

Kerala Agro Machinery Corporation Limited

January 17, 2023

Facilities/Instruments	Amount (₹ crore)	Rating ¹	Rating Action
Long-term bank facilities	40.00	CARE BBB; Stable	Assigned
Short-term bank facilities	2.00	CARE A3+	Assigned

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The ratings assigned to the bank facilities of Kerala Agro Machinery Corporation Limited (KAMCO) draw comfort from experienced management with Government of Kerala undertaking and long track record of operations, established dealer network, comfortable capital structure and satisfactory debt coverage indicators. The ratings are, however, constrained by thin profitability margin, elongated collection period and competition from various unorganised and organised players.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Improvement in the scale of operations as marked by the total operating income (TOI) of above ₹300 crore with PBILDT margin of 6% on a sustained basis
- Improvement in the collection period of the company below 90 days.

Negative factors

- Decline in the scale of operations below ₹150 crore and decline in the PBILDT margin below 2%, respectively, on a sustained basis.
- Any large debt-funded capex leading to moderation in the overall gearing above 0.5x.

Analytical approach: Standalone

Key strengths

Experienced management team

KAMCO is 100% owned by Government of Kerala (GoK) and has been in the business of Agriculture Machinery for over four decades. Suresh Raj K.P is the chairman of KAMCO and has more than a decade of experience in the manufacturing of agricultural machinery. The management also consists of experienced directors appointed by the GoK.

Long track record of operations in the field of agricultural equipment manufacturing

KAMCO has over four decades of experience in manufacturing agricultural machinery and equipment. KAMCO has been exhibiting steady growth in the revenue from ₹156 crore in FY18 (refers to the period April 1 to March 31) to ₹220 crore in FY22 with compounded annual growth rate (CAGR) of 7.1%. KAMCO currently has six manufacturing units with installed capacity for tiller of 12,500 units, reapers with 3600 units and brush cutter with 1500 unit per year. KAMCO has established relationship with small and medium scale industries, which supply raw materials for critical components. The capacity utilisation of machinery stood in the range of 90%-100% for past three years ended FY22.

Comfortable capital structure and debt coverage metrics

The capital structure of the company is comfortable with overall gearing of 0.15x as on March 31, 2022 (PY: Nil). KAMCO was debt free since inception till the end of FY21. The company started to avail working capital from bank from FY22 and it does not have any long-term borrowings as on date. The debt coverage indicators stood comfortable with interest coverage of 32.89x in FY22. The company also receives periodic support from GoK in the form of grants, which further solidifies their capital.

Well-established dealer network

KAMCO has market presence throughout the country with the help of around 80 dealers. KAMCO generates majority of its revenue from north and north-eastern states like Assam, West Bengal, Tripura, etc., which was well supported by their dealers.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

KAMCO also provides its products to the Government agencies present around the country. The top five customers of KAMCO contributed around 22% in FY22 (PY: 32%).

Key weaknesses

Thin profitability margins susceptible to overhead costs and lower price

The PBILDT margins of KAMCO are thin due to the assembling nature of operations and are also constrained by comparatively lower market price of the products amidst fixed overhead costs. KAMCO is a GoK-owned company focused on to aid the farmers by providing agricultural equipment and related machineries in low price compared to other industry players. The PBILDT margins for past five years ended FY22 stood in the range of 0.60%-2.90%.

Elongated working capital cycle susceptible to subsidy-based collection method

The working capital cycle of KAMCO is elongated with high level of receivables. The receivables are higher on account of delayed payment by dealers who in turn depends on the subsidies from the respective Governments. The dealers sell the products of KAMCO under subsidised price for which they will be compensated by the Government. This subsidy collection was further impacted during the period of COVID-19 thus increasing the collection period from 137 days in FY19 to 168 days in FY22. The receivables more than 6 months also increased from ₹17.15 crore (18% of total receivables) as on March 31, 2021 to ₹40.75 crore (37% of the total receivables) as on March 31, 2022.

Intense competition from various organised and unorganised players and seasonal nature of business

KAMCO operates in highly competitive environment consisting of many unorganised players, on account of low entry barriers and low capital requirement to set up operations of manufacturing agricultural implements. Furthermore, the company has competition from other established players as well. The company's major sales take place, mainly in the second half of the financial year when crop harvesting is done in north and central region, which forms majority of its sales thereby making its business operations seasonal in nature. Furthermore, the agro-based industry can be adversely affected by climatic conditions. The monsoon has a huge bearing on crop availability, which determines the demand for the products of KAMCO.

Industry outlook and prospects

The increase in mechanisation of farming activities across the agricultural value chain, such as ploughing, harrowing, planting, harvesting, and tilling are all expected to boost the demand for agriculture equipment, which in turn drives the growth of the global agriculture equipment industry. Moreover, the implementation of precision farming in the near future will enable increased sustainability in farming activities, thereby increasing profitability, and protecting land resources. This is bound to bring in improved agricultural production essentially required to feed the growing global population and increased food cultivation. CARE Ratings expects this upsurge to bolster the demand for agriculture equipment and the growth in the agriculture equipment market

Liquidity: Adequate

The liquidity position of the company remained adequate with Nil long-term debt obligations. The company has free cash balance of ₹18.74 crore as on March 31, 2022 against ₹23.27 crore on March 31, 2021. KAMCO has working capital limits of ₹40 crore and the average utilisation of its working capital limits stood around 93.50% for the past 12 month period ending November 2022. The current ratio stood comfortable at 2.60x (PY: 2.84x) as on March 31, 2022.

About the company

Kerala Agro Machinery Corporation Limited (KAMCO) was established in the year 1973 as a wholly-owned subsidiary of Kerala Agro Industries Corporation Ltd. (KAIC), Trivandrum, a central government and state government joint venture, which promotes agro-based industries in Kerala by manufacturing farm equipment, machinery and implements required for mechanised farming. Subsequently, KAMCO became a separate Government of Kerala (GoK) undertaking in 1986. At present, 100% stake of the company is held by GoK. KAMCO is involved in the manufacture of agricultural machinery, specifically power

tillers and diesel engines. The head office and first manufacturing unit of KAMCO is located at Athani in Ernakulam District of Kerala. Currently, KAMCO has six manufacturing units in Kerala.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
