

SKM Egg Products Export (India) Limited

July 31, 2023

Facilities/Instruments	Amount (₹ crore)	Rating ¹	Rating Action
Long-term bank facilities	54.50	CARE A-; Stable	Reaffirmed
Long-term / Short-term bank facilities	90.00 (Enhanced from 64.00)	CARE A-; Stable / CARE A2+	Reaffirmed
Short-term bank facilities	70.00 (Enhanced from 49.00)	CARE A2+	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The ratings assigned to the bank facilities of continue to derive strength from the long operational track record of SKML for more than two decades in the egg powder business, dominant share among the Indian egg powder exporters, strategically located manufacturing facilities with adherence to high-quality standards, integrated nature of operations, diversified product offerings with a well-established distribution network comfortable capital structure and comfortable coverage indicators and adequate liquidity position. The ratings also favourably consider the robust growth in the income and improved profitability during FY23 due to improved realization of its products backed by healthy demand in the export market. The ratings are, however, constrained by SKML's geographical and client concentration risk, susceptibility of profitability to international egg powder prices and foreign exchange fluctuations. The ratings also factor in the susceptibility of the industry to the outbreaks of bird flu and other diseases.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Ability to scale up the operations to over ₹1,000 crore while maintaining PBILDT margin above 15% on a sustained basis.
- Improvement in the capital structure with overall gearing below 0.3x.

Negative factors

- Any further large debt-funded capex leading to deterioration in the capital structure with overall gearing above the range of 0.75x.
- Weakening of the liquidity profile with free cash and liquid investments below ₹30 crore on a sustained basis.

Analytical approach:

Standalone

Outlook: Stable

The stable outlook reflects that the company is expected to sustain its operational performance in the medium term backed by improved demand for the products along with its diversified product profile and strong presence in the market.

Detailed description of the key rating drivers:

Key strengths

Experienced promoters and long operational track record for more than two decades

SKM Maeilanandhan, promoter of the SKM group, has vast experience of nearly four decades in the poultry and related industries. He is assisted by his son, Shree Shivkumar, with nearly 25 years of experience in the industry. SKML has a long track record of operations for over two decades in the manufacturing and export of egg powder.

Integrated and strategically located manufacturing facility with adherence to high quality standards

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

The operations of SKML are integrated with the company having its own and leased poultry farm to meet its entire egg requirements and also its own feed manufacturing unit to cater to its poultry farm. All the poultry farms including the company's own farm are strategically located in proximity to the company's manufacturing unit (30-40 km radius) thereby providing easier access to the raw material and ensuring lesser breakage of eggs during transit. The entire operations of the company from egg-breaking process up to production and packing of the final egg powder is automated to maintain high level of quality standards.

Largest exporter of egg powder from India backed by diversified product offerings and established distribution network

SKML is the largest exporter of egg powder from India and accounts for almost 70%-75% of the overall export of egg yolk and albumin egg powder from India. The company has a diversified range of products, including egg yolk powder, egg albumin, bakery mix, liquid egg, etc. SKML has well-established distribution network spread across various countries, with exports contributing around 55%-80% of the revenue over the past three years ended FY23.

Improved financial performance during FY23

During FY23, the company had reported income of ₹657.14 crore register y-o-y growth of 120% over FY22. The PBILDT margin also improved significantly to 21.90% in FY23 from 12.74% in FY22. The growth in the income and improved profitability was largely driven by the healthy demand for the egg powder products from India in the export markets following outbreak of Bird flu in the US and UK regions and due to lower production cost of eggs in India compared to the other geographies.

Comfortable gearing and coverage indicators

The company's capital structure remained comfortable with an overall gearing at 0.54x as on March 31, 2023, against at 0.81x as on March 31, 2022. During the current year, the company had planned for capex towards setting up of Environmental controlled (EC) shed for birds and Bio-gas plant with total project cost of ₹70 crore of which ₹50 crore funded by debt and rest by accruals. The project is expected to be completed by Q1FY25. Despite the above debt-funded capex, the capital structure is expected to remain comfortable going forward aided by strong accretion of profits. The interest coverage ratio also stood comfortable at 15.39x (PY:9.97x) in FY23. The debt coverage metrics also improved with total debt/ gross cash accruals (TD/GCA) of 0.95x as on March 31, 2023, as against 2.99x as on March 31, 2022.

Key weaknesses

Geographically concentrated revenue

SKML's top 10 customers accounted for 49% (FY22: 54%) of its total sales during FY23 and majority of sales are contributed by Japan and Russia, which together account for 59.2% (50.4% in FY22) of the total sales in FY23. SKML's higher concentration on Japanese and European markets exposes the company to any change in the consumption pattern in these markets and entry of alternate products. To improve geographical presence and customer base, SKML has been adding new customers in other geographies as well as focusing on the domestic market for the sale of its liquid products and frozen egg albumen.

Exposure to foreign exchange risk

More than 75% of SKML's revenue is generated in foreign currency, while the raw material is procured locally barring certain consumables. SKML enters forward contracts for about 70% of its receivables for one year, however, for the rest of the exposure, the company is exposed to foreign currency fluctuations.

Vulnerability of the industry's performance to outbreaks of flu and other diseases

A ban on the exports due to bird flu could lead to products being piled up leading to an excess supply situation thereby causing a sharp fall in the end-product prices. Such scenario is expected to have an impact on the company's revenues as well as profitability. However, the high level of safety standards like high temperature pasteurisation and high-quality processing at the company's units reduces any major impact on the company's revenues during such outbreaks.

Liquidity: Strong

The liquidity is marked by strong accruals of ₹109.16 crore in FY23 against negligible repayment obligations of ₹1.25 crore in FY24 with cash and liquid investments to the tune of ₹56.83 crore as on March 31, 2023. The operating cycle improved to 85 days in FY23 (PY: 135 days in FY22) due to better movement of finished goods inventory. SKML has been sanctioned with working capital of ₹150 crore, which enhanced from ₹103 crore in April 2023, and the average utilisation of the same stood at 75.70% for the last 12 months ended June 2023. The current ratio stood comfortable at 2.01x as on March 31, 2023.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
