the project will commence. Furthermore, the various undertakings/CGs to fund any cost overruns for the project completion and O&M have been executed by the sponsor.

For IRCON: The detailed rationale of the CG provider, IRCON, is available at the link: [Ircon International Limited](#).

Analytical approach

Credit enhancement in the form of an unconditional and irrevocable CG by IRCON, which is valid until the receipt of the first full annuity or 180 days from the COD, whichever is later. Post the validity period of the CG, CARE Ratings Limited (CARE Ratings) has analysed the project on a standalone basis while factoring in the sponsor's undertaking and the strong linkages with IRCON.

Unsupported rating: Standalone, while factoring in the sponsor's undertaking and the track record of the EPC contractor.

About the company

IRCON (Guarantor): IRCON was incorporated in April 1976 as Indian Railway Construction Company Limited, mainly for the construction of railway projects in India and abroad. IRCON is a Miniratna Category-I PSU since 1998. It is a Central Government company under Section 617 of the Companies Act, 1956, with a 73.18% shareholding held by the GoI as on June 30, 2022. The company has diversified into roads, buildings, electrical substation and distribution, airport construction, commercial complexes, and metro segments, but mainly earns its revenue from the railway segment. It raised funds through an initial public offering (IPO) in September 2018 through an offer for sale and was listed on the Bombay Stock Exchange (BSE) and the National Stock Exchange (NSE) on September 28, 2018.

IBMEL: IBMEL, a special purpose vehicle (SPV) promoted by IRCON, has entered into a 15-year CA (excluding a construction period of 910 days from the appointed date) with the NHAI for the construction of an eight-lane access-controlled expressway from km 69.800 to km 79.783 (Bhoj to Morbe Section – SPUR of the Vadodara-Mumbai Expressway) in the state of Maharashtra on HAM basis under the Bharatmala Pariyojana (Phase-II Package-XVII). The BPC of the project excluding goods and services tax (GST) is ₹1,436 crore.

Brief financials

IBMEL: Not applicable, as the project is under the implementation phase.

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
