Ratings

Facilities/Instruments	Amount (₹ crore)	Rating ¹	Rating Action
Long Term Bank Facilities	11.00	CARE BB+; Stable; ISSUER NOT COOPERATING*	Rating continues to remain under ISSUER NOT COOPERATING category and Revised from CARE BBB; Stable; (Triple B; Outlook: Stable)
Short Term Bank Facilities	15.00	CARE A4+; ISSUER NOT COOPERATING*	Rating continues to remain under ISSUER NOT COOPERATING category and Revised from CARE A2; (A Two)

Rationale and key rating drivers

CARE Ratings Ltd. had, vide its press release dated July 19, 2022 placed the ratings of Oceanic Pharmachem Private Limited (OPPL) under the 'issuer not cooperating' category as the company had not provided 'No Default Statement' (NDS) for three consecutive months i.e. Apr-22, May-22 and Jun-22 as agreed to in its Rating Agreement. OPPL continues to be non-cooperative. The rating on OPPL's bank facilities will now be denoted as CARE BB+; Stable; ISSUER NOT COOPERATING* / CARE A4+; ISSUER NOT COOPERATING*.

Users of this rating (including investors, lenders and the public at large) are hence requested to exercise caution while using the above rating(s).

Analytical approach: Standalone

At the time of last rating on July 19, 2022, the following were the rating strengths and weaknesses:

Key Rating Strengths

Long track record of operations coupled with highly experienced promoters in outsourced manufacturing of organic & inorganic chemicals

The overall operations of OPPL are looked after by the promoters – Mr. Jayesh Shah along with his son Mr. Bhavik Shah and daughter Mrs. Bansari Mehta, who possess a total experience of over 41 years, 16 years and 13 years respectively in the field of outsourced manufacturing of organic & inorganic chemicals. Prior to the establishment of this firm, Mr. Jayesh Shah was involved in trading of pharmaceutical products in an entity established by himself, whereas Mr. Bhavik Shah, an M.B.A. in Marketing and Mrs. Bansari Mehta have gained their requisite experience in the due course of their association with OPPL. Hence, the extensive experience of the promoters enables them to establish strong marketing connects and production process excellence for OPPL.

Established relationship with reputed & diversified clientele coupled with wide geographical reach

The customers of OPPL comprise various reputed originators, traders, pharmaceutical & generic companies, etc., whereas the clientele profile of the company is highly diversified comprising over 200 customers all over the globe. The products of the company are sold to 52 countries across various geographies viz. Asia (comprising ~75% of the annual revenues, of which ~50% comprises Japan), USA (8-10%), Africa (~5%) and the balance comprises Europe, thereby signifying wide geographical reach.

However, the company has not shared the details of its customers and suppliers due to NDA agreements signed amongst them. Customers are primarily originators, traders, API manufactures and suppliers are the manufacturers of products viz. APIs, veterinary products, impurities, bulk drug intermediates, specialty chemicals, pellets, DC granules, herbal extracts, finished formulations, cosmetics, antioxidant products, etc. with whom the company signs exclusivity agreements for manufacturing of its products.

Healthy financial risk profile marked by comfortable capital structure & debt coverage indicators

OPPL's financial risk profile is marked by comfortable capital structure with overall gearing at 0.23x as on March 31, 2021 (PY: 0.38x). OPPL's debt profile includes unsecured loans from related parties and working capital limits from lender. The company

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

does not have any term loans from lenders. Going forward, capital structure is expected to remain comfortable with no capex required by the company.

Debt coverage indicators continues to remain healthy for FY21 with interest coverage at 6.16x (PY: 3.85x) and Total debt to cash accruals at 1.12x (PY: 2.87x). improvement in debt coverage indicators is primarily driven by improvement in operating performance of the company. Going forward, debt coverage indicators are expected to remain healthy with expectations of similar operating performance by OPPL in near term.

Key Rating Weaknesses

Modest scale of operations; healthy operating margins

During FY21, OPPL's scale of operations improved by 27% to Rs.160 crore driven by favorable business environment for pharmaceuticals. The company has primarily taken advantage of scarcity of material during COVID lockdown. Till February, 2022, OPPL has registered turnover of Rs.150 crore. Despite improvement in turnover, OPPL's scale of operations continues to remain modest.

OPPL has outsourced its manufacturing to domestic players. The company has inhouse R&D unit for development of custom synthesis. The company also develops synthesis as per specifications given by its clients. Thus, company derive better margin for its expertise in synthesis and API formulations. Operating margins improved to 14.07% for FY21 (PY: 11.15%) on account of economies of scale. Consequently, PAT margin and cash accruals improved from 5.58% and Rs.7.63 crore for FY20 to 8.15% and Rs.14.34 crore for FY21, respectively.

Working capital intensive nature of operations

During FY21, OPPL's average collection period deteriorated marginally from 28 days in FY20 to 39 days in FY21. Further, creditor period declined from 22 days in FY20 to 12 days in FY21. Thus, leading to deterioration in operating cycle from 14 days in FY20 to 35 days in FY21. Since OPPL has outsourced its manufacturing activity and has order-based operations, it does not maintain any major inventory except for stock-in-trade. OPPL relies on unsecured funds from related parties to meet its incremental working capital needs and has lower dependence on working capital limits from lenders. Thus, overall operations of the company remain working capital intensive. OPPL's cash flow from operations turned negative on account of increased debtors as on March 31, 2021.

Susceptibility of profit margins to volatility in the material prices of API & specialty chemicals

The profit margins of OPPL are fluctuating in nature, since the same are susceptible to volatility in prices of the variety of pharmaceutical products, especially the APIs and specialty chemicals; since they vary as per the requirements of the customers.

Foreign exchange fluctuation & geopolitical risks

OPPL is exposed to foreign exchange fluctuation risk, since almost entire of its annual revenues are derived from the exports, whereas the transactions are dealt in USD, YEN and EUR. However, the said risk is mitigated to an extent, given the weaker rupee against the aforementioned currencies. Moreover, the company also enjoys a forward contract limit worth Rs.100 crore from the bank to hedge the foreign exchange exposure. Nevertheless, the foreign exchange fluctuation risk continues to persist due to timing differences in sales and payments. Moreover, the company also exposed to geopolitical risk as the entire revenue derived from export market and hence, any regulatory changes in the export regions will directly impact on the revenue stream of the company.

Presence in regulated industry with risks associated to R&D activities

OPPL operates in highly regulated pharmaceuticals industry with presence of high entry barriers. Moreover, the company is a part of various projects with innovators in pharmaceutical & chemical industries, which are at various stages of R&D, the revenues from which shall translate only on commercialization. Hence, the company is exposed to risks associated to R&D activities, since revenues & profitability of the products are highly dependent upon the commercialization of the same.

Liquidity: Strong

OPPL's liquidity profile is marked by healthy cash and bank balance of Rs.6.61 crore and current ratio at 6.50x as on March 31, 2021. OPPL's working capital limits are utilized with an average of 10% for 12-month period ending in February, 2022. Currently, company's incremental working capital requirement is met by internal accruals and unsecured loans from related parties with low reliance on working capital limits from banks. Hence, providing sufficient cushion to utilize bank limits in case of further requirement of working capital funds. The company does not have any term loans and has no plans of debt-funded capex in near term. Thus, company's liquidity profile remains strong for near term.

About the Company

Established as a partnership firm by Mr. Jayesh Shah in 1987, Oceanic Pharmachem Private Limited (OPPL) was later converted into a private limited company in 1997. The company is an ISO 9001:2015-certified company, also certified as a 2-star export house by DGFT (Directorate General of Foreign Trade), and is engaged in exporting of various organic & inorganic chemicals which find a wide range of applications in pharmaceuticals, agrochemicals, cosmetics, herbal products, etc. The product portfolio of the company comprises APIs (Active Pharmaceutical Ingredients), veterinary products, impurities, bulk drug intermediates, specialty chemicals, pellets, DC (directly compressible) granules, herbal extracts, finished formulations, cosmetics, antioxidant products, etc. It also does custom synthesis focusing on process optimization and new method development with R&D and pilot plant-scale capabilities, wherein on a need-based module, it develops method & synthesis compounds as per the desired specification provided by the customers. Moreover, it also conducts research on patented drugs going off-patent, including literature surveys and root synthesis. Furthermore, the company also conducts plant audits and finds outsourcing partners for pharmaceutical companies. The products dealt with by the company are sold to 52 countries across various continents viz. Asia, Africa, Americas and Europe, whereas the customers comprise various reputed originators, traders, pharmaceutical & generic companies, etc. The company outsources the manufacturing to domestic manufacturers by signing exclusivity agreements with various manufacturers across India. The company provides technical knowhow and other related technical assistance for manufacturing the said product as ordered by the company's customers.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
