### Rationale and key rating drivers

The reaffirmation in the ratings for the various bank facilities and market instruments of Indian Railway Finance Corporation Limited (IRFC) continues to factor in the majority ownership by Government of India (GoI) and IRFC's strategic role as a dedicated financing arm of Indian Railways (IR), responsible for arranging funds for meeting planned capital outlay of IR. The company's principal business is to borrow funds from the commercial markets to finance the acquisition of new rolling stock and construction of developmental projects or infrastructure for IR.

The ratings also factor in IRFC's strong financial fundamentals with consistently profitable operations, strong asset quality with history of nil non-performing assets (NPAs), comfortable capitalisation profile and adequate liquidity position. Additionally, the ratings also draw comfort from the demonstrated government support as evident via regular and periodic equity infusions and favourable lease agreements that protect IRFC against any exchange rate volatility, interest rate fluctuations and liquidity risk by transferring of risks to Ministry of Railways (MoR).

IRFC's disbursement to MoR was ₹32,337.77 crore in FY23 as against ₹59,899 crore in FY22 and ₹1,04,369 crore in FY21. The government as part of the Union Budget for 2023-24 has allocated negligible extra budgetary resources for Indian Railways, indicating it will not look to borrow money to fund its capital expenditure. Further, IRFC plans to diversify by funding any entity which has forward or backward linkage with Indian Railways and the company therefore is in the process of establishing systems and processes for the same.

### Rating sensitivities

#### Negative factors – Factors that could individually or collectively lead to negative rating action / downgrade:

- Any material changes in the government support and / or strategic role played by IRFC in supporting IR or reduction in GoI's shareholding below 51%.
- Significant deterioration in IRFC's standalone credit profile including its profitability and asset quality profile.

**Analytical approach:** Standalone along with factoring in majority ownership by GoI.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

**Outlook: Stable**

The stable outlook reflects expectations that the company will continue to receive timely funding from the government through favourable lease agreement, owing to its strategic role as a dedicated funding arm of Indian Railways.

**Detailed description of the key rating drivers:****Key strengths****Majority GoI ownership marked with demonstrated government support and strong integration with the parent**

Majority owned by GoI, IRFC is a Schedule 'A' Public Sector Enterprise under the administrative control of MoR. In line with the divestment objective of GoI, IRFC came up with its initial public offering (IPO) in January 2021 and raised equity of ₹4,633.38 crore, which included fresh equity raise of ₹3,088.92 crore and offer for sale of shares by GoI amounting to ₹1,544.46 crore. Through IPO, GoI divested 5% of its shareholding, and as a result, the overall shareholding of GoI came down to 86.36% as on June 30, 2021, from 100% till December 31, 2020, and continues to be so as on March 31, 2023.

The company has a demonstrated history of receiving timely and regular parent support in the form of regular capital infusions and CARE Ratings Limited (CARE Ratings) expects IRFC to maintain comfortable capitalisation levels going forward.

Additionally, the favourable lease agreement with MoR protects IRFC against any exchange rate volatility, interest rate fluctuations and liquidity risk. Furthermore, out of five board of directors, two are nominees from Government of India and two are independent directors. CARE Ratings believes that given the position of IRFC as a dedicated financing arm of IR, IRFC will continue to be strategically important for IR. Also, with majority government ownership, timely support from GoI is expected to be forthcoming and any material change in the ownership of and / or support to IRFC will remain a key rating monitorable.

**Strategic role in providing financial assistance to meet planned outlay of IR**

IRFC is an arranger of finance for MoR and raises money from the market to part-finance the planned capital outlay of IR. The MoR is responsible for the acquisition of rolling stock as well as project assets, improvement, expansion, and maintenance of the railway infrastructure, while IRFC is responsible for mobilising resources necessary for the acquisition of rolling stock/project assets ordered by the MoR. The resources thus raised are used for part-funding for creation of assets (through lease financing) for IR. At the beginning of each fiscal year, the MoR notifies IRFC of its financing requirements that are to be met through market borrowings. At the end of each year, a finance lease agreement is drawn in relation to the rolling stock acquired by the MoR from IRFC funds during the previous year. The lease is for a period of 30 years comprising primary lease period of 15 years followed by a secondary lease period of another 15 years. Lease rentals comprise IRFC's capital recovery, cost plus a net interest margin (NIM), which are covered under the primary lease period. Over the last few years, IRFC has provided funding for various railway infrastructure asset projects, such as electrification, doubling of railway line, etc. The company's resources have been used for the acquisition of rolling stock assets, financing of railway infrastructure assets and meeting other developmental needs of IR.

IRFC maintains a dominant share in MoR's increasing requirement for rolling stock/project assets on the strength of its ability to mobilise funds at competitive rates. IRFC, under the directives of MoR, also extends loans to other entities of MoR, viz., Rail Vikas Nigam Ltd. (RVNL) and IRCON International Limited (IRCON, rated 'CARE AAA; Stable'). As on March 31, 2023, 52.29% (increased from 48.86% as of December 31, 2022) of the loans and advances were towards lease receivables from MoR, 46.44% (49.81%) were advances against lease of railway infrastructure assets and advance against National Project and the remaining 1.27% (1.33%) as loans provided to IRCON, RVNL and other advances. The portfolio composition is expected to be in similar proportion at least over the short to medium term. CARE Ratings notes that IRFC plans to diversify by funding any entity which has forward or backward linkage with IR and the management therefore is in the process of establishing systems and processes for the same. These new projects will remain linked to railways ecosystem.

**Strong asset quality on account of entire exposure to MoR / MoR-owned entities**

As a non-banking finance company (NBFC), with majority ownership by GoI, IRFC does not have to comply with Reserve Bank of India's (RBI) regulatory requirements on asset classification, liquidity coverage ratio, provisioning, and prudential exposure norms to the extent of its exposure to MoR, which restricts a NBFC's maximum exposure to a sector or an entity. On account of the entire exposure of IRFC to MoR / MoR-owned entities which are controlled by GoI, the recovery risk is mitigated. As a result, IRFC continues to have strong asset quality with a history of nil NPAs.

**Healthy capitalisation profile**

The capitalisation profile of IRFC (given zero percent risk weight is assigned to MoR's exposure) remains strong marked with overall capital adequacy ratio (CAR) at 512% as on March 31, 2023 (482% as on December 31, 2022). The capitalisation metrics are also supported by tangible net worth (TNW) of ₹45,469 crore as on March 31, 2023, up from ₹44,141 crore as on December 31, 2022, on account of sequential positive internal accruals. Although the gearing level is high at 9.2x as on March 31, 2023 (9.1x as on December 31, 2022), the overall credit risk remains low due to low credit risk of portfolio. Going forward, with rising disbursement and relatively lower internal accruals due to moderate profitability, CARE Ratings expects the gearing to increase, but remains below 10x in the near term.

### **Diversified borrowings profile**

End March 31, 2023, the total borrowings of IRFC stood at ₹418,929.3 crore, marginally increased from ₹388,417 crore as on March 31, 2022, with funds availed from various lender categories, such as banks, other financial institutions, and foreign institutional investors. As on March 31, 2023, borrowings from domestic bonds market (including 54EC bonds) formed 45.2% of the total borrowings, followed by rupee term loan from banks forming another 33.5%, about 16.9% in the form of foreign / external commercial borrowings (ECB), 4.2% through National Small Saving Fund (NSSF) and the remaining 0.3% in the form of short-term loans.

### **Key weaknesses**

#### **Moderate profitability metrics**

IRFC operates on a cost-plus-based model, and as per the lease agreement with MoR, the lease rentals are calculated as equal to half yearly payments to be made by the MoR based on weighted average cost of incremental borrowing during the relevant year together with a reasonable markup mutually agreed between the MoR and IRFC. IRFC has moderate financial profile marked by modest revenue growth, controlled borrowing costs, marginal credit costs and overall profitability protected under lease agreement with MoR.

The total income increased y-o-y by 17.9% in FY23 compared with same period previous year to ₹23,932.6 crore with increased lease income. The NIM (including lease income) continued to remain at moderate levels of 1.4% for FY23 (1.5% in FY22), given IRFC's cost-plus-based model. The operating expenses / average total asset remained low at 0.03% in FY23 due to its wholesale lending model, while the credit costs remained negligible with nil NPA and IRFC being exempted from providing standard provisions against its exposure to IR. Accordingly, return on total assets (ROTA) was at 1.4% for FY23 (1.5% in FY22). However, the return on TNW was high at 14.7% for FY23, benefiting from financial leverage with gearing of more than 9.0x. The profitability is expected to be at similar level over the medium term.

#### **High concentration risk**

The loan book of IRFC is highly concentrated as the entire exposure is to MoR or MoR-related entities. As on March 31, 2023, 52.29% of the loans and advances were towards lease receivables from MoR, 46.44% were advances against lease of railway infrastructure assets and advance against National Project, and remaining 1.27% as loans provided to IRCON, RVNL and other advances. Also, the development of IRFC's business is dependent on the MoR's strategy concerning the growth of IR. However, IRFC is exempted from RBI's credit concentration norms.

#### **Liquidity: Adequate**

The liquidity profile of IRFC remains comfortable on the back of GoI ownership and support from GoI in the form of regular equity infusions and favourable lease agreement, wherein IRFC can get advance lease rentals from MoR if need arises. Due to IRFC's status as a government company, it is exempted from RBI's guidelines regarding applicability of liquidity coverage ratio for NBFCs.

#### **Environment, social, and governance (ESG) risks**

Given that IRFC is engaged in lending primarily to MoR, its ESG risks are directly linked to that of MoR. While MoR has high carbon footprint owing to its presence in business of transportation, it has committed to become carbon neutral by 2030 primarily through sourcing its energy requirements from renewable sources. Furthermore, it is taking initiatives for effective water and waste management to reduce its negative impact on environment.

MoR scores favourably on social risk, given its importance as one of the key modes of transportation in the country.

Owing to high involvement of GoI in appointment of board of directors and management, the governance risk remains moderate.

## About the company and industry

### Industry classification

Macro Economic Indicator	Sector	Industry	Basic Industry
Financial Services	Financial Services	Finance	Non Banking Financial Company (NBFC)

Indian Railway Finance Corporation (IRFC), a GoI undertaking under the purview of Ministry of Railways (MoR), is a financing arm of MoR. It is also registered as systemically-important non-deposit taking non-banking financial company (NBFC – ND-SI) and Infrastructure Finance Company (NBFC- IFC) with the Reserve Bank of India (RBI). The company is a notified Public Financial Institution (PFI) under the Companies Act. IRFC's principal business is to borrow funds from the financial markets to finance the acquisition / creation of project assets, which are then leased out to the Indian Railways (IR). The funds are utilised for acquiring rolling stock assets and building up infrastructure, constituting significant part of annual capital expenditure of IR. Besides, the company has been assigned the task of funding Railway Projects through Institutional Finance (EBR-IF) route. A significant portion of IRFC's revenue is generated from the leasing of rolling stock assets, comprising locomotives, passenger coaches and freight wagons, to the IR.

IRFC operates on a cost-plus-based model, and as per the agreement, the lease rentals are calculated as equal to half yearly payments to be made by the MoR based on weighted average cost of incremental borrowing during the relevant year together with a reasonable markup mutually agreed between the MoR and IRFC. While economic ownership of assets vests with MoR, IRFC retains the legal title of the asset. MoR pays lease rentals to IRFC, which are sufficient to meet the debt obligations of IRFC. Apart from leasing assets to IR, IRFC under the directives of MoR also extends loans to other entities of MoR, viz., Rail Vikas Nigam Ltd. (RVNL), etc. The responsibility of debt servicing lies with MoR as debt servicing is done from revenues generated by MoR from these projects.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
