

## John Cockerill India Limited (Revised)

7<sup>th</sup> March ,2024

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term / Short Term Bank Facilities	347.50	CARE BBB+; Stable / CARE A2	Reaffirmed

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The reaffirmation of the ratings assigned to the bank facilities of John Cockerill India Limited (JCIL) considers the improvement in operating performance of the company in FY23 and 9MFY24. The total operating income improved from Rs. 386 crore in FY22 to Rs.488 crore in FY23. During 9MFY24 the company has recorded revenue of Rs. 666 crore. The order book position has improved which provides medium term revenue visibility. Liquidity remains adequate marked by adequate cash balances and no utilization of fund based working capital limits.

The ratings continue to draw comfort from JCILs' established track record of operations in industrial construction activity, its global presence and geographical diversification of operations owing to strong parentage, strong order book position providing medium term revenue visibility. The above rating strengths are offset by fixed price nature of the contract exposing the company to increase in input cost, low profitability margin due to competitive nature of the industry, customer concentration risk and inherent cyclicity and prospects correlated with the capex cycle of steel industry.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Increase in Total operating income above Rs. 600 Crore
- Improvement in the profitability margins to 8% and ROCE to 10% and above on sustained basis

#### Negative factors

- Decline in order book leading to reduced revenue visibility
- Decline in operating profitability of the business below 3% on sustained basis
- Any significant deterioration of the operating cycle
- Deterioration in the credit profile of JC Group on the consolidated basis

**Analytical approach:** Standalone ; with operational and business linkages with group companies.

**Outlook:** Stable

CARE expects the company to maintain its operating performance based on the significant order book position providing medium term revenue visibility.

### Detailed description of the key rating drivers:

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

## Key strengths

### **Strong parentage and established track record of JCIL in industrial construction activity**

JCIL is majorly held by JC group (75% shareholding by John Cockerill group as on March 31, 2023). Headquartered in Belgium, JC group is an international supplier specialising in the production of machinery for steel plants (cold rolling mills, picking lines, processing lines, automation, and process controls etc.) industrial heat recovery equipment, boilers, defence equipment etc. The operations of the group are classified under the five heads namely: Energy, Defence, Industry, Environment and Services. JCIL operations falls under the ambit of Industry. JCIL has over three decades of experience in the designing, manufacturing, erection and commissioning of cold rolling mill complexes, processing lines, chemical equipment, industrial furnaces and auxiliary equipment meeting global demand for ferrous and non-ferrous industries. Over the years, the company has catered to domestic and international clientele with revenue spread across geographies.

### **Global presence and geographical diversification of operations**

JCIL has access to established global footprint which has provided accessibility to geographically diversified array of clientele. Majority of the exports are to Bangladesh, Spain, Belgium, Kenya, Myanmar and Egypt. JCIL derived around 9% of the total revenue from export markets in FY23.

### **Established market position in setting up cold rolling mills**

Superior technology and timely execution have helped the company to establish its market position, as one of the largest manufacturers of CR mills in India. Strong relationships with customers ensure a flow of repeat orders.

### **Strong Order Book position providing revenue visibility in medium term**

JCIL currently has an orderbook worth Rs. 755 crores on the back of orders from Tinplate Company of India Ltd and Arcelor Mittal Nippon Steel. The AMNS contract worth Rs. 1068 crores was received in March 2022 and part revenue was booked in FY23. The remainder is expected to be booked by the end of calendar year 2024. The total order value of Tinplate Company of India Ltd is Rs. 280 crores which was received in November 2023 out of which Rs. 55 crores worth of advance is expected from first week of March. Additionally, the company's revenue visibility in the near term is supported by orders worth Rs. 800 crores in the pipeline, along with focus on spares and revamping business which yields higher margins.

### **Improvement in debtors in FY23 on account of effective execution of orders**

The receivables cycle was elevated in FY21 due to delay in recovery from the customer. Since then, receivables days have improved consistently due to effective execution of orders. The average collection period has improved consistently from 233 days in FY21 to 136 days in FY22 to 110 days in FY23.

## Key weaknesses

### **Exposed to input price volatility**

The contracts are fixed price in nature. Thus, the company is exposed to input price volatility. The company tries to mitigate the risk by procuring the materials on receipt of the order. Further the contract execution period is short with timeline typically spanning 1-2 years providing some mitigant.

### **Low profitability due to competitive nature of the industry**

The profitability continues remain low with PBILDT margin between 3-5%. Profitability is expected to remain subdued due to intense competition. RoCE was low at 6.91% in FY23 and is expected to remain at single digit in medium term.

### **Customer concentration risk**

The company is mainly engaged in the design, manufacturing, erection, and commissioning of facilities for steel players. Thus, the order book and hence, the performance of the company is primarily dependent on the prospects of the highly cyclical steel industry. Although, the profile of the top customers has slightly changed over the years, yet majority of the sales were accounted by the top 10 customers with 97% of revenue contribution in FY23. The

company has a policy of taking advances from the customers at the time of receipt of order which ranges from 15% to 30% of the order depending upon the project and the customer. The contractual arrangements with its customers are such that generally, 10% to 20% of contract value is received as mobilisation advance, another 10% to 20% is received on completion of engineering, 50% to 70% when the equipment's are dispatched and the remaining 10% is held back towards retention and is received on successful commissioning.

### **Inherent cyclicity of the steel industry**

Prospects of steel industry are strongly co-related to economic cycles. Demand for steel is sensitive to trends of industries, viz. automotive, construction, infrastructure and consumer durables, which are the key consumers of steel products. These key user industries in turn depend on various macroeconomic factors, such as consumer confidence, employment rates, interest rates and inflation rates, etc. in the economies in which they sell their products. When downturns occur in these economies or sectors, steel industry may witness decline in demand, thereby impacting volumes, revenue and margins of steel makers. The company is mainly engaged in the design, manufacturing, erection and commissioning of facilities for steel players. Thus, the order book and hence, the performance of the company is primarily dependent on the prospects of the highly cyclical steel industry.

### **Liquidity: Adequate**

The liquidity profile remains adequate marked by cash and bank balance of Rs. 135.00 crore (including Margin money of Rs. 28 crore) and NIL external long-term debt as on December 31, 2023. The working capital utilisation for the fund-based limits remained nil for the twelve months ended December 2023. The unutilised working capital limits are sufficient to cover the working capital requirements of the company over medium term. The current ratio stood at 1.48x as on 31<sup>st</sup> March 2023.

**About us:**

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

**Disclaimer:**

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
