Short Term Bank Facilities	244.41 (Enhanced from 222.41)	CARE A2	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The reaffirmation in the ratings assigned to the bank facilities of DEE Development Engineers Limited (DDEL) continues to derive strength from the extensive experience of the promoters in pre-fabrication piping industry, company's long track record of operations and reputed client base. The ratings also continue to take comfort from the moderate financial risk profile of DDEL characterised by moderate overall gearing and debt coverage indicators. The ratings take cognisance of the growth in the total operating income (TOI) and profitability during FY23 (refers to the period April 01 to March 31) and Q1FY24 (refers to the period April 01 to June 30) largely on account of better execution of projects. The ratings also take note of filing of draft red herring prospectus (DRHP) by the company for raising ₹325 crore through public issue and an offer for sale of ₹0.79 crore by its promoter Krishan Lalit Bansal, the proceeds shall be applied towards reduction of debt, investment in subsidiaries and growth plans of the company.

These rating strengths, however, continue to remain constrained by the substantial exposure towards wholly owned subsidiaries which are yet to scale up the operations. The ratings also continue to remain constrained on account of working capital-intensive nature of operations indicated by elongated collection period, exposure towards volatile raw material prices and project execution and stabilisation risk.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Improvement in the operating cycle to below 180 days on a sustained basis.
- Improvement in the order book position to more than 1.50x providing adequate revenue visibility with PBILDT margin above 14%.
- Self-sustainable operations of subsidiaries on a sustained basis.
- Successful funds raising through initial public offer (IPO) and resultant improvement in financial risk profile of the company.

Negative factors

- Further elongation in the operating cycle beyond 300 days adversely impacting liquidity position of the company.
- Operating margins declining below 10% on a sustained basis.
- Diminishing order book reported below ₹350 crore and gross cash accruals (GCA) below ₹40 crore on a sustained basis.
- Any higher-than-envisaged increase in exposure towards subsidiaries or debt-funded capex undertaken by the company.

Analytical approach: Standalone approach after factoring in the exposure towards the wholly owned subsidiaries, namely, Malwa Power Private Limited (MPPL), DEE Fabricom (India) Private Limited (DFIPL) and DEE Piping Systems (Thailand) Co. Ltd (DEE Thailand).

Outlook: Stable

Stable outlook reflects CARE Ratings Limited's (CARE Ratings') opinion that the company will continue to benefit from its experienced promoters and reputed clientele along with moderate revenue visibility in near term with unexecuted orders in hand of ₹456.24 crore as on September 01, 2023.

Detailed description of the key rating drivers:

Key strengths

Experienced promoters and long track record of operations

DDEL is promoted and managed by Krishan Lalit Bansal having technical qualification and vast experience of nearly three decades in similar nature of business. The company has been running operations since 1988 and is one of the leading players in the pre-fabrication piping industry in India, and over the years, has also built-up its presence in the export market.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Reputed client base albeit exposed to concentration risk

DDEL mainly caters to multinational original equipment manufacturers (OEMs) of oil and gas, power generation equipment, engineering, procurement and construction (EPC) contractors, etc., which have been providing orders on repeated basis to the company. Top 10 customers in FY23 contributed close to 67.69% in TOI of the company compared with 73.02% contribution in FY22, thus exposing the company to customer concentration risk, and any changes in the procurement policy of these customers may adversely impact operations of the company, however, the long and established track of the company with reputed customers mitigates the said risk to an extent.

Moderate order book position

DDEL has unexecuted order book of ₹456.24 crore as on September 01, 2023, compared with ₹511.07 crore as on September 01, 2022, noted during last rating review indicating moderate revenue visibility for near term. The said orders are generally executed over a period of 9-12 months. Out of the total order book, 62.45% pertains to fabrication & fittings (PY: 44%) while 37.55% pertains to job work business (PY: around 56%) where material is provided by the client. The company's order book is concentrated with the top five orders comprising approximately 43.22% (PY: 61%) of the total order book thereby exposing its revenues and cash flows to risks of delays in execution of these orders.

Improvement in scale of operations and profitability during FY23 and Q1FY24

DDEL reported healthy growth of 35.33% in TOI to ₹509.46 crore during FY23 from ₹376.47 crore in FY22 largely on account of better project execution and increasing proportion of job work revenue from 15.39% in FY22 to 30.51% in FY23. The company also operates a biomass power plant situated at Abohar, Punjab contributing approximately 7.81% of TOI in FY23 (PY: 10.71%) supplying power to Punjab State Power Corporation Limited (PSPCL) under long-term power purchase agreement (PPA) contract of 30 years valid till 2039 at average PPA rate of ₹6.93 per unit. The gross capacity utilisation factor (CUF) levels for past 12 months ending with June 30, 2023 have been satisfactory around 90%. The PBILDT margins reported by the company remains satisfactory and stood at 12.25% in FY23 compared with 12.71% in FY22 albeit improvement of 30.44% on absolute level. Further during Q1FY24, the company reported revenue achievement of ₹130.00 crore with PBILDT margin of 12.90%.

Moderate capital structure and debt coverage indicators

Capital structure of the company remains moderate with net worth base of ₹471.66 crore as on March 31, 2023 (PY: ₹454.49 crore) as against total debt of ₹384.67 crore as on March 31, 2023 (PY: ₹277.58 crore) represented by overall gearing of 0.67x as on March 31, 2023, slightly moderated from 0.50x as on March 31, 2022. The interest coverage ratio reported stood satisfactory in similar range at 2.18x for FY23 (PY: 2.21x). The total debt/ PBILDT also stood moderate at 5.05x as on March 31, 2023 compared with 4.72x as on March 31, 2022. The company has filed DRHP for raising ₹325 crore through public issue, the proceeds shall be utilised towards reduction of debt, investment in subsidiaries and growth plans of the company.

Key weaknesses**Exposure towards subsidiaries**

DDEL has investments aggregating ₹68.20 crore as on March 31, 2023 (PY: ₹68.20 crore) in its subsidiary companies (MPPL, DFIPL and DEE Thailand). The company has also extended financial support to its subsidiaries in form of inter corporate loans which stood at ₹84.72 crore (PY: ₹72.60 crore) to service debt repayments and ramp-up of operational performance. Furthermore, the bank facilities of subsidiaries are backed by corporate guarantee provided by DDEL to the extent of ₹69.21 crore (PY: ₹51.68 crores). Going forward, CARE Ratings expects group exposure to remain at similar level, and further notes that the improvement in operational performance of subsidiaries and any increase in financial support provided by DDEL shall be crucial for the company's credit profile and shall remain a key monitorable.

Working capital intensive nature of operations

The operations of the company are working capital intensive with elongated inventory and collection period of 192 days in FY23 (PY: 212 days) and 95 days (PY: 151 days), respectively, the change is mainly on account of increasing job work business in the company. The operating cycle stands at 205 days as on March 31, 2023 slightly improved from 276 days as on March 31, 2022. Going forward, any further stretch in working capital requirement shall be key rating sensitivity.

Exposure to raw material price volatility risk

The major input material used by the company for fabrication is steel pipes, total cost of materials consumed constituted around 39% of TOI in FY23 (PY: 49%) as the job work revenue increased from 15.39% of TOI in FY22 to 30.51% in FY23. The prices of steel pipes are linked to demand-supply scenario of market and the company generally enters into the fixed-price contracts with customers in piping segment and hence any sharp variation in input costs may impact the margins of the company as there is no pass on. However, the risk is partially mitigated as DDEL makes back-to-back arrangements with the suppliers as soon as the order is secured. Going forward, CARE Ratings notes that the ability of the company to effectively manage the RM prices volatility shall remain imperative from credit perspective.

Project execution and stabilisation risk

The company is setting up a new facility in Gujarat with a capacity of 12,000 MT at total cost of ₹60 crore which is to be funded through ₹40 crore debt while remaining ₹20 crore shall be funded through internal accruals. Out of the said project cost, the total expenditure incurred is ₹12 crore till September 2023 and is expected to be operational by January 2024. DDEL is also developing

another facility at Numaligarh Assam with a capacity of 6,000 MT at total cost of ₹22.50 crore which is funded through debt of ₹15 crore and remaining from internal accruals. Entire amount has been incurred and tentative start date is November 2023. Given the under-execution stage of both the projects, the company remains exposed to project implementation risk and stabilisation risk thereafter.

Liquidity: Adequate

The liquidity position is adequate marked by expected cash accruals of around ₹52.81 crore against standalone principal debt repayment of ₹11 crore in FY24. Furthermore, the company has unutilised fund-based working capital limits of around ₹11 crore as on July 31, 2023 providing some buffer to meet any exigencies. With a gearing of 0.67x as on March 31, 2023 and undisbursed term loan of ₹25 crore, the company has sufficient headroom, to meet its capex requirements.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
