*Details of instruments/facilities in Annexure-1*

### Detailed Rationale & Key Rating Drivers

The ratings, assigned to the Bank Facilities of Orient Paper and Industries Limited (OPIL) continue to draw strength from long experience of the promoters; OPIL being part of established C.K. Birla group, strong financial flexibility with conservative capital structure, strong debt protection matrix and availability of surplus liquid investments. The ratings, however continue to be constrained by modest scale of operation, moderation in financial performance of the company in FY20 (refers to the period from April 01 to March 31) and 9MFY21 due to significant decline in sales realizations and subdued demand of OPIL's products, volatility in raw material prices, cyclicity attached to the paper industry and project stabilization risk. The ratings also factor in the uncertainty regarding the timing of the on-going Covid-19 pandemic clearing out, which further impacted the 9MFY21 operational performance of the company and is likely to have an impact on the company's scale of operations and consequently the level of profits and cash accruals in current year. Sub-optimal utilization of assets is also likely to adversely impact the business returns of the company.

### Rating Sensitivities

#### **Positive Factors-Factors that could lead to positive rating action/upgrade:**

- Substantial growth in scale of operation
- Improvement in PBILDT margin above 15% and ROCE and RONW above 12% on a sustained basis.

#### **Negative Factors- Factors that could lead to negative rating action/downgrade:**

- Inability to improve the financial performance with reversal of operating loss in the coming quarters.
- Deterioration in cash & liquid investments below Rs.100 crore.

### Outlook: Negative

The outlook has been revised from 'Stable' to 'Negative' in view of expected weak performance of the Company due to significant decline in sales realizations and subdued demand scenario of tissue paper and Printing and Writing Paper (PWP). The outlook shall be revised to stable in case the OPIL's performance improves significantly with improvement in sales realization and pick up of demand leading to turnaround in its operations and consequent operating profit.

### Detailed description of the key rating drivers

#### Key Rating Strengths

##### **Established group with long experience of the promoters & managerial team**

OPIL, belonging to the C K Birla group, was incorporated in July, 1936. Shri C. K. Birla, at the helm of the affairs of the company, has been associated with the company since 1978. C.K. Birla group, established by late Shri B.M. Birla, is a leading industrial group of the country and has major interest in diverse range of products like automobiles, auto ancillary products, earthmoving equipment, engineering products, chemical, cement, paper, fan and consumer electrical items.

##### **Strong financial flexibility with conservative capital structure, strong debt protection matrix and availability of surplus liquid investments**

The Company has strong financial flexibility as evident from its high net worth base and low debt position and sound liquidity position. The overall gearing ratio stood at 0.03x as on March 31, 2020 and March 31, 2019. The interest coverage ratio, though deteriorated from 16.31x in FY19 to 9.90x in FY20 on account of decline in PBILDT level, remained comfortable. The interest

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE publications

coverage ratio, however, turned negative with operating loss in H1FY21. Total debt/GCA stood comfortable at 0.74x as on March 31, 2020.

OPIL holds investment in listed entities which had a market value of around Rs.145 crore as on March 31, 2020 which improved to approximately Rs.262.30 crore as on September 30, 2020. OPIL holds about 850 acres of land at Brajrajnagar, Odisha where its first paper factory was set up which is currently not in use and other land banks and investment properties in Delhi.

#### **Initiatives to improve operational efficiency**

The company has taken various & continuous initiatives to control cost & improve operational efficiency. In FY19, the company has got approval to create a concrete barrage on river Sone to ensure complete water security. Further in FY20, the company constructed a permanent RCC barrage to increase their water storage capacity to 4.546 million cubic meters, which is expected to eliminate the risk of water scarcity related plant stoppage in future. OPIL has planted 0.94 crore saplings in FY19. The total plantation area was 478 acres in FY19 and FY20.

#### **Key Rating Weaknesses**

##### **Moderation in financial performance in FY20 and 9MFY21**

During FY20, the total operating income registered de-growth of 15% on a y-o-y basis. The decline was mainly on account of decline in capacity utilization, subdued demand scenario for finished goods coupled with a pressure on average sales price realizations of finished products. The PBILDT margin of the company declined significantly to 8.43% in FY20 from 20.12% in FY19, due to increase in cost of raw material being pulpwood and bamboo, levy of electricity duty on own power consumption (which was exempted till December 2019) and decline in sales realization of PWP and TP. Consequently, the company reported profit of Rs.19.93crore in FY20 vis-à-vis Rs.101.65crore in FY19. GCA of the company declined to Rs.51.82crore (Rs.132.05crore in FY19) vis-à-vis debt repayment obligation of Rs.14.02crore in FY20.

In 9MFY21, TOI of the company reported de-growth of 39% vis-à-vis 9MFY20 due to significant decline in sales realizations and subdued demand of OPIL's products. As a result company incurred operating loss of Rs.38.67 crore in 9MFY21 as against operating profit of Rs.46.98 crore in 9MFY20. The net loss of the company stood at Rs.42.72 crore in 9MFY21 as against PAT of Rs.22.90 crore in 9MFY20. In view of the same, the overall performance for FY21 is expected to remain modest.

##### **Decline in Capacity Utilization (CU)**

The capacity utilization of the PWP and TP units deteriorated in FY20 to 71% as against 76% in FY19 (80% in FY20) due to decline in CU in Q4FY20. Break down in recovery boiler for 10 days, planned maintenance shut for 11 days and nation-wide lockdown from last week of March 2020 led to decline in CU in Q4FY20. The capacity utilization stood at 43% in H1FY21.

##### **Susceptibility of profitability to volatility in raw material prices**

Raw material is the single largest cost of paper manufactures. Though, the company is increasing its emphasis on development and plantation of clonal saplings, dependence of external wood/ bamboo supplies is still high thereby exposing the company to the risk of raw material availability and volatility in prices. Initiatives undertaken by the company towards farm forestry and captive plantations are expected to mitigate such risks to a greater extent over the medium to long term. Further, the company also experienced an unexpected increase in the cost of pulpwood, following NGO activism against the movement of wood in Madhya Pradesh during the Q2FY20 and Q3FY20, compelling the company to increase sourcing from distant locations, which, in turn, increased procurement costs. Any adverse change in the raw material prices which the company is not able to pass on to its customers will impact the profitability of the company.

##### **Threat from imports, though limited in tissue paper segment**

The threat of imports will keep domestic paper prices firm and the profitability is expected to be moderate. In this regard, ASEAN free trade agreement, which has been effective from January 2014, allows duty free paper imports into India from ASEAN countries. However, OPIL derives a significant share of its revenue from tissue paper and is one of the largest producers of tissue paper in India.

##### **Project stabilization risk with revised funding and implementation schedule**

OPIL is undergoing a capital expenditure of Rs.225crore for enhancement in its pulping capacity, ECF bleaching and new recovery boiler of higher efficiency. Due to disruption on account of COVID-19, the project implementation has been delayed by 1 year and revised commissioning date is March 2022. Furthermore, the project is expected to be financed through term loan of Rs.110crore and balance through internal accruals, revised from earlier plan of majority funding through internal accruals. The company has spent Rs.44crore till December 31, 2020 (out of internal accruals). However, until the capex is successfully implemented there exists a project stabilization risk, and risk of cost overrun due to delay in project implementation.

##### **Industry cyclicality & Outlook**

The Indian paper and paper industry has continued to witness steady growth in FY20, and the domestic demand grew from 9.3 million tonnes in FY08 to 18.6 million tonnes in FY20 at a CAGR of 6.4%. However, subdued and diverse trading conditions caused by geopolitical uncertainties including the current coronavirus outbreak have impacted the overall global demand. Further, the industry is grappling with weak demand, shortage of raw material and limited availability of labour, which is affecting capacity utilization. Demand for paper and cardboards to contract 10-15 per cent on-year, affecting all categories of products. The shutdown of schools, colleges and majority of offices has crimped demand for writing and printing (W&P) paper. Though pulp prices have come off their highs and waste paper prices have declined further, the raw material prices are

expected to remain stable. However, despite the eased out cost side pressures, the margins of the players are expected to be affected by subdued market conditions, lower realizations of finished goods, imports of finished paper and disruption in supply chain and production due to COVID-19.

**Liquidity: Strong**

GCA stood at Rs.53 crore in FY20 vis-à-vis low debt repayment obligations. OPIL has cash & investments in listed equity shares of Rs.152 crore as on March 31, 2020 as against Rs.265 crore as on September 30, 2020. In the current fiscal, though the absolute profits and cash accruals are expected to decline, the liquidity position is likely to remain comfortable, given the limited debt repayment. In FY21, the company has negligible debt repayment obligation of Rs.3.56crore, out of which company has repaid Rs.2.36 crore in H1FY21. Further, as confirmed by the banker and management, OPIL has not sought moratorium for its bank facilities from its lenders as part of the Covid-19 Regulatory Package announced by RBI. The average month-end utilization of fund-based facility for last 12 months ended December 31, 2020 stood at 48%. In view of cash loss of Rs.38 crore in 9MFY21 and continued subdued demand scenario, OPIL has availed term loan (Rs.50 crore) to meet any fund requirement.

### About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

#### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
