<b>Total Bank Facilities</b>	<b>64.43</b> <b>(Rs. Sixty-Four Crore and Forty-Three Lakhs Only)</b>		

*Details of instruments/facilities in Annexure-1*

### Detailed Rationale & Key Rating Drivers

The ratings assigned to the bank facilities of Talbro Engineering Limited (TEL) continue to derive strength from the experienced promoters along with their long track record of operations, and reputed customer-base by virtue of their strong association and long-standing relationship with Original Equipment Manufacturers (OEMs) including Mahindra and Mahindra Limited among others. The rating also favorably factors in TEL's market position in axle shafts for the utility vehicles segment, growing traction from the export market, improvement in the profitability margins and comfortable financial risk profile characterized by low overall gearing and healthy debt coverage indicators.

However, the ratings continue to remain constrained by modest scale of operations, customer concentration risk, susceptibility of margins to volatility in raw material prices and dependence on the fortunes and cyclical nature of the auto industry.

### Rating Sensitivities

*Positive Factors - Factors that could lead to positive rating action/upgrade:*

- Sustained improvement in the top-line along with sustenance of profitability with growing business from exports.
- Ability to maintain the overall gearing at current levels after factoring in the planned debt-funded capex in a phased manner.

*Negative Factors- Factors that could lead to negative rating action/downgrade:*

- Decline in the Total Operating Income below Rs.165 crores with low profitability on a sustained basis.
- High reliance on debt to fund large capex and increase in working capital borrowings leading to moderation in overall gearing of more than 1.20x.

### Outlook: Positive

The revision in the outlook of Talbro Engineering Limited from 'negative' to 'positive' reflects the faster than envisaged recovery in operational performance backed by buoyant demand in the automotive industry. Furthermore, the rating outlook revision to positive reflects CARE's expectation of improved scale and profitability of the company in the near to medium term. The outlook may be revised to Stable in case of lower than envisaged improvement in sales and profitability, going forward.

### Detailed description of the key rating drivers

#### Key Rating Strengths

##### ***Long track record of operations with experienced and resourceful promoters***

TEL has a long track-record of operations dating back to 1980 and was earlier part of the erstwhile Talbro Group. The Talbro Group was founded in 1930s by Talwar family and has been into manufacturing of automotive components since 1957. The key managerial personnel of TEL - Mr. Rajesh Talwar, President and Mr. Tarun Talwar, Chief Operating Officer have a vast experience in the automotive and engineering industry and are actively involved in the day-today operations of the company. The promoters have supported the company with infusion of unsecured loans which stood at Rs.14.63 crore as on March 30, 2021 (Rs.11.97 crore as on March 31, 2020).

##### ***Reputed customer base with established relationship albeit concentrated***

TEL has an established relationship with leading auto manufacturers and the company is the TIER-1 vendor to these OEMs dealing with them from the past 15 years. Its top revenue contributors are well established players who enjoy a strong market position in the industry. The company derives major share of its revenue from Mahindra and Mahindra Limited, which contributed ~38% to the total gross sales in FY21 (*refers to the period from April 01 2020 to March 31 2021*) (PY:44% of its total

gross sales) with top-5 customers contributing around 83% to its top-line during FY21 (PY: 82%), thereby exposing the company to customer concentration risk. However, the same is mitigated to an extent as the company is the sole supplier of rear axle shafts to most of its customers for their specific models.

#### ***Diversified segment base***

The company caters to the axle requirements of varied segments, thereby insulating it from the volatility in any one segment. The company derives major share of its revenue from the Utility Vehicles segment (contributed 49% to the total gross sales during FY21; PY: 55%) followed by Commercial Vehicle segment (contributed 19% to the total gross sales during FY21; PY: 19%) and tractors segment (contributed 7% to the total gross sales during FY21; PY: 5%) in the domestic market. Further, the company also has presence into the exports (primarily replacement market) which contributed around 25% to the total gross sales during FY21 (PY: 21%), thereby also leading to geographical diversification.

#### ***Improved operational performance***

The profitability margins of the company stood comfortable. The PBILDT margin improved by 254 bps and stood at 11.79% during FY21 (PY: 9.24%) driven by change in the sales composition towards high margin export business. Further, the PAT margin also improved and stood at 4.45% during FY21 as against 1.80% during FY20 due to the reduction in finance cost.

**Q1FY22 (refers to the period from April 01, 2021 to June 30, 2021) Performance:** The company reported total operating income of Rs.67.54 crore during Q1FY22 as against Rs.16 crore during Q1FY21. The improvement is backed by the fact that Q1FY21 was an exceptional period due to the nation-wide lockdown. The PBILDT margin remained almost stable at 12.20% during Q1FY22 (Q1FY21: 12.75%). Further, in comparison to the Q1FY20 top-line of Rs.61.14 crore, the company recorded around 10% growth in Q1FY22.

#### ***Comfortable Financial Risk Profile***

The overall gearing of TEL stood comfortable at 0.71x as on March 31,2021 (PY: 0.79x). The same improved marginally due to the repayment of long-term debt vis-à-vis the increase in the net-worth base due to the accretion of profits and infusion of funds by the promoters in the form of subordinated debt. With improvement in profitability, the debt coverage indicators also stood comfortable. The interest coverage ratio and total debt to GCA stood at 4.82x and 3.30x as on March 31,2021 respectively (PY: 2.79x and 4.60x respectively).

#### ***Key Rating Weaknesses***

##### ***Modest scale of operations however albeit growing***

Though, the scale of operations of the company remained modest however, the same reported y-o-y growth by ~10% to Rs.239.21 crore during FY21. The same was due to the better realizations with increase in the proportion of sales from the export market (contributed ~25% to the sales during FY21 as against ~21% in the previous year) and increased share of business with one of the key customers.

##### ***Low bargaining power with customers and susceptibility of margins to volatility in raw material prices***

Though there exists limited bargaining power with the customers, since the major customers are auto companies/OEMs, however, the company does have a mechanism wherein any revision beyond the given threshold limit in the raw material prices, is reset by the OEMs on monthly basis. The major raw material (Steel) cost accounts for around 53% of total cost of sales in FY21 (PY: 54%), furthermore, global prices for Steel are volatile which exposes TEL to price risk.

#### ***Industry Prospects***

The automobile industry is cyclical in nature and automotive component suppliers' sales are directly linked to sales of auto OEMs. Furthermore, the auto-ancillary industry is competitive with the presence of many players in the organized as well as unorganized sector. While the organized segment majorly caters to the OEM segment, the unorganized segment mainly caters to the replacement market and to tier II and III suppliers.

As per CARE research, considering the normal and optimistic scenario for the industry, the Passenger Vehicle segment (comprising of Passenger Cars, Utility Vehicles and Vans) is expected to grow in the range of ~12-17% in FY22. Over the ten years between FY11 and FY21, the UV segment have witnessed good growth of 12.9% CAGR. UV, as a share of PV, has increased from 12.6% in FY11 to 39.1% in FY21. This growth in UV is driven by increased customer preference for UV styled vehicles and a shift from compact cars to compact UVs.

The demand-supply imbalance has been created in the industry due to the supply-side disruptions caused by the shortage of semiconductors, which find application in the automotive industry. Chips are used in some of the models of SUVs/UVs, where TEL is expected to incur marginal loss of domestic OEM sales. However, the loss of domestic sales is expected to be compensated with the increasing export sales. Exports increased by ~44% to Rs.9.2 cr. in Aug,2021 from Rs.6.4 cr. in FY20.

Liquidity: Adequate

The company has adequate liquidity as characterized by sufficient cushion in expected gross cash accruals of Rs.23.20 crore vis-à-vis repayment obligations of Rs.6.24 crore during FY22 and modest cash and bank balance of Rs.3.74 crores as on March 31, 2021. Going forward, the company has planned to avail capex of Rs.40 crore in FY22 and FY23 for capacity enhancements primarily to cater to growing export demand, out of which Rs.8 crore would be routine in nature and for the same, the company has sufficient headroom to raise debt going forward with comfortable capital structure having an overall gearing below 1x. Its bank limits are utilized to the extent of 75% for the past twelve months ending June 30, 2021 and has above unity current ratio.

**About CARE Ratings:**

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

**Disclaimer**

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
