

## Federal Mogul Goetze India Limited

March 11, 2024

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long-term bank facilities	58.50 (Reduced from 74.50)	CARE A+; Stable	Reaffirmed
Short-term bank facilities	141.00 (Enhanced from 121.00)	CARE A1+	Reaffirmed

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

Ratings assigned to bank facilities of Federal Mogul Goetze India Limited (FMGIL) continue to derive strength from the company's strong parentage and demonstrated support of the Federal Mogul group in terms of FMGIL's access to the group's global managerial and technological expertise. Ratings also factor in FMGIL's dominant market position and long track of operations in the piston and piston rings business, its reputed customer base, a diversified revenue stream, business distributed across multiple original equipment manufacturers (OEMs) and aftermarket, increasing scale, improving profitability margins and a comfortable financial risk profile, marked by negligible borrowings, leading to comfortable leverage and debt metrics and a strong liquidity position.

However, ratings, remain constrained by profitability margins susceptible to raw material price fluctuations and cyclical nature of the auto sector.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Increasing total income above ₹1,700 crore and increasing PBILDT margin above 15% on a sustained basis.
- Maintaining low gearing and liquid balances above ₹200 crore.

#### Negative factors

- Declining total income below ₹1,000 crore and dipping PBILDT margin to below 10%.
- Debt-funded capex, leading to overall gearing of more than 0.5x and total debt to PBILDT above 2x.
- Significantly declining liquidity position with average working capital limit utilisation exceeding 80%.

### Analytical approach: Standalone

#### Outlook: Stable

The stable outlook assigned to long-term bank facilities of the company is from CARE Ratings Limited's (CARE Ratings) expectation of stable profitability margins post steady scaling-up of operations in the medium term. The company's solvency and liquidity position is also expected to remain at comfortable mainly due to nil term-debt repayment obligation and strong liquidity available from free cash balances and liquid investments.

### Detailed description of key rating drivers

#### Key strengths

##### Strong parentage of the Federal-Mogul Group (FMG) and dominant market position

Federal Mogul Holdings Limited, Mauritius is the immediate holding company of FMGIL, holding 60.05% shares as on December 31, 2023. The ultimate holding company of the group, Federal Mogul LLC, was acquired by Tenneco Inc., USA in October 2018. In November 2022, the fund managed by Apollo Global Management Inc completed acquiring Tenneco, with the entire shareholding earlier owned by Tenneco now being held by the Apollo group. FMGIL continues to have an established market position in the domestic piston and piston rings business. This is further strengthened by continuous support received from the parent group, Federal Mogul Group as technical and managerial expertise and financial assistance. FMGIL is the second largest player in the organised market of pistons and piston rings in India with ~28.79% market share in FY23 (refers to April 1 to March 31)

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

**Reputed customer base and diversified revenue stream**

FMGIL's key customers include leading automobile players in India such as Mahindra & Mahindra Limited, Bajaj Auto Limited, Maruti Suzuki India Limited, Tata Motors Limited, Hero MotoCorp Limited, and Ashok Leyland Limited, providing a well-diversified customer base. In addition to OEMs, the group also has presence in the replacement market. FMGIL's top 10 customers contributed ~53% of its gross sales in FY23 (PY:47%), reflecting reasonably satisfactory diversification in customer base. The company has presence across segments including light vehicles (45-50% of the total sales in FY23), 2&3-wheelers (15-20%), commercial vehicles (15- 20), and others (10-15%), which insulates it from significant impact of slowdown in a single segment.

**Increasing scale of operations, improving profitability margins and comfortable financial risk profile**

The company's operating income increased by a healthy 22.30% in FY23, on a year-on-year basis, marked by increased demand and higher sales realisations. The PBILDT margins slightly improved to 11.65% in FY23, compared to 10.68% in FY22; while the PAT margin improved to 6.01% in FY23 as compared to 3.98% in FY22. In 9MFY24 (UA) also, the uptrend in sales continued with operating income increasing by a healthy 4.12%, compared to the same period last year. PBILDT margins stood at 12.75% in the period (11.81% in 9MFY23). FMGI's credit profile remained comfortable over the years, as it has negligible debt obligation while its net-worth stood at a healthy level. Debt coverage indicators remained healthy marked by interest coverage ratio and total debt/PBILDT of 39.38x and 0.23x respectively as on March 31, 2023 (PY: 29.04x and 0.46x, respectively). The overall gearing ratio also continued to remain at a healthy level. Going forward, FMGIL's capital structure and debt coverage indicators are expected to remain comfortable considering its large net worth base and no debt-funded capex plans.

**Liquidity- Strong**

FMGIL has strong liquidity, as it has minimal term debt. The company has cash and liquid investments of nearly ₹307 crore, as on September 30, 2023. The company has planned a capex of around ~₹75 crore in FY25 and almost a similar amount for FY26, which is expected to be completely funded through its internal accruals. Average fund-based working capital limit utilisation stood nil for 12-months ended December 2023.

**Key weaknesses****Margins susceptible to raw material price fluctuations**

Aluminium, steel, steel alloys are key raw materials (raw material cost contributed ~48% of the cost of sales in FY23) used for manufacturing piston and piston rings. Other metals such as iron and copper are also consumed for manufacturing piston rings. The company procures raw materials from local manufactures at prevailing market prices. Demand for metals is cyclical with prices driven by demand and supply conditions in the domestic market, which has strong linkages with the global market. For 75% of OEMs (comprising 90% of total sales), the company can fully pass on increase or decrease in raw material rates, since they are procured from OEM-approved suppliers. However, for the residual portion and for the aftermarket segment, the company remains exposed to raw material price risk.

**Industry Prospects**

The automobile industry, to which FMGIL caters, is cyclical. Though industry demand was impacted by the pandemic, there has been a gradual improvement, which was in tandem with the economy opening in FY23 and FY24. The overall domestic sales for the automobile industry in FY23 grew by 20.35% compared to the same period last year. Growth has been primarily driven by the two-wheelers, passenger vehicles, and commercial vehicles due to robust festival and wedding season and an increase in infrastructure spending. It is expected that the domestic automobile industry sales volume will grow by 7-9% in FY24.

**Environmental, Social and Governance Risk assessment**

Environmental- FMGIL maintains a pollution-free environment by reducing/eliminating waste, and optimum power utilisation. The company uses 95% of wheeling energy (wind/hydro/solar energy), focussing on reducing green-house gases. For waste management, the company recycles 10-15% waste and focusses on waste reduction programs by treating water from the effluent treatment plant and the sewage treatment plant for gardening, disposal of waste to cement industries for coprocessing to avoid land fill, reducing water consumption by process improvements, reducing hazardous waste generation by process improvements.

Social- CSR projects currently aim to promote basic education, environment plantation drive, protection of wildlife, and preventive healthcare, rural development project, employment enhancing vocational skills, and women empowerment. The company has a corporate social responsibility (CSR) committee constituted by the board. The company has adopted a well-

defined policy on CSR on the recommendations of the CSR committee per the requirement of Section 135 of the Companies Act, 2013.

Governance- The company is committed to good corporate governance practices. The board adheres to standards set by the Securities and Exchange Board of India (SEBI), corporate governance practices and has implemented all major stipulations prescribed. There are audit committee, nomination and remuneration committee, stakeholders' relationship committee; corporate social responsibility committee; share transfer committee; and risk management committee, showing appropriate risk management framework adopted by the company. The company is managed by a professional board of directors, who have extensive experience in auto ancillary industry and is well-diversified with two independent directors.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
