

## La Opala R G Limited

January 04, 2024

Facilities	Amount (₹ crore)	Ratings <sup>1</sup>	Rating Action
Long-term bank facilities	5.00	CARE AA; Stable	Reaffirmed
Long-term / Short-term bank facilities	5.00	CARE AA; Stable / CARE A1+	Reaffirmed
Short-term bank facilities	3.00	CARE A1+	Reaffirmed

Details of facilities in Annexure-1.

### Rationale and key rating drivers

The ratings assigned to the bank facilities of La Opala RG Limited (LORGL) continue to derive strength from the leadership position of the company in the domestic opal-ware segment with a strong brand image. The company has a wide product range catering to both economy and premium segments, supported by its established distribution network along with presence in the export market.

The ratings also derive comfort from its superior profitability margin, comfortable capital structure with low debt level and strong liquidity maintained by the company in the form of mutual fund investments.

The ratings also take note of the healthy financial performance of the company in FY23 (refers to the period April 1 to March 31) and H1FY24. With continuing increase in demand and healthy market share of LORGL in the opal-ware segment supported by the recent increase in capacity, the profitability and debt coverage indicators are expected to remain healthy going forward.

The ratings, however, continue to remain constrained by the susceptibility of its profitability to volatility in raw material prices, foreign exchange fluctuation risk, working capital-intensive nature of operations and competition from substitute products, cheaper imports and other domestic players.

The ratings also take note of the planned capex for setting up a borosilicate unit to further diversify the revenue profile of the company and complement its existing product portfolio. The capex is expected to be entirely funded through internal generations/available liquidity. However, the timelines for the project are yet to be finalised.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Significant increase in the scale of operations including diversification of product portfolio while earning PBILDT margin in excess of 40% on a sustained basis along with maintaining its healthy leverage and debt coverage indicators.
- Significant increase in market share of LORGL.
- Improvement in the operating cycle below 70 days.

#### Negative factors

- Reduction in the liquid investments held by the company to below ₹150 crore.
- Deterioration in debt coverage indicators with total debt to gross cash accruals (TD/GCA) going above unity on a sustained basis.
- Inability to grow its total operating income (TOI) at a healthy pace along with significant moderation in its PBILDT margin and return on capital employed (ROCE) due to sustained competitive pressure.

### Analytical approach: Standalone

#### Outlook: Stable

The stable outlook reflects that LORGL is expected to sustain the financial risk profile given its established position in the domestic opal-ware segment with a strong brand image and favourable demand scenario.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

## Detailed description of the key rating drivers:

### Key strengths

**Leadership position in the domestic opal-ware segment and strong brand image:** LORGL, promoted by Sushil Jhunjunwala in 1987, started its operations of manufacturing opal-ware products with its first opal glass plant in 1988 and expanded its capacity over the years. In 1996, the company started its first crystal glass plant.

The company has been operating in the opal-ware segment for more than three decades and has a leadership position in the domestic opal-ware segment. The company is also operating in the glassware segment for more than two decades. Over the period, the company has developed a strong brand image for its opal and crystal-ware products. Furthermore, the company launched its premium product range through the 'Diva' brand in 2008. To cope with the increasing lifestyle changes, the company focuses significantly on research and development (R&D) and introduces new designs every year. With the recent increase in capacities, CARE Ratings Limited (CARE Ratings) expects LORGL to maintain its leadership position in the opal-ware industry.

**Wide product range catering to both, economy and premium segments:** With planned design and a price-interactive range, the company targets different socio-economic segments. It sells its opal-ware products under two brands – 'La Opala' (caters to economy segment) and 'Diva' (caters to premium segment), and glassware products under 'Solitaire' brand (caters to premium segment). Under 'Diva', the prominent brands are 'Classique', 'Ivory', 'Cosmo', 'Quadra' and 'Sovrana'. Each segment carries a price premium over the other, leading to improvement in the blended operating margin.

**Established distribution network and marketing arrangements:** LORGL sells its products through a network of about 20,000 retailers and 200 distributors in India, across around 600 towns (as on March 31, 2023). The domestic sales accounted for 90% of LORGL's sales in FY23 (84% in FY22). The company exports its products to more than 30 countries across the world. Majority of the company's sales are through its distribution network, followed by organised retail markets, wherein sales are made to major retail chains. It also relies on institutional sales where the products are sold directly to large corporates and canteen stores department. The exports are made directly to private parties, who sell the same under their brand name. The company exports its finished products mainly to West Asia, Brazil and the UK.

**Improvement in sales and profitability in FY23; lower sales but improved profitability in H1FY24:** The TOI of the company witnessed a growth of about 40% y-o-y in FY23 on account of increased production because of the higher capacities (after commissioning of green field project in Sitarganj) and higher demand through pick-up in real estate, household and Hotel, Restaurants, Caterers (HoReCa) segment. The PBILDT and profit after tax (PAT) margins also slightly increased from 37.92% and 27.08%, respectively, in FY22 to 38.06% and 27.19%, respectively, in FY23, on account of increase in sales and realisations. The company earned Total Operating Income (TOI) of ₹175.46 crore in H1FY24 against TOI of ₹217.07 crore in H1FY23. The decrease in revenue was because of the challenging external environment and subdued consumer spending and one-time bulk order received in H1FY23. Also, the festive season spending shifted to third quarter in the current year. The PAT margin, however, witnessed an improvement, from 27.24% in H1FY23 to 34.14% in H1FY24, on account of higher non-operating income from the large investment portfolio. The interest coverage ratio continued to remain healthy at around 23x in H1FY24.

**Comfortable capital structure with very low debt level, expected to continue going forward:** The capital structure of the company continues to remain strong with low debt level. The company had availed a term loan of ₹12.50 crore in FY22 for part funding its capex. Low level of total debt imparts good financial flexibility to the company, which has also resulted in comfortable capital structure. The debt coverage indicators also continued to remain strong, with TDGCA of 0.08x and total debt to PBILDT of 0.07x, as on March 31, 2023. The overall gearing ratio remained comfortable at 0.02x, as on March 31, 2023. Going forward, with no debt-funded capex planned and working capital being funded through the healthy cash generations, the capital structure is expected to remain comfortable.

**Growing demand:** Glassware, which includes decorative glassware, tableware, lamps and lamp-wares, drinking containers, etc., is expected to continue witnessing an increase in demand led by the pick-up in real estate and the HoReCa segment. There is significant demand potential from the semi-urban sector as well, with rising disposable income.

### Liquidity: Strong

The liquidity of LORGL is marked by strong accruals against very low debt repayment obligations and significant liquid investments available to the tune of ₹432.15 crore, as on September 30, 2023. With 0.02x gearing as on March 31, 2023, the company has sufficient gearing headroom to raise additional debt for its capex, if required. The company proposes to fund the upcoming capex through surplus cash accruals and available liquidity, which is expected to be sufficient to meet the requirement. The average fund-based working capital limit utilisation for the trailing 12-month period ended November 2023 stood low at around 14%.

**Key weaknesses**

**Profitability susceptible to volatility in raw material prices:** LORGL's raw materials (soda ash, borax, sodium silico fluoride, quartz powder, etc.) accounted for 31% of its cost of sales in FY23 vis-à-vis 33% in FY22. One of the major raw materials – quartz powder – is domestically sourced from Rajasthan and others – soda ash, boric acid, etc. – are also majorly procured locally. The price of soda ash has been volatile, it decreased in FY23, before increasing again in the current year.

Chemicals like borax and fluorspar are mainly imported from Turkey, US, China and other countries. Given that the prices of raw materials are volatile in nature and LORGL does not have any long-term agreements for their procurement, LORGL's profitability is susceptible to fluctuation in the raw material prices. Furthermore, power and fuel cost comprised 28% of the cost of sales of LORGL in FY23 (24% in FY22, 16% in FY21). Power is sourced from Uttarakhand Power Corporation Limited and Jharkhand Bijli Vidyut Nigam Limited. In FY21, the company had received rebate from the power providers due to the pandemic, which had led to lower costs.

**Foreign exchange fluctuation risk:** LORGL's profitability is exposed to the fluctuation in foreign exchange rates. Until FY20, the company was a net exporter enjoying a natural hedge for its import obligations on account of matching export receivables. During FY21, exports witnessed a decline while imports increased, mainly on account of the import of capital goods to be used for the new plant coming up in Sitargunj. However, in FY22, exports increased yet again with easing out of the COVID-19 related restrictions. Though exports decreased slightly in FY23, the company continues to be a net exporter for its finished goods vis-à-vis its import of raw materials and components and spare parts. Any timing mismatch in the receipt of export proceeds vis-à-vis payment of import payables can make LORGL susceptible to forex fluctuation risks. Depending upon the market scenario, the company hedges its foreign currency exposure.

**Working capital-intensive operations:** LORGL's business is inherently working capital-intensive, marked by high average inventory period. As the company sells a large variety of products, which come in different shapes, sizes, colors and designs, it has to maintain sufficient amount of inventory for each of its product types. The inventory holding period stood at around 81 days in FY23, increased from 64 days in FY22. In the case of exports, the company either collects advance or the orders are LC-backed. Furthermore, LORGL also has to offer a credit period of around 45-60 days to its domestic customers while payment to its suppliers is made in a months' period. The average collection period decreased from 39 days in FY22 to 27 days in FY23, in view of its improved distributor network.

**Risk associated with implementation and stabilisation of projects:** The company is in the planning process of setting up a borosilicate plant at an estimated cost of ₹70 crore, which is to be funded through internal accruals and existing liquidity. The project timelines and schedule are yet to be finalised. The company remains exposed to the pre-implementation and post-implementation risks associated with the project.

**Competition from substitutes, cheaper imports and other domestic players:** The industry faces competition from easy substitutability with various other segments of tableware (such as steel ware, melamine, bone china, ceramic, etc.). Furthermore, durability is the key issue in Indian households and lack of awareness regarding opal-ware qualities, such as chip and scratch resistance, affordable pricing, etc., has resulted in lower penetration even after 30 years of its launch. Intense competition requires considerable effort on building the distribution network and expenditure on advertising and sales promotion to sustain and build the market share.

The company also faces competition from cheap imports from China and UAE. The Government of India had re-imposed anti-dumping duty (ADD) on import of opal-ware from China and UAE for a period of five years starting from August 2022 to curb the rising imports. CARE Ratings believes the measures taken by the Government of India to be favourable to safeguard domestic players like LORGL from cheap imports.

**Environment, social, and governance (ESG) risks**

The company has moderate carbon footprint, with a modest amount of fossil fuels utilized for its production purposes. The waste generated during production is recycled.

The company invests in customer cum vendor relationships and social responsibility. It spent ₹2.01 crore for various Corporate Social Responsibility (CSR) projects and initiatives in FY23.

It prioritises the values and strategies with which its business is conducted. It has a whistle blower policy and vigil mechanism in place which is regularly reviewed by audit committee, with no complaints received under the head during FY23. The board of directors comprises of eight members out of which four are independent directors.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
