

## LONE CYPRESS VENTURES PRIVATE LIMITED

November 18, 2022

### Rating

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term Bank Facilities	129.42	CARE A; Stable (Single A; Outlook: Stable )	Assigned
<b>Total Bank Facilities</b>	<b>129.42</b> <b>(₹ One Hundred Twenty-Nine Crore and Forty-Two Lakhs Only)</b>		

Details of instruments/facilities in Annexure-1.

### Detailed rationale and key rating drivers

The rating assigned to the bank facilities of 30 MW (AC) solar power project of Lone Cypress Ventures Private Limited (LCVPL) factors in the strong parentage by virtue of LCVPL being a subsidiary of SunSource Energy Private Limited (SSEPL), wherein SHV Energy N.V. (SHVE) is the major shareholder. SSEPL has demonstrated strong support philosophy for this project as exhibited by the presence of limited period corporate guarantee extended to LCVPL. The rating also draws comfort from the presence of long-term power purchase agreements (PPA) for the entire capacity at a weighted average tariff of Rs 3.77/unit with reputed corporate customers having strong credit profiles. Further, the presence of enabling clauses such as lock in period and compensation to the developer in case of an early exit by the customer act as necessary safeguards. Going forward, as per Care Ratings' base case scenario, the debt protection metrics are expected to be comfortable as reflected by average Debt Service Coverage Ratio (DSCR) being upwards of 1.30x for the tenor of the rated facility.

The rating is, however, constrained on account of limited track record of operations with part capacity (10 MW) achieving commissioning in March 2022 and remaining capacity (20 MW) in July 2022. Further, CARE Ratings also notes that the Long Term Open Access (LTOA) approvals are pending for 10 MW capacity and the company has been selling the power generated through energy exchanges. Also, the rating is adversely impacted due to the expected capital structure being leveraged for the entity. Given the high proportion of debt in the project the company will be exposed to interest rate fluctuation risk given the rate of interest being floating in nature. CARE Ratings also factors in exposure of project cash flows to adverse variations in weather conditions given the single part tariff for the project.

### Rating sensitivities

#### Positive factors – Factors that could lead to positive rating action/upgrade:

- Actual generation levels being in line with estimated P 90 figures along with receivable cycle remaining below 60 days on a sustained basis resulting in strong liquidity position
- Significant reduction in the leverage level of the project
- Improvement in credit profile of parent

#### Negative factors – Factors that could lead to negative rating action/downgrade:

- Any significant underperformance in generation and/or any increase in the debt levels of the entity thereby weakening the cumulative DSCR on project debt to less than 1.20x times, on a sustained basis
- Non-adherence to the power purchase agreement (PPA) terms by the off-takers including timely receipt of payments and honouring of tariff for full PPA tenor
- Any weakening of the credit profile of the parent, i.e., SSEPL, or any change in linkages/support philosophy between the parent towards LCVPL would be a negative factor.

## Detailed description of the key rating drivers

### Key rating strengths

#### **Strong parentage and operating track record of SunSource Group in renewable energy segment**

SSEPL is engaged in development of various kinds of solar projects. The company has been in the solar energy business since 2010 and has gradually built-up assets via organic route through its various SPVs. Over the years, the company has expanded its portfolio to nearly 65 MW capacity as on February 2022 end, with projects spread across the country in multiple states including Rajasthan, Uttar Pradesh, Karnataka, Haryana, New Delhi, Maharashtra, Tamil Nadu, and Madhya Pradesh.

SSEPL is part of the SHV Energy group which is based out of Netherlands and has management control over SSEPL with majority representation on the latter's board and is involved in all strategic decision making of the company. SHVE has also provided equity commitment of Rs. 370 crores to grow the group's solar portfolio to around 550 MW by FY24 end, out of which SSEPL has already received Rs. 250 crores as on October 31<sup>st</sup>, 2022. Further, SSEPL has demonstrated strong support philosophy for this project as exhibited by the presence of limited period corporate guarantee extended to LCVPL. The Corporate Guarantee would be valid till a minimum of 24 months from commissioning apart from creation of security and Debt Service Reserve Account (DSRA) in favour of the project lender.

#### **Revenue visibility due to the presence of long term PPAs with strong counterparties**

LCVPL has entered into long term (25 years) PPAs for the entire capacity with reputed corporate customers having strong credit profile at a weighted average tariff of Rs 3.77/unit for the entire capacity. Further the company is selling power under the 'Group Captive' mechanism wherein open access charges such as cross subsidy surcharge (CSS) and additional surcharge (AS) are not applicable thereby making the power sold more competitive. Moreover, the presence of enabling clauses such as lock in period and compensation to the developer in case of an early exit by the customer act as the necessary safeguards.

#### **Comfortable debt protection metrics**

LCVPL has comfortable debt-protection metrics as reflected by average DSCR being upwards of 1.3x for the tenure of the rated facility. Right now, the project has been funded through promoter's equity and debt taken at the holdco level. Once the project loan is disbursed, the holdco loan would be repaid. As a part of pre-disbursement conditions, the project has to create an upfront DSRA of one quarter and the second quarter through cash flow proceeds. The upfront presence of DSRA will provide comfort from a credit perspective.

#### **Industry Outlook**

India has an installed renewable capacity of ~110 GW (excluding large hydro) as on March 31, 2022, comprising solar power of 54 GW, wind power of 40 GW, small hydro of 5 GW and other sources including biomass of 11 GW. There has been a significant traction in solar power installations over the last few years and the cumulative solar power capacity has surpassed the installed wind power capacity, despite its late and slow start. The overall renewable energy installations have increased at a CAGR of 17% from FY16-FY22. Over the years renewable energy industry has benefitted on account of Government's strong policy support, India's large untapped potential, presence of creditworthy central nodal agencies as intermediary procurers and improvement in tariff competitiveness. Going forward, with India setting up an ambitious target of achieving 450-GW renewable capacity by 2030, the regulatory framework is expected to remain supportive. However, developers are expected to face challenges in the near term on account of rising cost of modules, turbines and other ancillary products along with imposition of basic custom duty on cells and modules from April 2022 onwards which is expected to drive up costs and result in increase in bid tariffs for new projects. This apart, challenges for acquisition of land and availability of transmission infrastructure also remains a key bottleneck. However, the Indian renewable industry continues to be a preferred investment alternative for both domestic as well as foreign investors and is expected to post robust growth going forward as well which results in CARE Ratings Ltd assigning a Stable outlook to the industry.

### Key rating weaknesses

#### **Limited track record of operations**

LCVPL has limited track record of operations with part capacity (10 MW) achieving commissioning in March 2022 and remaining capacity (20 MW) in July 2022. Further, CARE Ratings also notes that the LTOA approvals are pending for 10 MW capacity and the company has been selling the power generated through energy exchanges. Going forward, achievement of envisaged generation levels would be critical from a cash flow perspective.

### Expected capital structure for the project being leveraged along with exposure to interest rate risk

LCVPL's capital structure is expected to be leveraged post the drawdown of the project debt. As per CARE Ratings' base case, gearing and Total Debt/EBITDA for FY24 is expected to be 2.3x and 6.0x respectively. Given the high proportion of debt in the project the company will be exposed to interest rate fluctuation risk given the rate of interest being floating in nature.

### Vulnerability of cash flows to variation in weather conditions

As tariffs are one part in nature, the company may book lesser revenues in the event of non-generation of power due to variation in weather conditions and/or equipment quality. This, in turn, would affect its cash flows and debt servicing ability

### Liquidity: Adequate

As on September 30th, 2022, the company had a cash balance of Rs. 3.15 crores. Going forward, CARE Ratings expects the generation levels to remain in line with P90 estimates and collection to remain timely as per the PPA norms. The internal accruals are expected to remain adequate to service its debt obligations. As per CARE Ratings' base case, GCA for FY23 and FY24 is expected to be ~Rs. 7-8 crore as against no repayment in FY23 and annual repayment of Rs 4.5 crores in FY24.

**Analytical approach:** Standalone plus factoring in parent support

### About the company

LCVPL is a special purpose vehicle (SPV) promoted by SunSource Group. The SPV is operating a 30 MW (AC) solar capacity in the state of Uttar Pradesh. It commissioned part capacity (10 MW AC) in March 2022 and remaining capacity (20 MW AC) in July 2022. LCVPL has signed long term PPAs with multiple corporate customers under the group captive scheme at a weighted average tariff of Rs 3.77/unit for the tenor of the PPA.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
