| Long Term Bank Facilities | 70.95 (Enhanced from 66.46) | CARE BBB; Stable | Reaffirmed |

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The ratings assigned to the bank facilities of Kolors India Private Limited (KIPL) continue to derive strength from the extensive experience of promoters in electrical switches business, well established market position with brand name Kolors backed by strong distribution network, moderately diversified product mix and improvement in revenues although moderation in PBILDT margins in FY23 (refers to period April 31, 2022 to March 31, 2023). Furthermore, the ratings derive strength from moderate financial risk profile characterised by sizeable network base, moderate gearing levels and debt coverage indicators.

The rating strengths are, however, tempered by KIPL's moderate scale of operations and profit margins susceptible to fluctuations in raw material prices, working capital intensive nature of business as demonstrated by elongated operating cycle and prevailing intense competition due to fragmented nature of industry.

Rating sensitivities: Factors likely to lead to rating actions

Positive Factors

- Sustained improvement in scale of operations to over 350 crores and operating profitability margins to around 17% leading to higher gross cash accrual on a sustained basis
- Improvement in the operating cycle to below 150 days

Negative Factors

- Decline in PBILDT margin below 10% on sustained basis
- Elongation of operating cycle to over 215 days thereby impacting liquidity leading to higher working capital utilisation
- Increase in overall gearing beyond 1.50 times on a sustained basis

Analytical approach: Standalone approach

CARE has changed the approach to standalone from combined. As financial linkages between KIPL and Biyani & Sons does not exist. Furthermore, corporate guarantee issued by KIPL for the bank facilities of Biyani & Sons cease to exist.

Outlook: Stable

Stable outlook reflects that the rated company is likely to maintain its growth momentum as envisaged which shall enable it to maintain the envisaged operating performance over the near to medium term.

Detailed description of the key rating drivers

Key Strengths

Experienced promoters & established track record:

Kolors India Private Limited (KIPL) was established by Biyani Brothers having experience of more than four decades. Prior to this, the Biyani Brothers commenced business as a small trading company in 1970 that traded electrical wiring accessories in India. Later, the promoters incorporated a company named as Cosmo Electro Industries Private Limited in September 2004 and recently the company has been renamed as Kolors India Pvt Ltd. The company is into manufacturing of electrical switches and related accessories, wires, cables along with LED lighting products. The company gradually started manufacturing electrical switches and related accessories along with LED lighting products. Mr. Mahesh Biyani (Managing Director) has been managing finance and administration of the company since incorporation and commands significant industry experience. Other directors of the company – Mr. Umesh Biyani (looks after marketing) and Mr. Mukesh Biyani (looks after Production) are actively involved in the company operations and command experience of more than two decades in various industries.

Moderately Diversified product Mix:

KIPL offers more than 5,000 products under various categories. The portfolio includes products like switches, sockets, MCBs, plug tops, lamp holders, doorbells, distribution boxes, LED Lighting products, home automation and mounting box and other related accessories. During FY23, ~77% of the total revenue from switches and accessories and ~23% is from lighting segment.

Established market position with brand name 'Kolors' backed by a strong distribution network

KIPL manufactures and market the product in the brand name "Kolors" which is a well-known brand in Eastern India and is available across various parts of the country. The entity has a strong presence with four operational manufacturing plants complimented by around 11 Depots, 5,000 plus channel partners, more than 1,500 workforce and more than 5,000 products. The

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

entity has achieved a PAN India presence making product accessible to a sizeable audience. The widely spread network ensures a strong and continuous order position. KIPL derives around 61% of its revenues from Eastern India, followed by around 19% from Western region, around 13% from Southern region and 6% from Northern India.

Growth in total operating income and above average PBILDT margins

KIPL has been able to consistently grow its total operating income through addition of new products as well as increasing its distribution network. During the past four years, the total operating income of the entity grew at CAGR of around 20% to Rs.268.39 crore in FY23 from Rs.129.65 crore in FY19; however, on y-o-y the total operating income growth in FY23 was ~18%. The sales growth was evident across various product segment. PBILDT margin deteriorated by 243 bps on y-o-y basis and stood at 13.57% in FY23 as compared to 16.00% in FY22 owing to increase in employee cost coupled with selling expenses. Nonetheless PBILDT margins stood above average. Furthermore, achieving the envisaged operating margins remains key rating monitorable for the company.

Moderate financial risk profile

The financial risk profile of the company remained moderate, characterised by term loans, unsecured loans from promoters, bank borrowings. KIPL's capital structure stood moderately comfortable with an overall gearing at 0.48 times in FY23 as compared to 0.55 times due to accretion in profits and reduction in total debts. As on March 31, 2023, networth stood at Rs. 116.50 crores (PY-Rs. 97.70crores). Debt coverage indicators have remained at moderate levels with total debt to GCA (TD/GCA) at 2.24x in FY23 as compared to 2.10x in FY22. Further, its interest coverage ratio marginally deteriorated to 6.43x in FY23 as compared to 7.45x in FY22 owing to increase in interest expense.

Key Weakness

Moderate scale of operation with operating margin susceptible to volatile raw material prices:

Despite growth in scale of operations, the entity continues to be moderate player in the industry which is dominated by multinationals as well as large domestic players in the industry. Furthermore, the major raw materials are polycarbonate which are volatile in nature. The operating margins have been volatile as it remained in the range of 13.57% to 19.64% over the last three years. The moderate size of the entity in the industry may result in time lag in passing on any increase in the input prices and thus put pressure on its profit margins.

Working capital intensity demonstrated by elongated operation cycle due to high inventory levels

The operations are working capital intensive in nature as reflected by working capital cycle. The working capital intensity remains significantly high due to the elongated receivables and high inventory levels. During FY23, the business operations of KIPL are marked by elongated operating cycle of 191 days (PY-186 days), mainly due to elongated average inventory period of 123 days (PY-133 days) and average collection period of 126 days (PY-120 days). Average creditor period stood at 58 days (PY-68 days)

Stiff competition due to fragmented nature of the industry with presence of many unorganized players:

The electrical market is highly fragmented with the presence of a large number of unorganized players in India constraining the pricing power of organized sector players. There is high competition within the industry due to low entry barriers. Apart from unorganized sector, the group also faces competition from organized sector players. Also, the ever-increasing demand for high quality LED lights has encouraged manufacturers in India to enter into the business of manufacturing of lightings, fittings and allied components. The company faces intense competition due to the presence of a large number of organized & unorganized players in the segment which determines the negotiating power and the pricing ability of the company. Although the company benefits from its strong brand presence in market, and wide distribution network, it is always exposed to intense competition.

Liquidity position: Adequate

KIPL has adequate liquidity marked by adequate gross cash accruals against the moderate term loan repayment obligations of Rs. 6.50 crores to Rs. 8 crores in FY24 to FY26. The company has moderate debt repayments lined up over the medium term, which along with the limited planned capex of Rs. 10.50 crores which is expected to be operational by Nov-23. The company has negligible free cash and bank balance. Further, utilization of working capital limits remains high marked by average utilization of ~84% for last twelve months ended Jul-2023. During FY23, net Cash flow from operations stood at Rs. 16.96 crores (PY-7.43 crores). As on March 2023, current ratio stood at 1.82x (PY-1.75) and quick ratio stood at 1.13x (1.06x).

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
