

## Indo Count Industries Limited

November 30, 2023

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long-term bank facilities	278.54 (Reduced from 358.51)	CARE AA-; Stable	Reaffirmed
Short-term bank facilities	1,397.00	CARE A1+	Reaffirmed

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The reaffirmation of the ratings assigned to the bank facilities of Indo Count Industries Limited (ICIL) factors in the sustained improvement in the overall credit profile of ICIL in FY23 and H1FY24. The business risk profile continues to remain healthy with stable performance in FY23 and improved performance in H1FY24. Global slowdown in demand resulted in volume degrowth of 1.45% which was offset by improved realization driving growth of 2.45% in total operating income (TOI) in FY23. With restocking by retailers and festive season, H1FY24 recorded significant recovery in TOI growth of 13.13%. With global stagflation, sustainability of healthy order flows will remain monitorable. However, increase in revenue mix from value-added products would ensure stable revenue growth while maintaining healthy margins.

The ratings also continue to factor that despite partial debt-funded capex plans over the last two years, the financial risk profile continues to remain comfortable supported by strong capital structure and debt coverage metrics. The steady accretion to reserves, scheduled debt repayments and absence of significant capex plans will aid the financial risk profile to improve over the medium term.

Furthermore, the ratings continue to derive strength from its strong business profile - being one of India's leading home textile suppliers with the highest processing capacity and exporters of bed linen with global reach, experience of promoters in home textiles segment, and the reputed clientele profile. Improvement in production capacity utilization post capacity addition (Bhilad plant) leading to significant increase in scale and operating margin is yet to be seen.

The ratings are, however, tempered by risks of the concentration of products, customers, and geography; the susceptibility to fluctuations in raw material prices and foreign exchange, both imparting volatility to profitability; and the cyclical and competitive nature of the home textile industry.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Improvement in revenues above ₹3,500 crore on a consistent basis while sustaining profit before interest, lease rentals, depreciation, and taxation (PBILDT) margin in the range of 18-20%\*.
- Improvement in its net debt/PBILDT to below unity on a sustained basis.

#### Negative factors

- Any further elongation in the inventory period, leading to an operating cycle stretching beyond 200 days on a sustained basis.
- Deterioration in the overall gearing to 0.75x and above on a sustained basis.

\*excluding non-operating income

#### Analytical approach: Consolidated

CARE Ratings Limited (CARE Ratings) has analysed ICIL's credit profile by considering the consolidated financial statements owing to the financial and operational linkages between the parent and subsidiaries, common management, and fungible cash flows, and the corporate guarantee given by ICIL on behalf of its foreign subsidiary. The list of subsidiaries is presented in Annexure 6.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

**Outlook: Stable**

The 'Stable' outlook reflects that ICIL's financial risk profile is expected to remain comfortable over the medium term on account of steady accretion to reserves, scheduled debt repayments and absence of significant capex plans.

**Detailed description of the key rating drivers:****Key strengths****Experienced promoter in the home textile segment**

ICIL was established in 1988 by Anil Kumar Jain, Executive Chairman, who is a first-generation entrepreneur and has experience of more than three decades in the textile industry. He has been instrumental in establishing ICIL as one of the leading home textile export houses. He is supported by his son, Mohit Jain, Executive Vice Chairman, and is assisted by a team of experienced professionals.

**One of India's leading suppliers and exporters of bed linen with a global reach**

ICIL has emerged and established itself as one of India's top three suppliers and exporters of bed linen. It is among the leading bed sheet suppliers in the US. ICIL's product portfolio is spread across various products in the home textile market, offering different qualities. It derives its competitive strength through expertise in designing and processing (printing, bleaching, and dyeing) bed linen. ICIL's wide range of product mix helps it maintain its position as one of the leading players in the industry, catering to a large number of clients, which includes top global retailers and renowned international brands.

**Improvement in operating margins**

During FY23, despite recessionary trend in Europe and cut down on non-essential expenses in the US amid high inflation, total operating income remained stable and improved marginally by 2.45% and stood at ₹3,025 crore as against ₹2,952 crore in FY22 due to marginal improvement in realisations by 2.49% to ₹372.64 per metre, despite a marginal volume de-growth of 1.45% in FY23 partly aided by acquisition of home textile business of GHCL. India's home textile export market in FY23 was affected by volatile domestic cotton prices and excess inventory build-up with US retailers. Better hedging of cotton prices, higher contribution from value-added products (around 19%) and ICIL's ability to pass on higher input prices to the customers resulted in healthy operating profit margins of 15.49% in FY23 (PY: 18.60%). During H1FY24, ICIL's TOI improved by 13.13% and stood at ₹1,750.39 crore as against ₹1,547.18 crore in H1FY23 driven by improved demand due to restocking at retailers end since Q1FY24 in key export markets. During H1FY24, the PBILDT and PAT margins improved to 16.54% and 10.74% respectively.

**Comfortable debt coverage metrics**

ICIL's financial risk profile is driven by the generation of comfortable cash flows resulting into comfortable capital structure and debt coverage metrics. The company has extended a corporate guarantee (CG) on behalf of its foreign subsidiary. The adjusted overall gearing after factoring in the guarantee improved and remained comfortable at 0.52x (PY: 0.86x) as on March 31, 2023, primarily on account of lower working capital utilisation of ₹596.11 crore (PY: ₹1,188.05 crore). During the same period, the company's interest coverage ratio and total debt (TD) to gross cash accruals (GCA) remained comfortable at 7.51x (PY: 11.60x) and 2.51x (PY: 3.37x), respectively. The financial profile of the company improved during H1FY24 with TD to GCA of 1.81x and interest coverage ratio of 8.90x. As on September 30, 2023, the debt coverage metrics have improved primarily on account of accretion of profits and scheduled repayment of debt obligations.

**Key weaknesses****Elongated working capital cycle, albeit order-backed inventory**

The working capital cycle of the company continues to be elongated on account of the high inventory period, as the company has to maintain an adequate inventory in order to meet its customer demands in a timely manner. The ability of the company to efficiently manage the working capital cycle will be a key monitorable. The average working capital utilisation remained high, at 70% during the last 12 months ended October 31, 2023. However, for the month ended October 31, 2023, the average working capital utilization remained moderate at 53%.

**Risk of product, customer, and geographic concentration**

ICIL's revenue profile continues to be concentrated, with the top client contributing around 21% (PY: around 26%) and the top five clients contributing nearly 46% of the total sales in FY23 (PY: around 66%), although the risk is mitigated to some extent given the established and long-standing relationships with these customers. Furthermore, the majority of the export revenues, i.e., nearly 74% of the total sales is being derived from the US. The company is also present in the European region and has also expanded in new markets such as Canada, Australia, Middle East, etc. However, the US by far continues to dominate as the largest export destination for ICIL. The ability of the company to increase its sales outside the US and reduce its dependence on its top customers' needs to be seen.

### Susceptibility to fluctuation in raw material prices and forex rates

The company remains exposed to raw material movements and may have to absorb any adverse fluctuations in raw material prices. However, the risk is mitigated to a certain extent, as it mainly follows the order-based production policy, which minimises the raw materials and inventory fluctuation risk. ICIL is primarily engaged in the manufacturing and exports of home textiles. Being a net exporter, it is inherently exposed to foreign currency fluctuation risk. Given the sharp fluctuations in the US Dollar/IN Rupee rate in FY19, the company changed its strategy to hedge forex exposure up to 12 months in the range of 60-65% against the earlier policy of hedging forex exposure up to 18 months and in the range of 75-85%. The company's margins remain exposed to forex rate fluctuation.

### Competitive industry

The global home textile market is mainly driven by demand from the US, which is the largest home textile player. This demand is catered by countries like China, India, Turkey, Pakistan, Vietnam, etc. The Indian export home textile market is dominated by a few large players such as Welspun India, Indo Count, Himatsingka Siede, Trident, etc. These organised and larger players mainly cater to export demand from large global retailers and face competition from countries like China, Turkey, Pakistan, Vietnam, etc.

### Liquidity: Strong

ICIL has strong liquidity with cash and liquid investments of ₹172.52 crore as on September 30, 2023, and has generated GCA of ₹235.24 crore in H1FY24. The same is sufficient to service scheduled debt repayments of ₹58.46 crore in FY24. The company's average working capital utilisation remained high, at 70% for the last 12 months ended October 31, 2023. However, for the month ended October 31, 2023, the average working capital utilization remained moderate at 53%.

### Environment, social, and governance (ESG) risks

**Environmental:** The company's policies and actions are principally aimed at reducing CO2 emissions and it aims to net zero by the year 2050. The company plans to reduce Scope 1 & Scope 2 GHG emissions by 33% in its operations by 2030. It also plans to reduce Scope 3 GHG emission by 14.8% in its supply chain by 2030. The company also focuses on optimising its energy consumption, adopting a dual approach – reduce and recycle and moving towards renewable energy. The company has moved part of its energy source from thermal to renewable sources. It has installed solar panels which generate about 4.92 mn units of electricity. It has also installed a biogas plant to generate energy for internal consumption.

**Social:** The company's CSR activities are directed towards areas of education, healthcare, agriculture and livelihood improvement initiatives, water and sanitation, environment and supporting the differently abled. These CSR activities are carried out keeping in mind the preference for local areas where the company operates. The activities revolve in and around the Kolhapur & Vidarbha areas of Maharashtra, and the Bhilad area of Valsad District in Gujarat.

**Governance:** The company lays strong emphasis on integrity, compliance, transparency and accountability. With seven independent and four executive directors the company has a good mix of independent and executive directors.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
