Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The reaffirmation of the ratings assigned to the bank facilities and instruments of JSW Steel Limited (JSWSL) factors in the well-established position of JSWSL in the steel sector, being one of the leading integrated steel producers in the domestic market, having a diversified product profile and presence through manufacturing facilities across key strategic geographies, mainly catering to the southern, western, and central Indian market.

The ratings also factor in the group's strategy in securing captive iron ore and coal mine reserves, in an effort to continuously enhance its raw material security. The increasing share of value-added products, its flexibility to shift between the domestic and exports markets, and the rising share of raw material availability from captive mines has enabled the company to withstand adverse industry cycles.

JSWSL witnessed moderation in profitability during FY23 (FY refers to the period from April 01 to March 31), largely on account of a significant decline in finished steel prices as against volatile raw material prices (especially coking coal) and lower export volumes owing to the imposition of the export duty (from May 2022 to November 2022). The moderation in profitability was partially offset by an increase in the saleable steel quantity, with additional capacity onstream, and the healthy demand from end-user industries during the second half of FY23. With a decline in raw material prices in Q3 and Q4 FY23, JSWSL has witnessed an improvement in its profitability margins. The consolidated sales of the Indian operations for Q4FY23 was 6.35 million tonne per annum (mtpa). The company commissioned a 5-mtpa capacity at Dolvi, Maharashtra, in FY22 and 0.75 mtpa was added to Bhushan Power and Steel Limited's (BPSL's) plant in Odisha in FY23, taking the total capacity to 29.7 mtpa as on March 31, 2023, in India and the US (including capacities under joint control).

In Q1FY24, the company has recorded a consolidated sales of 5.71 mtpa, an increase by 32% over the same period the previous year. Going forward, CARE Ratings Limited (CARE Ratings) expects that although raw material prices will continue to remain volatile, domestic steel players are better placed to partially pass on the increase in raw material prices and record higher saleable steel volumes owing to the strong domestic demand and improving export volumes post removal of the export duty in November 2022.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

The liquidity profile of JSWSL is supported by cash and cash equivalents (includes margin money) of ₹13,466 crore as on June 30, 2023 (₹20,719 crore as on March 31, 2023). The total debt (TD) as on March 31, 2023, increased compared with March 31, 2022, due to borrowings on account of the capex, the impact of forex on the borrowings, and the increase in revenue acceptances. CARE Ratings expects the debt levels to remain at similar levels for at least 12-24 months with capital expenditure to be for capacity addition, as announced by the company.

JSWSL has announced a capex of ₹51,925 crore to be incurred over three years, funded through a mix of debt and cash accruals. The capex mainly comprises the Vijayanagar expansion, apart from BPSL expansion, investment in mines, downstream facilities, and sustenance capex. The prioritisation of cash accruals and available cash towards capex will keep the debt at similar levels for the next two years.

With the moderation in solvency indicators (overall gearing and net debt/profit before interest, lease rentals, depreciation and taxation [PBILDT]) surpassing the envisaged level for FY23, CARE Ratings believes the same was largely on account of an exceptional rise in raw material prices impacting the profitability for the year, in addition to the rise in working capital requirements. Going ahead, with significant correction in raw material prices along with normalisation of the industry cycle, CARE Ratings expects the same to improve over the next two-year period. The increase in the saleable steel quantity will further enable JSWSL to generate additional cash from operations, thereby improving the financial ratios, with improvement in profitability and accretion to net worth.

The above ratings' strengths are, however, tempered by the company's presence in a highly cyclical steel industry, forex exposure and commodity pricing risk, and commitments towards various capital-intensive projects.

CARE Ratings notes the completion of the scheme of amalgamation of JSW Ispat Special Products Limited (JISPL) with and into JSWSL w.e.f July 31, 2023.

CARE Ratings notes that JSWSL has repaid the aforementioned non-convertible debenture (NCD: ISIN INE019A07266) issue in full and there is no outstanding under the issue as on date. Taking cognisance of this, we hereby withdraw our rating for JSWSL's NCD issue with immediate effect.

### **Rating sensitivities: Factors likely to lead to rating actions**

#### **Positive factors**

- Adequate deleveraging of the capital structure through rationalisation of debt levels and/or equity infusion (improvement of overall gearing ratio and sustenance to below 1.50x).
- Consistent improvement in the net debt/ PBILDT ratio (annual) to below 2.0x.

#### **Negative factors**

- Sustained level of debt and deterioration of the net debt/PBILDT to above 3.00x on a sustained basis.
- Any unforeseen large debt-funded capex or acquisitions, thereby impacting the overall capital structure to above 1.50x.

### **Analytical approach**

CARE Ratings has adopted a consolidated approach. There are various subsidiaries, having significant operational and financial linkages. There is significant reliance of the subsidiaries on the parent, and business interlinkages are present between the parent and subsidiaries (The list of entities has been mentioned below under Annexure-6). The consolidated approach going ahead, also considers the financials of JISPL, which has been amalgamated into JSWSL.

### **Outlook: Stable**

The stable outlook reflects that the rated entity is likely to maintain its dominant market position, which, coupled with the favourable demand scenario in the domestic market, along with the ramping-up of the added capacity, will enable it to sustain its healthy business risk profile over the medium to long term.

### **Detailed description of the key rating drivers**

#### **Key strengths**

**JSWSL's established presence in the Indian steel industry, strong track record of the management in project execution, and cost management expertise**

JSWSL, with a steelmaking capacity of 28.20 mtpa (including entities under joint control) in the domestic market as on March 31,

2023, has a considerable presence in the Indian steel industry. Its multi-location steel manufacturing facilities produce various upstream and downstream products. Over the past years, JSWSL has ramped-up its capacities in a timely and cost-effective manner to become one of the leading steelmakers in India. Furthermore, the company has managed to maintain competitive margins due to its efficient operations. Apart from turning around stressed acquired assets, the company has demonstrated a strong track record in greenfield and brownfield project execution as well as cost management expertise. The company successfully integrated BPSL to increase its presence in northern and eastern India. The amalgamation of JISPL with and into JSWSL will enable JSWSL to increase its presence in central India. Moreover, JSWSL plans to take the near-term capacity in India to 37 mtpa in phases by FY25, through new capacity expansion and the de-bottlenecking of its existing facilities.

**Wide product offering**

JSWSL earns its revenues from a well-diversified portfolio of steel products. The product portfolio continues to be dominated by flat products, with a share of around 75% of the total sales volume in FY23 (73% for FY22). The share of margin-accretive value-added and special products (VASP) stood at around 57% during FY23 as compared with 60% during FY22. Export sales accounted for about 13% of the total sales in FY23. Export sales have declined post duty imposition from May 2022 to November 2022. With the removal of export duty, export sales are expected to improve in FY24 (15% export sales in Q1FY24).

**Moderation in performance in FY23; improvement in operating profitability in Q4FY23 continued through Q1FY24**

In FY23, JSWSL reported an operating income of ₹165,960 crore, PBILDT of ₹18,547 crore and profit-after-tax (PAT) of ₹4,139 crore. The substantially reduced export sales impacted the revenue growth and profitability of the company in FY23. Furthermore, the sequential fall in realisation in Q2FY23 and Q3FY23 impacted the profitability. In Q4FY23, the increase in realisation and volumes resulted in improved performance for the quarter.

Saleable steel sales increased to 22.39 mtpa in FY23 from 16.34 mtpa (excluding BPSL) in FY22 on a consolidated level. The share of value-added and special products was 57% of the total sales in FY23 compared with 60% in FY22. Export sales declined to 13% in FY23 as against 28% in FY22 due to the export duty imposed by the government.

Overseas subsidiaries, except for Ohio (US), Plates & Pipe Mill (US), and Piombino (Italy), posted profits at the operating level. Piombino's performance is likely to sustain in FY24 with rail orders from the Italian Government.

In Q1FY24, the company has recorded consolidated sales of 5.71 mtpa with a blended realisation of ₹74,000 per tonne. The total operating income (TOI) stood at ₹42,213 crore and PAT at ₹2,428 crore for the quarter ended June 30, 2023.

**Captive mines and power generation to support cost**

Iron ore is one of the key raw materials required for steel production. All 13 mines held by JSWSL have been operational (nine in Karnataka and four in Odisha), with 41% of the standalone operations iron-ore requirement met from the captive mines in FY23. Although these mines have been acquired at premium (payment linked to market price), it has led to consistency, availability, and yield improvement of iron ore, as reiterated by the management. Even so, the availability of captive mines can be considered as a long-term strategic advantage. For its coking coal requirement, the company is primarily dependent on imports, and hence, it is exposed to price volatility similar to other Indian players. The company continues to focus on backward integration by investing in its resource base to secure critical raw materials for the steel-making operations. The company has also set up a beneficiation plant, a coke oven plant, a pellet and sinter plant, thus helping yield improvements and cost reduction. As on March 31, 2023, the company has 1,770 MW of captive power capacity (includes BPSL's 506 MW capacity).

JSWSL has been declared as a preferred bidder for one iron ore block in Maharashtra, two iron ore blocks in Goa, and one iron ore block in Karnataka. The company has also been declared as the preferred bidder for two coking coal mines in the state of Jharkhand. CARE Ratings notes the company's plans to invest around ₹3,100 crore in new mines and to make it operational in two to three years. The investment in new mines will ensure raw material security and reduce logistics cost.

**Leveraged capital structure; solvency ratios to remain elevated in the near term**

On a consolidated basis, the TD level (including acceptances) stood at ₹107,615 crore as on March 31, 2023. The debt as on March 31, 2023, has increased from the March 31, 2022, level due to borrowings on account of capex, the impact of forex on borrowings, and the increase in revenue acceptances. The forex impact was around ₹3,101 crore and revenue acceptances stood at ₹25,739 crore, an increase by ₹9,220 crore from March 31, 2022.

The overall gearing ratio moderated to 1.65x as on March 31, 2023, from 1.37x as on March 31, 2022, due to debt addition and moderation in profitability. The net debt/PBILDT ratio stood at 4.69x as on March 31, 2023. However, comfort can be drawn from the cash and cash equivalents (includes margin money) of ₹20,719 crore available as on March 31, 2023. CARE Ratings believes that considering the capex plan of the company, which will be funded through a mix of debt and internal accruals, the debt levels are envisaged at similar levels for at least 12-24 months. However, with the increase in saleable steel quantity, supported by the strong domestic demand, the increase in realisations, and the not-so-significant volatility in raw material prices, the operating profitability is expected to improve for FY24, keeping the solvency ratios (overall gearing and net debt/PBILDT) within the acceptable levels.

#### **Amalgamation of JISPL with/into JSWSL**

JSWSL has announced the amalgamation of JISPL into and with JSWSL in May 2022, subject to regulatory approvals. The amalgamation has been completed w.e.f July 31, 2023. The manufacturing facility of JISPL is in Raigarh, close to JSWSL's captive iron ore mines. With the amalgamation, JISPL can source iron ore from the captive mines of JSWSL as against procuring from merchant mines of JSWSL, and since the captive mines are closer to the plant, sourcing will result in bringing down the cost of procurement. Furthermore, the coke required by JISPL's plant can be supplied by JSWSL, bringing down the overall cost of raw materials.

- Increase in capacity utilisation of JSWSL's rolling mill, intermediate products manufactured by JISPL's plant can be rolled in JSWSL's plant in Vijayanagar and Anjar.
- Simplified structure and reduced legal and regulatory compliance.
- JSWSL's increased presence in central India.
- Technological support from JSWSL.

#### **Acquisition of National Steel & Agro Industries Limited (NSAIL)**

NSAIL is a flat steel producer, which includes cold rolled (CR) coils, galvanised sheets, colour coils, and pre-painted sheets. For FY22, the company reported a turnover of ₹815 crore and a net loss of ₹215 crore, while in 9MFY23, the turnover was ₹468 crore with a net loss of ₹48 crore. JSWSL, through JSW Steel Coated Products Limited, acquired the company for a cash consideration of ₹621 crore.

NSAIL has an installed capacity of 300,000 TPA in the CR coils division, 330,000 TPA in the GP/GC unit, and 170,000 TPA in the colour-coated coils division. In addition, it also has a captive power plant with an installed capacity of 6 MW. JSWSL has a significant capacity of 13.5 mtpa in downstream facilities, producing value-added products and specialised products with higher margins. For FY23, value-added products contributed 57% to the sales. JSWSL is increasing its share of downstream and specialty steel used by auto to infrastructure sector.

#### **Steel outlook for FY24**

As per the World Steel Association, the demand for steel worldwide will witness a 2.3% growth in 2023 and 1.7% in 2024. The growth prospects and steel industry outlook in India is favourable. Recent changes in the export taxes and import duties on steel, complemented by the rising demand for affordable housing, infrastructure development and construction projects, has led to a pan-India need for steel metal. Steel prices are expected to stay under pressure due to the weak global demand and the decline in coking coal prices.

#### **Recent developments in the steel sector**

The Ministry of Steel signed 57 MoUs with 27 companies for specialty steel under the product-linked incentive (PLI) scheme. Under the scheme, the government has approved a sum of ₹6,322 crore for steel sector growth. The Budget 2023-24 presents several opportunities in other industries that will directly boost the consumption of steel.

#### **Regulatory risk – Removal of export duty imposed on iron ore, pellets, and steel intermediaries by the Government of India (GoI)**

The GoI has scrapped the duty levied by it on the export of iron ore, pellets, and steel intermediaries in November 2022.

#### **Key weaknesses**

##### **Commitment towards various capital-intensive projects and related risks**

The company has capex plans of ₹51,925 crore to be incurred during FY24-FY26, including the ongoing capex as well as the new capex projects announced. The capex plans include the expansion of the Vijayanagar (Karnataka) plant by 5 mtpa, 3 mtpa coke-oven plant at Vijayanagar supporting the 5-mtpa capacity, BPSL expansion, mining infrastructure at Odisha mines, the sustenance

capex, and others. The capex will be funded through a mix of debt and internal accruals and available cash balance. JSWSL has completed a 5-mtpa expansion at Dolvi, Maharashtra, along with cost-saving initiatives, like pellet plant, coke oven, and captive power generation facilities in FY22. Furthermore, BPSL's capacity expansion to 3.5 mtpa from 2.75 mtpa has also been completed in FY23. However, the timely ramp-up of the facilities as envisaged is paramount and will remain a key rating monitorable.

### **Exposed to foreign exchange risk**

Owing to the high dependence on imports for its coking coal as well as foreign currency denominated debt, the company remains exposed to forex risk, which is partially mitigated by way of its hedging policy, covering its revenue account fully on a gross basis and the next one year's debt service obligations. Also, the company has been a leading exporter, and hence, has a natural hedge to that extent.

### **Cyclicality of the steel industry**

The steel industry is sensitive to shifting business cycles, including changes in the general economy, interest rates, and seasonal changes in the demand and supply conditions in the market. Apart from the demand-side fluctuations, the highly capital-intensive nature of steel projects along with the delays in completion hinder the responsiveness of the supply-side to demand movements. This results in several steel projects bunching up and coming onstream simultaneously, leading to demand-supply mismatches. Furthermore, the manufacturers of steel products are directly exposed to the volatility of the steel industry.

### **Liquidity: Adequate**

The liquidity position is marked adequate with cash and cash equivalents (includes margin money) at ₹13,466 crore as on June 30, 2023 (₹20,719 crore as on March 31, 2023). The projected cash accruals for FY24, as supported by cash and cash equivalents, as on March 31, 2023, are adequate to cover its repayment and capex requirements for FY24. The repayment for FY24 of ₹14,618 crore can be comfortably met from the operating cash flow and available liquidity. The working capital limits are utilised at around 63% during the last 12-months ended August 31, 2023. The working capital utilisation has moderated from the March-April 2023 level with correction in commodity prices. JSWSL, being the flagship company of the JSW group, with a leading position in the steel industry, enjoys strong financial flexibility with strong access to the capital markets.

### **Assumptions/Covenants**

N4ot applicable

### **Environment, social, and governance risks**

CARE Ratings believes that JSWSL's environment, social, and governance (ESG) profile supports its strong credit risk profile. The steel sector has a significant impact on the environment owing to being energy-intensive, high-water consumption and waste generation, and also carbon emission. The sector's social impact is characterised by health hazards, leading to a higher focus on employee safety involved in mining and manufacturing activities and the well-being of the local community, given the nature of its operations. JSWSL has continuously focused on mitigating its environmental and social risks. Key highlights of the ESG initiatives are as below:

- To reduce specific carbon dioxide emission by more than 42% by 2030 compared to the base year of 2005.
- To be carbon neutral at JSW Steel Coated Products Limited by 2030.
- Increased use of scrap in steelmaking.
- To reduce specific energy consumption by 19% by 2030 compared to the base year of 2005.
- ₹10,000 crore earmarked for investments to reduce carbon emissions through various initiatives.
- Transition to renewable power usage through collaboration with JSW Energy Limited.
- 958-MW capacity of renewable energy to be set up in phases.
- Focus on zero-waste to landfill.

## About the company and industry

### Industry classification

Macro-economic Indicator	Sector	Industry	Basic Industry
Commodities	Metals and mining	Ferrous metals	Iron and steel

JSWSL is a part of the JSW group, which in turn, is a part of the O.P. Jindal group. The JSW group has presence across various sectors, such as energy, infrastructure, cement, paints, sports, realty, and venture capital. JSWSL is one of the leading steel producers, with a steelmaking capacity of 29.7 mtpa in India and the US (including capacities under joint control) as on March 31, 2023. In India, its integrated steel manufacturing units are located in Vijayanagar Works, Karnataka (12.5 mtpa); Dolvi Works, Maharashtra (10 mtpa); Salem Works, Tamil Nadu (1 mtpa); BPSL plant in Jharsuguda, Odisha (3.5 mtpa); and JISPL (1.2 mtpa) to produce a wide range of flat and long steel products. There is a 1.5-mtpa capacity steel plant in Ohio, in the US. Furthermore, through its wholly owned subsidiary, JSW Steel Coated Products Limited, the company is one of the leading producers of value-added downstream steel products in India, specialising in galvanised sheets, galvalume products, and high-end colour-coated sheets.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
