Ratings

Facilities/Instruments	Amount (₹ crore)	Rating ¹	Rating Action
Long Term Bank Facilities	270.17 (Enhanced from 261.54)	CARE A; Stable (Single A; Outlook: Stable)	Revised from CARE A-; Positive (Single A Minus; Outlook: Positive)
Short Term Bank Facilities	35.00	CARE A1 (A One)	Revised from CARE A2+ (A Two Plus)
Total Bank Facilities	305.17 (₹ Three Hundred Five Crore and Seventeen Lakhs Only)		

Details of instruments/facilities in Annexure-1.

Detailed rationale and key rating drivers

The revision in the ratings assigned to the bank facilities of Shaily Engineering Plastics Ltd. (SEPL) take into account healthy scale up of operations on back of successful completion of scheduled capex in carbon steel, plastic moulding and toy segment along with improvement in financial risk profile following equity infusion through preferential allotment during FY22 (refers to the period April 01 to March 31).

The ratings continue to derive strength from its established track record in the plastic injection moulding business, established relationship with reputed clientele across diverse end-use industries, its experienced promoters, growing demand for engineered plastic products and adequate liquidity.

The above rating strengths are, however, partially offset by SEPL's high customer and segmental concentration, its moderate bargaining power with its large sized customers and susceptibility of its profitability to raw material price volatility and exchange rate fluctuations.

Rating sensitivities

Positive factors – Factors that could lead to positive rating action/upgrade:

- Successful completion of ongoing capex along with scaling up of operations resulting in growth in its TOI to more than Rs.800 crore along with PBILDT margin of 18% on a sustained basis.
- Improvement in its ROCE beyond 20% on a sustained basis.
- Adequate level of segmental and customer diversification.

Negative factors – Factors that could lead to negative rating action/downgrade:

- Decline in its TOI to less than Rs.400 crore on the back of lower off-take by its key customers.
- Decline in its PBILDT margin below 14% on a sustained basis.
- Increase in working capital intensity resulting in elongation of working capital cycle beyond 90 days.

Detailed description of the key rating drivers

Key rating strengths

Sustained growth in scale of operations with stable profitability

SEPL reported substantial y-o-y growth of 58% in its TOI to Rs. 569.37 crore in FY22 (PY: Rs. 360.22 crore) on account of higher sales from home furnishing segment, increase in revenue contribution from the healthcare segment followed by scaling up of carbon steel and toys manufacturing business.

Further, SEPL is expected to record healthy volume growth in medium term on the back of healthy order book in carbon steel, healthcare and toy segment apart from continued growth momentum in home furnishing segment.

The PBILDT margin remains largely stable with marginal moderation of 160 bps to 15.05% in FY22 (PY: 16.65%) owing to susceptibility in the prices of crude oil and foreign exchange fluctuations. Nevertheless, the PAT margin remains stable at 6.17% (PY: 6.11%) and reported gross cash accruals of Rs. 64.47 crore in FY22 (PY: Rs. 44.18 crore).

Improvement in leverage and debt coverage indicators

SEPL's financial profile remained comfortable marked by improvement in the net worth and leverage position. The capital structure has shown improvement in FY22 with infusion of Rs.150 crore through preferential allotment resulting in improvement in overall gearing to 0.50 times as on March 31, 2022 (1.15 times as on March 31, 2021).

The debt coverage indicators improved and remained comfortable marked by interest coverage and total debt to GCA of 4.71 times and 2.78 years (PY: 4.43 times and 4.58 years) respectively.

The capital structure is expected to remain comfortable in the medium term as the company has envisaged to fund the ongoing capex for FY23-FY24 through equity infused during FY22 and internal accruals.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Experienced promoters with established track record of operations in plastic injection moulding

SEPL is managed by its promoter and Executive Chairman, Mr Mahendra Sanghvi, who has experience of over four decades in the plastic industry. His son, Mr. Amit Sanghvi, is the Managing Director of SEPL and has around a decade of industry experience. The promoters are actively supported by a team of professionals and eminent independent directors, who have a vast experience in pharmaceutical, finance, operations, etc. SEPL has an established track record of operations of around four decades and has developed a wide range of products in home furnishing, healthcare, FMCG, toys and automobiles segment.

Established relationship with reputed clientele across diverse end-use industries

SEPL has long-standing relationship with reputed global and domestic clients across a wide range of end-user industries. The company operates in the niche segment of precision moulding and caters to demand from global industry leaders in their respective segments. Furthermore, SEPL's is able to scale up its carbon steel business and toy segment following orders from two global manufacturers along with gradual growth in pharmaceutical segment.

Growing demand for plastic products with increased application in various industries

There has been rapid increase in consumption of plastic material in recent years on account of newer application areas for plastics such as automotive, rail, defence & aerospace, medical & healthcare, electrical & electronics, telecommunication, building & infrastructure, and furniture. In the domestic market as well, government's initiatives to boost investment in water & sanitation management, irrigation, building & construction and retail is expected to increase consumption of plastic products over the coming years.

Key Rating Weaknesses**High customer concentration with moderate bargaining power**

Home furnishing continues to be the largest segment for SEPL, contributing around 57% of its TOI in FY22 (FY21:61%). Moreover, it caters to a single industry player which leads to high customer concentration. Nevertheless, further increase in customer concentration risk due to commissioning of carbon-steel plant is offset by new clientele in toys segment, which contributed around 13% of SEPL's TOI during FY22 (Nil during FY21). While association with leading global and domestic players reduces counterparty credit risk, it restricts SEPL's bargaining power vis-à-vis its larger clients.

Susceptibility of profitability to raw material price volatility and exposure to foreign exchange rate fluctuations:

The key raw material of SEPL is a derivative of crude oil and hence its profitability is susceptible to any sharp volatility in crude oil prices. Though SEPL has cost pass-through mechanism with most of its customers, price revision happens only with a time lag. Also, SEPL's profitability is susceptible to fluctuation in foreign exchange rates to the extent of its net un-hedged position.

Implementation and stabilisation risk associated with on-going scheduled capex

SEPL is undertaking enhancement capex in pharmaceutical segment in FY23 of approximately Rs.110 crore to be funded entirely from the proceeds of preferential allotment. The said capacity is envisaged to commence commercial operations from Q1FY24 (refers to the period April 01 to June 30). SEPL has a healthy order book in the pharma division and plans to design and develop large no of Stock Keeping unit (SKU's) in the health care segment. The capex is envisaged to increase its scale of operations, improve overall operational efficiency and generate better profitability. However, SEPL's ability to scale up its operations and realize envisaged returns from its expanded capacity would remain crucial from the credit perspective.

Liquidity: Adequate

SEPL has adequate liquidity characterized by sufficient cushion in its cash accruals vis-à-vis its term debt repayment obligations and stable operating cycle of 73 days (FY21: 79 days) during FY22. Going forward, SEPL is expected to generate GCA of around Rs.71-97 crore which is sufficient to meet its capex requirement of around Rs.25 crore and schedule debt repayment of Rs.39 crore.

However, owing to increase in scale of operations the utilisation of fund based working capital borrowing remains high at 89% during the trailing 12-months ended May 2022 (76% in the trailing 12-months ended October 21).

Further, equity raised through preferential allotment was utilised to the tune of Rs.30 crore during FY22 towards funding of the ongoing capex and balance was parked partly in fixed deposit with banks and balance was deployed in working capital (reflected from lower level of year end utilisation which however was reinstated in the form of fixed deposits in April 2022 and is envisaged to be utilized in FY23).

About the company

Incorporated in 1980, Gujarat-based Shaily Engineering Plastics Limited (SEPL) is engaged in manufacturing of high precision injection moulded plastic components and sub-assemblies for various requirements of Original Equipment Manufacturers (OEM). It also offers secondary operations in plastics like vacuum metalizing, hot stamping and ultrasonic welding. The company caters to a wide range of industries including home furnishing, FMCG, pharmaceuticals, switchgear components, auto components, electronics and electrical appliances. SEPL is a two-star export house with an in-house Research & Development unit and its manufacturing facilities are located at Savli and Halol in Gujarat.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
