Short Term Bank Facilities	499.50 (Enhanced from 361.25)	CARE A2	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The ratings assigned to the bank facilities of Anmol India Limited (AIL) continue to derive strength from the experience of promoters coupled with long track record of operations and established business relationships with the customers and suppliers. Furthermore, the rating also continues to draw strengths from moderate scale of operations and profitability along with moderate solvency position and efficient working capital management.

However, the rating strengths are partially offset by customer and supplier concentration risk, inherent risk associated with the trading business and low profitability margins and susceptibility to regulatory changes, volatility in international prices and foreign exchange fluctuations.

Rating sensitivities: Factors likely to lead to rating actions.

Positive factors

- Improvement in gross cash accruals more than Rs. 40 crores.
- Improvement in capital structure at net debt level (net of lien marked cash and cash equivalents) as reflected by overall gearing below 0.60 times.

Negative factors

- Significant decline in the scale of operations or PBILDT margins falling below ~1.50%.
- Deterioration in the solvency position at net debt level with overall gearing of above unity owing to increased working capital dependence.

Analytical approach: Standalone

Outlook: Stable

The continuation of "Stable" outlook to the bank facilities of AIL takes into account continuing capabilities of the management due to its long track record of operations to mitigate the inherent risk related to fluctuations in raw material prices and competitive nature of operations.

Detailed description of the key rating drivers:

Key strengths

Experienced and resourceful promoters:

AIL is promoted by Vijay Kumar, Tilak Raj and Chakshu Goyal. Vijay Kumar has been involved in the same line of operations for more than 3.5 decades. Tilak Raj also has an experience of around two decades, while the third director of the company, Chakshu Goyal (son of Vijay Kumar) has been engaged in AIL since the last seven years. Promoters are further supported by professional management team having rich experience in respective domain. Besides, promoters are resourceful and has extended continuous support to fund various requirements of the company in the past in the form of unsecured loans. The unsecured loans stood at ₹40.10 crore as on March 31, 2023 (PY: Rs. 39.66 crores) of which Rs 40 crores is subordinated to bank loan.

Long track record of operations and established business relationships with the customers and suppliers:

AIL has been in the coal trading business since 1998. Furthermore, the promoters of the company hold an extensive industry experience, which has helped the company in building strong business relationships with its clients and suppliers. AIL has a strong

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

and increasing customer base in Gujarat, Punjab, Haryana, Himachal Pradesh, Uttar Pradesh, Uttarakhand, Chandigarh, etc. Furthermore, majority of the sales of the company are made against advance orders at the pre-agreed prices, which protect the company from volatility in the prices of the coal.

Moderate scale of operations and profitability:

The total income of AIL continues to remain moderate and has increased by 33.09% during FY23 (Audited, refers to the period of April 01 to March 31) to Rs. 1410.24 crore from Rs. 1059.59 crore in FY22 (Audited, refers to the period of April 01 to March 31). Furthermore, during Q1FY24 (Unaudited, refers to the period of April 01 to June 30), the scale of company has booked revenue from operations of Rs. 480.16 crores as against Rs. 556.38 crores during Q1FY23 (Unaudited, refers to the period of April 01 to June 30). The improvement in the income during FY23 has been on account of the increased demand from the existing customers as well as addition of new clients coupled with rise in the coal prices. The profitability of the company also continues to remain moderate as reflected PBILDT and PAT margins of 2.03% and 1.32% respectively, in FY23 as compared to 2.13% and 1.46% respectively, in FY22. Although, in Q1FY24 scale of operations has been declined as compared to Q1FY23, however, profitability has been improved as reflected by PBILDT and PAT margins of 2.68% and 1.91% respectively, in Q1FY24 as compared to 1.96% and 1.46% respectively, in Q1FY23. Thus, owing to which, the company has generated cash accruals marked by GCA of Rs. 19.09 crore during FY23 (PY: Rs. 15.72 crores) and Rs. 9.28 crores in Q1FY24 (PY: Rs. 8.17 crores). The profitability of company is also supported by interest income and other non-operating income which stood at Rs. 7.92 crores during FY23 as compared to Rs. 4.97 crores during FY22.

Moderate solvency position:

The capital structure of the company continues to remain moderate as on March 31, 2023, on a year-on-year basis, as reflected by overall gearing ratios of 2.07x (0.82x on net debt basis) as on March 31, 2023, compared to 2.00x (0.51x on net debt basis) as on March 31, 2022. The slight deterioration in the capital structure was majorly due to higher utilisation of CC limits on balance sheet date for FY23 as compared to FY22. Furthermore, the term debt of the company is limited to unsecured loans infused by promoters and related parties only which is already subordinated to bank loan. The interest coverage ratio of the company also remained moderate at 2.61 times for FY23 as compared to 3.50 times for FY22.

Efficient working capital management:

The operating cycle of the company stood moderate at 52 days as on March 31, 2023 (PY: 28 days). The slight deterioration in operating cycle of was majorly due to higher inventory holding on balance sheet date of FY23, although majority of the inventory is sold in advance and directly shipped at client site from the port. Company has inventory holding of Rs 207 crores as on March 31, 2023, majorly due to arrival of fresh shipment which is against back-to-back orders from the buyers. Further, inventory holding has been reduced to Rs 150 crores as at August 31, 2023, which is against back-to-back orders of Rs 136 crores and Rs 14 crores of inventory are open which is directly supplied to brick kiln's and has better margins so as to cover fluctuation risks.

Furthermore, the company allows very limited credit period to its customers marked by average collection period of 14 days during FY23 (PY: 14 days). On the supplier side, the company makes advance payment to domestic suppliers while imports are backed by letter of credit, usually of 90 days. The company imports coal on sight LC and uses suppliers'/buyers' credit to defer its LC payment to the extent of tenor of LC. Suppliers'/buyers' credit outstanding as on March 31, 2023, was Rs. 130.88 crore (PY: 120.66 crores).

Key weaknesses**Customer and supplier concentration risk:**

The company derived around 42.23% of its total income in FY23 from the top five customers, which remained in similar line around 43.90% during FY22. This leads to slightly concentrated revenue stream. On the supplier side also top five suppliers formed around 45.46% of the purchase costs in FY23 against around 49.76% during FY22. Thus, any change in the policies or performance of the customers and suppliers will directly impact AIL.

Inherent risk associated with the trading business and low profitability margins:

The company is exposed to the risks associated with the trading nature of business like inherently low profitability margins, availability of the traded commodity in desired quantity and quality, etc. The company is also exposed to the competition in imported coal trading business due to low entry barriers. The PBILDT and PAT margins remained low at 2.03% and 1.32%, respectively, during FY23 (Audited; refers to the period of April 01 to March 31) against 2.13% and 1.46% in FY22 (Audited; refers to the period of April 01 to March 31). Further, PAT of company includes non-operating income (majorly includes interest income on FDRs) of ₹7.89 crores during FY23 (PY: Rs. 4.98 crores).

Susceptibility to regulatory changes, volatility in international prices and foreign exchange fluctuations:

Coal being a commodity has demonstrated significant volatility in its prices in the past. Imported coal prices are also governed by global demand-supply factors. Accordingly, any sharp adverse fluctuations in the coal prices can affect the profitability of AIL. Domestically, coal has remained a highly regulated commodity. Furthermore, coal importers also face regulatory risk in the form of custom duty variations, etc. The imports formed around 46% of the total purchase cost in FY23 valuing ₹686.14 crore against imports of ₹422.28 crore comprising around 39% during FY22. Although the company hedges the pricing and the exchange risk to a large extent, by booking purchases on confirmed buying orders from the customers which is also booked in foreign currency so as to mitigate raw material fluctuation risk and currency fluctuation risk, however, the profitability margins of the company are still exposed to a significant foreign exchange fluctuation due to absence of any complete hedging mechanism.

Liquidity: Adequate

The company has earned Gross Cash Accruals (GCA) of Rs. 18.65 crores during FY23 and is projecting to generate GCA of around Rs ~22 crores & Rs ~23 crores in FY24 & FY25 respectively as against nil scheduled repayment obligations as company don't have any term liabilities apart from unsecured loans from related parties of Rs. 40.10 crores. The current and quick ratio stood at a moderate level of 1.33x and 0.74x, as on March 31, 2023, as compared with 1.49x and 0.99x as on March 31, 2022. Since, company has inventory holding of Rs. 207.56 crores as at March 31, 2023, (PY: Rs 98.38 crores) leading to quick ratio below unity. However, working capital utilisation of non-fund-based limits remains high at 77.92% during last 12 months ending June 2023 and company also opens FD backed Letter of credit frequently.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
