

## Pritika Engineering Components Limited (Revised)

July 14, 2023

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term Bank Facilities	29.00	CARE BBB-; Stable	Assigned
Short Term Bank Facilities	3.00	CARE A3	Assigned

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The ratings assigned to the bank facilities of Pritika Engineering Components Limited (PECL) factors in experienced promoters with established market presence of parent, Pritika Auto industries Limited (PAIL; rated CARE BBB-; Stable/ CARE A3) being one of the prominent players in machined rear axle housing and differential cases for tractors in North India along with long-standing relationship with Original Equipment Manufacturers (OEMs).

However, the ratings are constrained by small scale of operations albeit growing, moderate financial risk profile, ongoing debt funded capex, cyclical nature of the auto industry and low bargaining power along with susceptibility of profitability margins to raw material price fluctuations.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Increase in scale of operations with PBILDT margin above 12% on a sustained basis
- Improvement in capital structure with overall gearing below unity on a sustained basis

#### Negative factors

- Change in management or effective control of promoter group
- Significant decline in scale of operations constraining liquidity
- Time/ cost overrun pertaining to the ongoing capex in PECL and its subsidiary company, MCL thereby deteriorating financial risk profile leading to overall gearing above 1.70x
- Deterioration in business operations and financial risk profile of PAIL

**Analytical approach:** Consolidated factoring parent linkages with PAIL being into same line of business and having strong business & operational linkages. Financials of Meeta Castings Limited (MCL) considered as it's a wholly owned subsidiary company and is in the similar line of business.

### Outlook: Stable

CARE Ratings believe that the entity is likely to sustain its growing scale of operations being backward integrated with its parent and group company, Pritika Industries Limited (PIL) which are associated with the top OEMs in the domestic market aiding in securing orders. Further, with the ongoing capex in PECL and its subsidiary company, the entity expects to increase its share of business with the existing OEMs.

### Detailed description of the key rating drivers:

#### Key strengths

##### Experienced Promoters with established market presence of parent

PECL, incorporated in 2018, is a subsidiary of PAIL which holds 70.15% shares, formed primarily as a backward integration unit. The group is engaged in manufacturing of automotive components for tractors and is one of the largest producers of machined casting in North India. PAIL, incorporated in 1980, has built long-standing relationships with OEMs over the years which has enabled it to secure orders. PECL manufacture and sells majority of its products to PIL (marketing arm) and PAIL (parent) constituting to ~98% which in turn is being supplied to the OEMs. Further, the working capital limits of PECL are backed by the corporate guarantee of PAIL.

The group is promoted by Mr. Raminder Singh Nibber, mechanical engineer carrying an experience of more than three decades in manufacturing of tractor auto components and is ably supported by his son Mr. Harpreet Singh Nibber, Managing Director of the group with an experience of more than two decades in this industry. The top management is supported by a qualified and professional senior management team.

##### Long standing relationship with OEMs

The group has established relationship with reputed OEMs, viz., Mahindra & Mahindra, Tractor and Farm Equipment Ltd, Swaraj Engines Limited, Escorts Limited, Ashok Leyland etc. Though the sales appear to be concentrated as these OEMs contributes majority of the total sales of the company, though, the risk is mitigated considering these OEMs hold majority of the share in the

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

domestic market and group has been able to leverage upon the long-standing relationship with these OEMs due to its design/engineering capabilities and adherence to stringent quality standards.

### **Key weaknesses**

#### **Small Scale of operations albeit growing**

TOI of the company is growing YoY at a CAGR of ~50% from FY19 to FY23 (refers to period April 01 to March 31), yet the scale remained small. During FY23, company recorded growth of ~54% and stood at Rs 82.32 crore during FY23 (PY: Rs 53.61 crore) on the back of uptick in the demand of tractors substantiated by the increased volumes thereby leading to improvement in capacity utilisation from 50% in FY22 to 70% in FY23 in line with the growth in parent, PAIL. Despite growing scale of operations, operational margin remained rangebound between 10-12% from past three fiscals ending FY23 and stood at 12.36% (PY: 11.83%) owing to limited bargaining power with OEMs.

Going forward, with the setting up of advanced technology unit in subsidiary in addition to ongoing capacity expansion, operational performance is expected to improve, however, however, timely commissioning of the unit with streamlining of revenue with no major cost overrun shall remain key monitorable.

#### **Project Risk**

MCL has started setting up advanced technology unit for the manufacturing of tractor components at a project cost of ~Rs 20 crore, funded in the debt equity ratio of 60:40. The land has been acquired and construction is ongoing with all the necessary approvals in place. The unit is expected to commercialise its operations in April 2024.

#### **Low bargaining power with customers and susceptibility of margins to volatility in raw material prices along with forex risk**

Iron Scrap is the key raw material used for manufacturing of automotive components. PAIL at group level sources its raw material from domestic market only. The demand for metals is cyclical, the prices of which are driven by demand and supply conditions prevalent in the market coupled with strong linkage with the global LME-driven prices which exposes the company to price risk. Though, the company has a mechanism wherein any revision in the raw material prices is reset by the OEMs based on last billing and change in prices is accommodated with a lag of one quarter.

#### **Moderate financial risk profile**

The capital structure of the company has remained moderate over the years with overall gearing of 1.20x as on March 31, 2023 (PY: 1.52x as on March 31, 2022). The debt profile majorly comprises of various term loans amounting to Rs 22.44 crore pertaining to purchase of plant & machineries and Emergency credit line guarantee scheme (ECLGS) loan along with working capital borrowings of ~Rs 11 crore. The company is undertaking capex in FY24 for capacity expansion amounting to ~Rs 14 crore against which term loan of ~Rs 10 crore is already tied up. Apart from this, to set up an advanced technology unit in the same line of business, new entity, MCL is incorporated as a subsidiary of PECL. The cost of setting up of this unit is ~Rs 20 crore against which debt of Rs 12.11 crore is already tied up and expected to be commissioned by April 24.

Any cost or time overrun in the aforementioned capex may deteriorate financial and operational profile and thus remain key monitorable.

#### **Cyclical nature of the automotive industry**

The automobile industry is cyclical in nature and automotive component suppliers' sales are directly linked to the sales of auto OEMs. Furthermore, the auto-ancillary industry is competitive with the presence of a large number of players in the organized as well as unorganized sector. While the organized segment majorly caters to the OEM segment, the unorganized segment mainly caters to the replacement market and to Tier II and Tier III suppliers.

#### **Liquidity: Adequate**

Liquidity of the company is adequate marked by expected GCA of Rs 6.48 crore as against repayment obligations of Rs 4.02 crore along with free cash and bank balance of Rs 5.15 crore as on March 31, 2023. The reliance on bank limits has remained high of approx. 70% on account of working capital-intensive operations. Any cost overrun in the ongoing capex may impact the liquidity profile of the company and thus remain key monitorable.

**About us:**

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

**Disclaimer:**

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
