Commercial Paper	500.00	CARE A1+ (A One Plus)	Reaffirmed
Total Short-term Instruments	500.00 (₹ Five hundred crore only)		

Details of instruments/facilities in Annexure-1.

Detailed rationale and key rating drivers

The ratings assigned to the bank facilities and short-term instruments of CEAT Limited (CEAT) (part of the RPG Group) continue to factor in the long operational track and established market position with strong brand image in the domestic tyre industry coupled with diversified revenue with presence across all user segments and strong presence in replacement market aided by its wide, robust distribution network and long experience of the promoters. The ratings also factor in the recovery in revenue witnessed in FY22 and H1FY23, supported by higher realizations and volume growth following improved demand scenario post COVID-19, although high input prices and operating costs constrained the profitability margins. CEAT has been undertaking increase in realisation at periodic intervals across categories to counter commodity inflation. Although these were not enough to completely offset the cost pressures but partial hikes in realisations will limit the contraction in operating margin to a certain extent. Furthermore, the softening of the input prices recently is likely to result in improvement of margins going forward which will remain key monitorable. The impact of the reduced input prices over the last quarter should be visible Q3FY23 onwards.

The rating strengths are partially offset by moderate debt coverage indicators which are expected to remain moderate over the medium term due to low profitability and part debt-funded capex being undertaken which is expected to conclude by FY25. The debt coverage indicators are expected to improve thereafter as the expanded capacities and improved product mix would translate into expansion in its operating profits going forward. Furthermore, there is no project execution risk considering the advanced stage of the execution.

The ratings also factor vulnerability of CEAT's revenues to the cyclical nature in automotive demand and susceptibility of margins to the volatile raw material prices, both natural rubber and crude-linked derivatives, competitive nature of the industry and any change in government policy.

Rating sensitivities

Positive factors – Factors that could lead to positive rating action/upgrade:

- Substantial increase in the scale of operations, along with a significant improvement in the market share across product segment, leading to an improvement in the PBILDT margin over 13% on a sustained basis
- Total Debt to GCA below 1.85x on a sustained basis
- Improvement in ROCE above 20% on a sustained basis

Negative factors – Factors that could lead to negative rating action/downgrade:

- Sharp decline in revenue with loss in market share resulting in deterioration in PBILDT margin
- Total debt/PBILDT above 3.0 times on a sustained basis

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Detailed description of the key rating drivers

Key rating strengths

Experienced and established promoter group and proficient management:

CEAT belongs to the RPG group. The RPG group is a diversified conglomerate having business interests across diverse businesses like automotive tyres, infrastructure, information & technology, pharmaceuticals, plantations and power ancillaries. The group is headed by Harsh Vardhan Goenka while CEAT's day-to-day operations are headed by Anant Vardhan Goenka - Managing Director. Along with strong competent management team with long track record in the industry and the company has ensured maintenance of strong corporate governance practices and a prudent approach to management.

Established brand and wide distribution network:

CEAT is one of the leading tyre companies in the country with long track record of operations and well-established pan-India distribution network, enjoying a strong brand image. The company caters to the various user segments which include trucks and buses (T&B), light commercial vehicles, tractors, two-wheelers (2W) & three-wheelers (3W), passenger vehicles and off-road tyres. CEAT has a widespread distribution network spread across the country with more than 4,600 dealers and more than 600 exclusive CEAT Shoppes & CEAT Tyre service hub servicing over 45,000 sub-dealers.

Diversified revenue profile, replacement segment continues to contribute majorly:

The company's share of income from the replacement market continues to remain relatively high over the years. CEAT derives around 60% of its revenue from the replacement market which mitigates the risk related to vagaries of the auto industry to an extent. In H1FY23, around 53% of the revenue was contributed by replacement segment; with substantial share of revenue coming from the replacement market, risks arising out of the cyclical nature of the automobile industry are also relatively limited. The original equipment manufacturer (OEM) segment contributed 29% to the revenue in H1FY23 and around 19% of revenue came from export markets in H1FY23. CEAT has diversified into Exports that delivered a growth of 50% last year. The proportion of sales to OEM has increased on the back of reducing challenges pertaining to semi-conductor shortages. Over the years, the company has been gradually shifting focus from the lower-margin T&B/LCV segment to margin-accretive PC/UV/OHT segment and 2W segment. This is expected to boost profitability going forward.

Revenue growth supported by recovery in volumes, margins dipped but expected to improve going forward:

After two years of contraction, the Indian tyre industry has recovered well, resulting in improvement of CEAT's revenue which has grown y-o-y by 23% from ₹7,609 crore to ₹9,363 crore in FY22. The growth was driven by increase in realisation and volumes arising from increased demand across segments and also price hikes undertaken to counter rising input costs. Inherent to the tyre industry, raw material costs forms the largest cost head, accounting for around 60-65% of the total cost for CEAT. Higher input prices of key raw materials such as natural rubber, carbon black etc. have kept the margins under pressure. Other raw materials such as carbon black which is a derivative of crude also increased in line with increase in crude prices. CEAT's revenue has grown by 31% in H1FY23 vis-à-vis H1FY22. CEAT's PBILDT margin dipped from 13.39% in FY21 to 7.89% in FY22 and further down to 6.65% in H1FY23 due to high raw material prices, which has been mitigated to some extent via cost-cutting initiatives & regular price hikes. Although these are not enough to completely offset the cost pressures but these partial hikes in realisations will limit the contraction in operating margin to a certain extent. The prices of key raw material have softened in the recent past and the effect of the same shall be visible in the upcoming quarters.

Key rating weaknesses

Exposure to cyclicity in the automobile industry & current slowdown in export market:

The performance of tyre manufacturers is dependent on the performance of the automobile industry, which is cyclical in nature. Nevertheless, auto ancillaries which have a significant exposure to replacement market are insulated to an extent as the demand for the auto components in the replacement market is an indirect function of the growth posted by OEMs. Furthermore, diversified product portfolio and presence in the export markets mitigates this risk to an extent. Export demand may stay volatile for a few more quarters given the geopolitical uncertainties and weakening macroeconomic situation around inflation and recession fears across geographies. Recessionary pressure in US & Europe is likely to impact the demand.

Capex and low EBIDTA generation likely to result in moderate debt metrics:

CEAT has been undertaking capex over the last few years which is a part of their long-term expansionary plan from FY19-FY25 (estimated). Out of total planned capex of ₹4,000 crore (excluding maintenance capex), almost ₹3,300 crore has been incurred till September 30, 2022. Along with the expansionary capex, routine capex planned annually is ₹200-250 crore which shall be funded out of internal accruals. This would be towards debottlenecking activity, end-of-the-line automation and the development of sustainable energy sources. CEAT has adequate undrawn sanctioned limits from banks to incur the balance capex along with its own internal accruals.

To fund the expansionary capex, CEAT had availed additional term borrowing and further due to higher working capital requirement CEAT's Total debt has increased by ₹675 crore y-o-y from FY21 to FY22. Following spiralling input costs, accretion to reserves (retained earnings) dipped from ₹432 crore in FY21 to ₹71 crore in FY22. The above factors resulted in moderation of overall gearing to 0.66x as on March 31, 2022 (P.Y. 0.47x). Under the current scenario of inflationary environment, CARE Ratings Limited (CARE Ratings) expects the overall gearing to remain in the range of 0.65x - 0.70x for FY23. The improvement in debt metrics is likely to happen from FY24 onwards with newer facilities starting to scale up the company's operating EBIDTA and also on pace of normalisation of input prices.

Industry characterised by intense competition

The Indian tyre industry has witnessed intense competition between the domestic players and the Chinese tyre manufacturers. The level of competition by international players is significantly higher in the trucks and buses segment which is price sensitive. However, measures taken by the government like imposition of anti-dumping duty (implemented in September 2017) and anti-subsidy countervailing duty (implemented in July 2019) on tyre imports from China have helped the Indian tyre manufacturers. Diverse product offerings and strong focus on the replacement market have enabled the company to sustain the established market position. However recently there has been some increase in cheap imports from Thailand.

Liquidity: Strong

The liquidity profile of CEAT is strong as substantiated by the fact that it is expected to earn gross cash accruals of about ₹550 crore in FY23. As against that, CEAT has scheduled repayment obligations of ₹138 crore for FY23 which leaves adequate buffer. As on October 31, 2022, CEAT had average unutilised fund-based working capital limit averaging upto ₹330 crore. Furthermore, it has CP limits available of ₹500 crore out of which ₹100 crore is only outstanding. Thus mobilising funds on immediate basis for any exigency is not a challenge for CEAT. Although CEAT is utilising large portion of internal accruals to fund its capex requirements, debt repayments would get priority over capex funding and CEAT has already tied up with lenders for the entire debt. CEAT historically maintains modest cash balance which stood at ₹36 crore as on March 31, 2022.

Analytical approach

CARE Ratings has taken a consolidated approach in analysing the financials of CEAT. The list of companies which have been consolidated is presented in **Annexure 6**. CARE Ratings has taken consolidated approach owing to high degree of financial, managerial and business linkages between the entities.

About the company

Established in 1958, CEAT is flagship entity under the RPG group (Rama Prasad Goenka Group). The RPG group is a conglomerate having more than 15 companies catering to diverse businesses spanning across automotive tyres, infrastructure, information & technology, pharmaceuticals, plantations and power ancillaries. The RPG group acquired the company in 1982. CEAT is engaged in the manufacturing of tyres, tubes and flaps and it is one of the leading tyre manufacturers in the domestic market. Products manufactured find application in heavy-duty trucks and buses, light commercial vehicles, earthmovers, forklifts, tractors, trailers, cars, motorcycles and scooters as well as auto-rickshaws. It caters to demand from both OEMs and replacement market. Large part of its income is contributed from the replacement market.

In India, CEAT operates with six manufacturing units located at Mumbai, Nagpur, Nasik, Ambarnath (Maharashtra), Halol (Gujarat), Chennai (Tamil Nadu) and in Srilanka (through Joint Venture). Furthermore, CEAT has outsourced the production facilities of tyres to several third-party conversion agencies located at Hyderabad (Telangana) and Calicut (Kerala).

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
