

Pritika Auto Industries Limited

July 14, 2023

Facilities/Instruments	Amount (₹ crore)	Rating ¹	Rating Action
Long Term Bank Facilities	66.50	CARE BBB-; Stable	Assigned
Short Term Bank Facilities	7.50	CARE A3	Assigned

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The ratings assigned to the bank facilities of Pritika Auto Industries Limited (PAIL) factors in experienced promoters, established track record of operations with the company being one of the prominent players in machined rear axle housing and differential cases for tractors in North India, long standing relationship with Original Equipment Manufacturers (OEMs), growing scale of operations and comfortable financial risk profile. The ratings are, however, constrained by cyclical nature of the auto industry, working capital intensive nature of operations and low bargaining power along with susceptibility of profitability margins to raw material price fluctuations. Further, the ratings also take cognizance of sizeable capex in its subsidiary companies, stabilisation of which is a key monitorable.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Sustainable improvement in the scale of operations beyond Rs 400 crore with PBILDT margin of more than 11% and increase in share of business on sustained basis

Negative factors

- Decline in total operating income below Rs 300 crore and PBILDT margin below 9%
- Any un-envisaged debt-funded capital expenditure and/or exposure to its group companies thereby leading to deterioration in its adjusted overall gearing above unity

Analytical approach: Consolidated. Financials of Pritika Engineering Components Limited (PECL; subsidiary) and Meeta Castings Limited (MCL; step-down subsidiary) considered being in the similar line of business

List of Entities Consolidated:

Sr. No.	Name of the Entities	Shareholding
1.	Pritika Engineering Components Ltd	70.15%
2.	Meeta Castings Limited	100%

Outlook: Stable

CARE Ratings believe that the entity is likely to sustain its stable operating performance due to its association with the top OEMs in the domestic market along with extensive experience of the promoters aiding in securing orders. Further, with the ongoing capex in its subsidiary and step-down subsidiary, the entity expects to increase its share of business with the existing OEMs.

Detailed description of the key rating drivers:

Key strengths

Experienced promoters and established track record of operations

The group is promoted by Mr. Raminder Singh Nibber, mechanical engineer with an experience of more than three decades in manufacturing of tractor auto components through its flagship company Pritika Industries Limited (PIL) est. in 1974. Mr. Nibber is ably supported by his son Mr. Harpreet Singh Nibber, Managing Director of the group with an experience of more than two decades in this industry. The top management is supported by qualified and professional senior management team. The promoters have built long-standing relationships with its customers over the years which has enabled it to garner repeat orders. Therefore, in 2018, the group expanded its presence by incorporating another company, PECL, engaged in the similar line of business. With the growing scale of operations, promoters are aiming to streamline its operations into product dedicated manufacturing units. The promoters added another company in FY23, MCL, with the advanced technology to manufacture tractor components which is expected to commercialise its operations in April 2024.

Growing scale of operations

The group reported Total Operating Income (TOI) of Rs 363.28 crore during FY23 (refers to period April 01 to March 31) (PY: Rs 271.49 crore), growth of ~34% on the back of uptick in the demand of tractors substantiated by the increased volumes thereby leading to improvement in capacity utilisation from 50% in FY22 to 70% in FY23. The group majorly caters to the

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

domestic OEMs and is one of the largest suppliers of axle housing crank cases and wheel hub among others in Northern India. The group is also focussing on expanding its footprints in export market which have better margins. Despite growing scale of operations, operational margin remained rangebound between 10% - 12% from past three fiscals ending FY23 and stood at 11.86% (PY: 11.16%) owing to limited bargaining power with OEMs.

Going forward, with the proposed merger of auto division of its group company, Pritika Industries Limited (PIL), which was originally set up as a machining unit for the group into PAIL along with the setting up of advanced technology unit in step-down subsidiary in addition to ongoing capacity expansion, operational performance is expected to improve, however, timely commissioning of the unit with streamlining of revenue with no major cost overrun shall remain key monitorable.

Long standing relationship with OEMs

The group has established relationship with reputed OEMs, viz., Mahindra & Mahindra, Tractor and Farm Equipment Ltd, Swaraj Engines Limited, Escorts Limited, Ashok Leyland etc. Though the sales appear to be concentrated as these OEMs contributes majority of the total sales of the company, though, the risk is mitigated considering these OEMs hold majority of the share in the domestic market and group has been able to leverage upon the long-standing relationship with these OEMs due to its design/engineering capabilities and adherence to stringent quality standards.

Comfortable financial risk profile

The capital structure of the group has remained comfortable over the years with overall gearing of 0.64x as on March 31, 2023 (PY: 0.70x as on March 31, 2022). The debt profile of the group comprises of various term loans amounting to Rs 45.26 crore pertaining to purchase of plant & machineries, vehicle and Emergency credit line guarantee scheme (ECLGS) loans along with working capital borrowings of ~Rs 50 crore. Also, PAIL has given corporate guarantee on the bank facilities of PIL amounting to Rs 23.50 crore owing to which adjusted overall gearing stood at 0.79x as on March 31, 2023.

The group is undertaking capacity expansion in both the companies i.e., PAIL and PECL cumulatively amounting to ~Rs 21 crore, of which, term loan of Rs 14 crore is already sanctioned, and the same is expected to be operational by the end of FY24. Apart from this, to set up an advanced technology unit in the same line of business, new entity, MCL is incorporated as a subsidiary of PECL. The cost of setting up of this unit is ~Rs 20 crore against which debt of Rs 12.11 crore is already tied up and expected to be commissioned by April 24.

Any cost or time overrun in the aforementioned capex along with any increase in the group exposure may deteriorate financial and operational profile of the group and thus remain key monitorable.

Key weaknesses

Low bargaining power with customers and susceptibility of margins to volatility in raw material prices along with forex risk

Iron Scrap is the key raw material used for manufacturing of automotive components. PAIL at group level sources its raw material from domestic market only. The demand for metals is cyclical, the prices of which are driven by demand and supply conditions prevalent in the market coupled with strong linkage with the global LME-driven prices which exposes the group to price risk. Though, the company has a mechanism wherein any revision in the raw material prices is reset by the OEMs based on last billing and change in prices is accommodated with a lag of one quarter.

Cyclical nature of the automotive industry

The automobile industry is cyclical in nature and automotive component suppliers' sales are directly linked to the sales of auto OEMs. Furthermore, the auto-ancillary industry is competitive with the presence of a large number of players in the organized as well as unorganized sector. While the organized segment majorly caters to the OEM segment, the unorganized segment mainly caters to the replacement market and to Tier II and Tier III suppliers.

Working capital intensive nature of operations

Operations of the company are working capital intensive marked by an average operating cycle of around 100 days as on March 31, 2023 (PY: 110 days). Being in a highly competitive business, the average collection period remained at around 71 days (PY: 76 days). Being a manufacturing company, it is required to maintain adequate inventory of material for different models for different OEMs and thus the average inventory period remained at around 82 days (PY: 99 days). The company procures raw material against advance payment, apart from which, credit period of upto 45 days is given, thereby, leading to reduction in creditors period to 54 days (PY: 66 days). The working capital requirements are met largely through bank borrowings resulting in average utilization of approximately 80% of its sanctioned working capital limits. Going forward, working capital requirement may intensify considering the sizeable capex being undertaken in the group and thus remain a key monitorable.

Liquidity: Adequate

The company has adequate liquidity marked by sufficient cushion in expected gross cash accruals of Rs. 29.71 crore vis-à-vis scheduled repayment obligations of Rs.11.84 crore in FY24 and free cash and bank balance of Rs. 16.87 crore as on March 31, 2023. The company has sufficient headroom to raise debt going forward with comfortable capital structure having an overall gearing below unity. The reliance on bank limits has remained ~80% on account of working capital-intensive operations. Any cost overrun in the ongoing capex may impact the liquidity profile of the group and thus remain key monitorable.

About the company and industry

Industry classification

Macro-Economic Indicator	Sector	Industry	Basic Industry
Consumer Discretionary	Automobile and Auto Components	Auto Components	Auto Components & Equipments

Pritika Auto Industries is a part of Pritika Group. The group is engaged into manufacturing of Machined rear axle housing and differential cases for Tractors in India. Besides these two components, it is also producing wide variety of other components such as Brake Housings, Wheel Hubs, Hydraulic Lift Housings/Covers, Crank Cases, Cylinder Blocks, Brake Disc, Transmission cover etc and is one of the largest producers of machined casting in North India.

PAIL has manufacturing facilities situated at Derabassi and Tahliwal (Himachal Pradesh) with a total capacity exceeding 38,400 metric tonnes per annum (MTPA). The manufacturing facilities consists of mechanized foundry with both High pressure and Medium Pressure Mould lines, Induction Furnace and Cold Core Box machines.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
