

## Axiscades Technologies Limited

August 10, 2023

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long-term bank facilities	6.45 (Reduced from 24.45)	CARE BBB+; Stable	Revised from CARE BBB; Stable
Long-term / Short-term bank facilities	55.00 (Enhanced from 35.00)	CARE BBB+; Stable / CARE A2	Revised from CARE BBB; Stable / CARE A3

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The revision in the ratings of bank facilities of Axiscades Technologies Limited (ACTL) factors in significant improvement in revenues and PBILDT margin of the company during FY23, which is likely to sustain on account of the increased traction in its various business segments coupled with addition of several new customers during FY23. The company has been focussing on vertical diversification, customer diversification and embedded & digital first offerings under the new management. Simultaneously, with completion of acquisition of Mistral Solutions Private Limited (Mistral), ACTL would be able to synergise their offerings to existing and potential customers. CARE Ratings Limited (CARE Ratings) takes note of refinancing of the high-cost non-convertible debentures (NCDs), which were availed acquisition of Mistral, with a relatively low-cost borrowings and for slightly longer tenor.

The ratings continue to factor in the established operational track record of the company with marquee customers supported by fair diversification across sectors and geographies and experienced management.

Although these rating strengths are partially offset by moderation in the capital structure and debt coverage indicators due to pre-dominantly debt-funded acquisition of Mistral, they are still at satisfactory levels. The ratings are also constrained by moderate scale of operations in a highly fragmented and competitive industry in which the company operates, prospects of the company dependent upon the end-user industry's operational performance & investment climate, and susceptibility of profitability to foreign fluctuation risks.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Improvement in the revenues beyond ₹1,000 crore while maintaining return on capital employed (ROCE) above 20% and interest coverage ratio above 5x.
- Overall gearing < 0.50x or total debt/PBIDT < 1.50x.

#### Negative factors

- Decline in the revenues to below ₹650 crore, ROCE below 15% or total debt/PBDIT > 2.5x.

#### Analytical approach: Consolidated

ACTL has established subsidiaries in various geographies and acts as on-shore centres. The business model entails a high amount of integration of ACTL with its subsidiaries, and therefore, CARE Ratings has taken a consolidated approach to analyse the credit profile of ACTL.

The consolidated financials of ACTL considered for analysis comprise full-consolidation of subsidiaries mentioned in Annexure-6.

#### Outlook: Stable

Stable outlook is on account of the CARE Ratings' expectation on the improvement in the revenues of the company and sustainability of its existing PBIDT margins with addition of various new customers by the company in the past one year.

### Detailed description of the key rating drivers:

#### Key strengths

##### Significant improvement in performance of the company

The company's performance, on a consolidated basis, has significantly improved in FY23 with 34.6% growth revenues from ₹610 crore in FY22 to ₹822 crore in FY23 and improvement in PBIDT of the company by 108% to ₹148.5 crore in FY23 from ₹71.27 crore in FY22, majorly driven by increased traction in the Automotive and Energy, Aerospace, Product Engineering

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

Services (PES), and Product and Solutions (Defence) verticals. CARE Ratings expects that management's focus on consistent addition of new customers in diversified segments would de-risk ACTL from over-dependence on a single customer/vertical and will augur well for its long-term prospects.

### **Established operational track record supported by marquee customers**

ACTL commenced operation from 1990 and has more than two decades of satisfactory track record of operation. Satisfactory execution of the awarded projects enabled the company to establish its credentials, in acquiring marquee customers over the years and repeat orders from them, which has been the core strength of the company. CARE Ratings notes that the company has acquired these customers over the years, who are expected to continue carrying out the business considering their established relationship with the company. Also, the company continues to acquire new clientele as witnessed in the past one year, which augurs well for the revenues and profitability prospects of the company.

### **Fair diversification across sectors and geographies**

ACTL operates primarily across four sectors – aerospace, heavy engineering, automotive and industrial products, and renewable energy. With a share of 37%, heavy engineering is the largest part of ACTL's business followed by strategic tech solutions – 29%, aerospace – 28% and automotive and industrial products – 4%, while remaining in the renewable energy segment in FY23. In terms of geography as well, the revenues are well diversified across Europe, North America and Asia Pacific.

### **Key weaknesses**

#### **Moderation in capital structure**

Adjusted to the OCDs from the promoters which are expected to be converted into equity when due, overall gearing stood moderated at 0.71x as on March 31, 2023 (0.21x as on March 31, 2022) on account of the additional debt raised by the company to fund Mistral's acquisition. Nevertheless, ACTL has refinanced the high-cost debt availed for acquisition for longer tenor at relatively lower cost during Q1FY24. CARE Ratings expects that company's cashflow generation would sufficiently cover the debt repayments of refinanced debt. At the same time, any more acquisitions carried out through availing of significant additional debt by the company may impact the credit profile of the company and is a key monitorable.

#### **Intense competition in the industry**

The company is a marginal player, though it has established customer base across diverse industry segments. The operating environment of the end-user industry has a significant impact on the company's performance. Hence, the company constantly works on reducing overdependence on few customers, which otherwise can cause considerable disruption to its revenues. However, such expansion into new business segments/industry involves significant investments. The company also faces intense competition from global capability centres (GCCs), large players with strong financial resources as well as from niche players operating in a specific segment.

#### **Customer concentration risk**

On a consolidated basis, around 26% of ACTL's revenues during FY23 were from its top two clients (35% during FY22). The improvement is due to addition of new customers, general improvement in the business scenario of its customers post lifting of air travel restrictions across various countries coupled with diversification of revenues by the company. Considering the customer concentration, the company's performance largely depends upon the performance of these clients.

#### **Liquidity: Adequate**

The company's liquidity is driven from sustained improvement in operating cashflows and refinancing of term loan for longer tenor translated into high debt-service coverage ratio (DSCR) levels. On a consolidated basis, ACTL's cash and bank balances stood at around ₹109.4 crore as on March 31, 2023, as against minimal principal repayment obligations during FY24. On a standalone basis, ACTL's cash and bank balances stood at ₹16.8 crore as on March 31, 2023.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
