

Ginni Filaments Limited

June 27,2023

Facilities/Instruments	Amount (₹ crore)	Rating ¹	Rating Action
Long Term Bank Facilities	308.75 (Enhanced from 286.04)	CARE BBB-; Stable	Revised from CARE BBB; Negative
Short Term Bank Facilities	74.57 (Enhanced from 62.17)	CARE A3	Revised from CARE A3+

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The revision on ratings of the bank facilities of Ginni Filaments Limited (GFL) takes into account deterioration in overall financial risk profile of the entity during FY23 (Audited; refers to the period of April 01 to March 31) as reflected by declining scale of operations and losses at net level owing high cotton prices with company's inability to pass on increased input cost. Furthermore, weakening of export demand due to global recessionary trends adversely impacted the operational performance on a full year basis. The revision in the rating also factors in lower than envisaged cash accruals for FY23 and moderation in financial risk profile of the company.

The rating, however, continues to draw strength from the experienced and resourceful promoters with long track record of operations, integrated operations (Spinning, Fabric, Non-Woven, Garments and Wipes) and diversified product mix along with established relationship with clients and distribution network and moderate capital structure. However, the above rating strengths are partially offset by volatility in the raw material prices, susceptibility to foreign exchange rate fluctuations and intense competition in the industry.

Rating sensitivities: Factors likely to lead to rating actions.

Positive factors

- Improvement in profitability margins marked by PBILDT margin exceeding 12% on sustained basis.
- Reduction in gross working capital cycle days to below 100 days

Negative factors

- Deterioration in the PBILDT margin below 5% on sustained basis.
- Deterioration in the capital structure as marked by overall gearing ratio above 1.80x

Analytical approach: Standalone

Outlook: Stable

The revision in outlook for the long-term bank facilities of GFL from "Negative" to "Stable" takes into account abilities of the management due to its long track record of operations to mitigate the inherent risk related to volatility in raw material prices to some extent.

Detailed description of the key rating drivers:

Key strengths

Experienced and resourceful promoters with long track record of operations:

GFL has been promoted by Dr. Rajaram Jaipuria and his son, Mr. Shishir Jaipuria. Dr. Jaipuria has a Doctorate degree in Economics and has been associated with the textile industry for more than 55 years. Mr. Shishir Jaipuria (B. Com, LLB) has an experience of more than 30 years in the textiles industry. Furthermore, GFL has a long track record of operations, as the company has been operational since 1982, the company commenced its business with an installed capacity of 26,208 spindles. Besides, promoters are resourceful and has shown ability to infuse funds in the business as and when required. Although, during FY23, company has repaid major proportion of unsecured loans from related parties, however, since promoters don't have major liabilities at individual capacity same can be reintroduced whenever required to meet business requirements and during April & May 2023, promoters has already infused unsecured loans leading to outstanding of Rs ~10 crores as at May 31,2023.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Integrated operations (Spinning, Fabric, Non-Woven, Garments and Wipes) and diversified product mix:

The operations of GFL are integrated with the company providing a complete range of products to its customers which includes products like combed cotton yarn, open end cotton yarn, knitted fabrics, baby wipes, facial wipes, kitchen wipes, processed fabrics, and garments. However, Yarn comprises major source of revenue for the company. During FY23, GFL derived 46.19% of its revenue from operations from Yarn which was 49.18% during FY22 followed by non-Woven which comprises 18.32% (PY: 16.90%), fabrics, wipes and other allied products comprises remaining 35.49% (PY: 33.92%) of the total revenue.

Consumer products segment in which they manufacture products like wet wipes and company majorly manufactures wet wipes as a job worker for major brands like Jonson and Jonson etc. Furthermore, they also sell these wet wipes under their own brand which is "CLEA". However, major proportion of revenue in this segment is derived from job work. During FY23, this segment was profitable, and company has earned profit before interest and taxes of Rs. 11.11 crores (after charging depreciation), although, profitability of this segment has also declined as compared to FY22. Consumer Products segment has consumed some of proportion of loss of yarn segment leading to GCA of Rs. 4.91 crores at entity level.

Established relationship with clients and distribution network:

Over the years GFL has established strong relationships with customers. The company exports yarns, garments, and wet wipes to countries like Korea, Bangladesh, Dubai, UK, USA, and Turkey. During the FY23, exports contribute 27% of total revenue from operations of the company as against 33% during FY22. GFL has marketing offices in India to cater to the diversified client base. The customer base is diversified wherein fabrics segment major customers are Shahi Exports & Richa Global and in apparel segment company majorly exports in European and US markets.

Moderate Capital structure

Despite of the loss at net level during FY23, the capital structure of the company still remains moderate with slight improvement during FY23 on a year-on-year basis, with the long-term debt- to-equity and overall gearing ratios of 0.37x and 1.06x as on March 31, 2023, respectively as compared to 0.39x and 1.26x, respectively, as on March 31, 2022. The improvement was majorly due to repayment of term liabilities along with repayment of unsecured loans from related parties coupled with lower utilisation of working capital limits on balance sheet date. However, since promoters don't have major personal liabilities, promoters are most likely to reintroduce entire unsecured loans from related parties repaid during FY23 to strengthen its liquidity and has already infused some proportion of unsecured loans during April & May 2023 leading to outstanding of Rs ~10 crores as at May 31, 2023.

Key weaknesses**Deterioration in overall financial risk profile during FY23 as reflected by declining scale of operations and losses at the net-level.**

Scale of operations of the entity has declined by 12.04% and stands at Rs 953.92 crores during FY23 (Audited, refers to the period April 01 to March 31) as compared to scale of operations for FY22 (Audited, refers to the period April 01 to March 31) which stands at Rs. 1084.46 crores. Further, exports comprise 27% during FY23 as against 33% during FY22 of revenue from operations whereas remaining revenue are from domestic sales.

The company has booked loss at PAT level (although, there is marginal cash profit of Rs 4.91 crores) majorly due to mismatch in cotton prices as against yarn prices, however, cotton prices were stabilised from October 2022 onwards after availability of fresh crop but the- fluctuation in prices of Yarn and cotton are not in parity followed by overall slowdown in industry coupled with lower demand in European and US markets thereby impacting export revenue of the company as well as domestic revenue since company's domestic buyers are also ultimately supplies in European and US markets.

Volatility in the raw material prices:

GFL derives majority of income from the sale of cotton yarn which comprises almost 46% of revenue during FY23 and rest through fabrics, garments, nonwoven fabric, and wipes. The basic raw material for production of yarn is cotton. Cotton prices are dependent on the government policies, effect of monsoon etc. have been highly volatile in the past few years. Further, the ability to transfer the volatility in raw material prices is limited on account of the low bargaining power of the companies with its suppliers as well as its customers, as the prices of both raw materials and finished goods are dependent upon the market conditions. Apart from cotton, the raw materials used by GFL for manufacturing its products are polyester, viscose, and yarns. The polyester and viscose prices are related to crude oil prices, which are dependent upon the global economic scenario. Furthermore, yarn being a commodity its price is also volatile and movement in yarn prices generally don't tends to move in line of cotton prices which plays a vital role on the profitability margins of GFL's fabric and garment verticals.

Cotton yarn exports declined has severely impacted during H1FY23 due to global economic conditions leading to down trend in European and US markets post Russia-Ukrain conflict. Although, there has been some revival in second half of FY23 as cotton prices cool down after arrival of fresh cotton crop in October 2022 to Rs 65000 per candy as against peak price of Rs 1.10 lacs per candy. However, this is still above pre covid levels which has impacted the profitability of spinning mills by 5-7% on PBILDT level during FY23.

Cotton Yarn prices are likely to be steady going forward as buying improves in northern India owing to overall rise in demand in textile Industry. 40 count combed cotton yarn prices have improved to Rs 315-Rs 320 per kilogram which previously used to be

around Rs 280- Rs 285 per kilogram. Owing to which it is likely that spinning mills will show better profitability going forward from second quarter of FY24.

Susceptibility to foreign exchange rate fluctuations:

As substantial portion of GFL's income is generated through the export market (FY22: 27% of sales; PY: 33%), thereby the company is exposed to foreign exchange fluctuation risk. However, GFL has some amount of natural hedge due to some imports of raw material. Although, the company also hedges the risk through forward contracts despite of which some proportion of forex exposure remains unhedged leading to currency fluctuation risk. However, company has gained Rs 1.59 crores during FY23 (PY: Rs. 2.34 crores) on account of foreign currency fluctuation.

Competition:

In the yarn and garment segment, the company faces competition from China, Bangladesh, and other cheap export-based countries, which sell yarns and garments at competitive rates compared to India. Indian apparel exporters face competition from Bangladesh on account of low wages and duty-free access to around 37 countries including EU nations. Indian apparel exports are still expected to be guided by development in USA and EU economies owing to current economic distress in European and US market. Further, decreasing cost competitiveness of China is likely to give positive impetus to Indian textile exporters. Availability of skilled manpower and raw material like cotton, polyester and viscose puts India in a favourable position vis-à-vis other country.

Liquidity: Adequate

The company has earned Gross Cash Accruals (GCA) of Rs. 4.91 crores during FY23 and is projecting to generate GCA of around Rs ~30 crores & Rs ~35 crores in FY24 & FY25 respectively as against scheduled repayment obligations of Rs. 28.96 crores and Rs. 24.91 crores for FY24 & FY25 respectively. Since there was lower GCA during FY23, company has managed scheduled repayment obligations for FY23 through liquidation of working capitals as there is substantial decline inventory and receivables which are reduced to Rs 162.14 crores and Rs. 93.56 crores as at March 31,2023, as compared to Rs 258.03 crores and Rs. 145.29 crores respectively as at March 31,2022. The current and quick ratio stood at a moderate level of 1.27x and 0.63x, as on March 31, 2023, as compared with 1.29x and 0.57x as on March 31, 2022. Since, company has higher inventory holding of Rs. 162.14 crores as at March 31,2023, (PY: Rs 258.03 crores) leading to quick ratio below unity. Furthermore, due to high inventory holding operating cycle remains moderate at 108 days during FY23 as against 107 days during FY22 owing to which average working capital utilisation of the company remains comparatively moderate and stood at 55.22% during the last 12 months ending April 2023.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
