Non-convertible debentures	1,145.00	CARE AAA; Stable (Triple A; Outlook: Stable)	Reaffirmed
<b>Total long-term instruments</b>	<b>1,145.00</b> <b>(₹ One thousand one hundred forty-five crore only)</b>		

Details of instruments/facilities in Annexure-1.

### Detailed rationale and key rating drivers

The reaffirmation of the ratings assigned to non-convertible debentures (NCDs) of Chennai Petroleum Corporation Limited (CPCL) continues to derive strength from strong operational, managerial and financial linkages of the company with its parent company, Indian Oil Corporation Limited (IOCL, India's largest refining and oil marketing company). CPCL is the only refinery for the IOCL group in south India and the company enjoys operational synergies with respect to procurement of crude and bulk product off-take by IOCL. Besides this, IOCL provides significant managerial support to CPCL and the latter also enjoys substantial financial flexibility with respect to raising funds from banks and capital markets at favourable terms. The ratings also take cognisance of the improvement in profitability of the company over the last couple of quarters owing to higher crack spreads and gross refining margins (GRMs). The ratings, however, take note of the company's moderate financial risk profile and susceptibility of its margins to the fluctuations associated with the crude oil prices and GRMs.

Furthermore, the ratings for the long-term bank facilities have been withdrawn upon full repayment of the term loans rated by CARE Ratings Limited (CARE Ratings) and receipt of 'no dues certificate' from the bank stating there is no outstanding against the said facility.

### Rating sensitivities

**Positive factors – Factors that could lead to positive rating action/upgrade:** NA

**Negative factors – Factors that could lead to negative rating action/downgrade:**

- Any significant changes in operational linkages with IOCL or decline in IOCL's shareholding below 51%.
- Significant and sustained weakening of operating performance or higher-than-expected debt-funded capital expenditure leading to a pressure on the capital structure.

### Detailed description of the key rating drivers

#### Key rating strengths

**Strong parentage:** IOCL is a Maharatna PSU and the largest oil refining and marketing PSU of India. As on June 30, 2022, Government of India (GoI) held 51.50% equity stake in IOCL. As on March 31, 2022, IOCL, along with its subsidiaries including CPCL, own and operate ten refineries in India (i.e., around 33% of the domestic refining capacity) with a refining capacity of 80.55 million metric tonnes per annum (MMTPA). In FY22, IOCL reported a total income of ₹ 7,39,813 crore (net of excise) and net profit of ₹ 25,727 crore on consolidated level. IOCL holds 51.89% stake in CPCL, while Naftiran Intertrade Company Limited (Swiss-based subsidiary of National Iranian Oil Company) held 15.40%, and the rest is controlled by FIs and Public.

**Strong linkages with IOCL:** Being a subsidiary of IOCL, CPCL operates under the administrative control of the Ministry of Petroleum and Natural Gas and IOCL. The business goals and targets of CPCL are determined in consultation with IOCL by the board of directors of CPCL as per the guidelines issued by Department of Public Enterprises (DPE). CPCL derives operational, managerial and financial support from IOCL such as key decision making and approval, import of entire raw materials, off-take of finished products, IT & systems, R&D and functional support. CPCL also derives financial support by way of payables period from IOCL and investments from IOCL.

**Strategic importance of CPCL to IOCL:** CPCL is of strategic importance to IOCL as it is the only refinery which caters to IOCL's product requirements in south India. The main product of CPCL is motor spirit and high-speed diesel. The refineries of CPCL are capable of processing both soft crude and hard crude. CPCL accounts for around 23% of the installed refining capacities (operational) in south India. Furthermore, crude supply position to CPCL is well secured as IOCL does the entire import on behalf of CPCL. CPCL in turn processes and sells the finished product to IOCL.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

**Flexibility with regards to raising funds at favourable terms:** Being a government entity and part of IOCL, CPCL enjoys high financial flexibility in terms of raising funds at favourable terms. The utilisation of working capital facilities has been moderate as CPCL resorts to placing commercial paper at competitive rates. CPCL also raised preference share capital of ₹1,000 crore from IOCL of which ₹500 crore was redeemed in FY19. As on March 31, 2022 ₹636 crore of preference share are outstanding.

**Improving GRM:** The GRM of CPCL improved from US\$7.14/bbl in FY21 to US\$8.85/ bbl in FY22 which is attributable to the higher crack spreads and inventory gain registered during the year with sharp increase in crude prices during the year. CPCL's GRMs are traditionally lower as given the vintage of the refinery, the fuel loss is on the higher side keeping the distillate yield (DY) on the lower side. However, in FY22, higher inventory gains due to jump in crude oil prices resulted in higher GRM. Although the company reported robust GRMs of US\$25.04/bbl in Q1FY23 amidst higher cracks and inventory gains, it is expected that GRMs shall moderate significantly to low single digits in residual period of FY23 due to moderation in crack spreads and windfall taxes imposed on refined products.

**Growth in total income and better profitability:** The total income of the company registered an improvement of around 93% in FY22 on account of higher crude prices, better capacity utilisations and higher GRMs in FY22. CPCL has reported TOI of ₹43,368 cr in FY22 compared with ₹22,455 cr in FY21. The PBILDT margin of the company is dependent on product cracks in the international market. The product cracks were low in the first half of FY22 which gradually improved during the second half and were robust in Q4FY22. The PBILDT margin was reported at 6.29% as compared to 9.24% in the previous year. In Q1FY23, the company has registered a total operating income of ₹27,453 crore with GRM reported at US\$25.04/bbl.

**Experienced and professional management team:** The board of directors of CPCL includes a mix of independent directors and representatives from IOCL, GoI and Naftiran. The chairman and managing director of CPCL and IOCL, S.M Vaidya, has over 35 years of extensive experience in refining and petrochemicals operations. The directors of the management are assisted by a team of professionals who are highly experienced in their respective domains.

### **Liquidity: Strong**

CPCL's liquidity strength is derived by being a government entity and part of IOCL, enjoying high financial flexibility in terms of raising funds at favourable terms. In FY23, the cash accruals of CPCL are envisaged at ₹2,685 crore as against debt repayment obligations of ₹1,195 crore. Furthermore, out of the company's working capital facilities of around ₹11,500 crore around ₹2,500 crore remain undrawn as on June 30, 2022. Capex for FY23 barring the investment in JV, would mainly be for regular maintenance and for finalising of the previously ongoing projects.

### **Key rating weaknesses**

**Modest financial risk profile despite improvement:** The overall gearing of the company improved and was reported at 3.36x as on March 31, 2022 (PY: 6.65x) owing to increase in net worth due to accretion of profits to reserve and repayment of term debts. The PBILDT interest coverage ratio also reported improvement with lower debt due to repayments and was registered at 6.60x (PY: 5.51x). The total debt to PBILDT of CPCL also improved to 3.39x as on March 31, 2022 (PY: 4.42x). However, the company has demonstrated strong resource raising capabilities thereby mitigating the risks related to modest financial risk profile, to a large extent.

**Exposure to volatility in crude prices and forex rates:** Refinery players are known to be price takers as they have no control over the two key drivers which are the price of crude and the price of refined products. CPCL imports majority of its raw material requirements (crude) from West Africa or the Middle East Crude through IOCL and is exposed to volatility in crude prices and the forex rates. The pricing of the final products is also based on trade parity basis. With the company holding inventories as well, volatility in prices of crude which depends on various factors including policies by major producers of crude oil, demand variations, geopolitical situation and market sentiment, affect the GRMs and profitability margins.

**Update on capex activities:** A 9 MMTPA capacity refinery at Cauvery Basin Refinery is being planned to be set-up under a joint venture (JV) with IOCL wherein 50% will be jointly held by IOCL and CPCL and the remaining 50% by strategic investors. The project has now received approval from the NITI Aayog. CPCL's investment for the project is estimated at around ₹2,570 crore to be incurred over a period of four years. The project is expected to be completed by June 2025. Additionally, CPCL envisages to set up production of pharma-grade Hexane in the isomerisation unit. The estimated cost of the project is expected to be ₹43.53 crore and the project is expected to be completed by July 2023. As on May 31, 2022, 35.1% of the project has been completed.

**Analytical approach:** Standalone along with factoring in the strong operational, managerial and financial linkages with IOCL

### About the company

CPCL was established in December 1965 as a joint venture of the Government of India (GoI) with 74% equity stake), Amoco Inc. of USA (Amoco with 13% stake) and National Iranian Oil Company (NIOC with 13% stake). In 1985, Amoco divested its equity holding in favour of GoI. In 2000-01, GoI sold its stake in CPCL to IOCL as part of its efforts to insulate stand-alone refineries from market volatility following the dismantling of the Administered Pricing Mechanism (APM). As on June 30, 2022, IOCL holds 51.89% stake, Naftiran Intertrade Company Ltd (Swiss-based subsidiary of NIOC) holds 15.40%, and the rest is held by FIs and Public. CPCL is a standalone refiner and is engaged in crude refining at its two units located in Tamil Nadu at Manali (10.5 metric tonnes per annum (MMTPA)) and Cauvery Basin (1.0 MMTPA), with an aggregate capacity of 11.5 MMTPA. Consequent to the implementation of BS-IV specifications on a pan-India basis w.e.f April 01, 2017, and in the absence of secondary treatment facilities, the BS – III grade of diesel production from the refinery at Cauvery Basin has not been marketable in the local market and the operations of the refinery at Nagapattinam have been stopped from April 01, 2019. CPCL produces LPG, motor spirit, superior kerosene, aviation turbine fuel, high-speed diesel, naphtha, bitumen, lube base stocks, paraffin wax, fuel oil, hexane and petrochemical feed stocks such as propylene.

**About us:**

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

**Disclaimer:**

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
