

## Manaksia Steels Limited

July 05, 2024

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term Bank Facilities	45.00 (Enhanced from 37.00)	CARE A-; Stable	Reaffirmed
Short Term Bank Facilities	330.00 (Enhanced from 203.00)	CARE A2+	Reaffirmed

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The reaffirmation of rating assigned to the bank facilities of Manaksia Steels Limited (MSL) takes into account the stable financial performance of the company in FY24 (refers to period April 01, 2023 to March 31, 2024) along with improvement in the profitability margins. The rating further continues to draw strength from long experience of the promoters in steel industry, strategic location of the plant and comfortable capital structure and debt protection metrics.

The rating is, however, constrained by small scale of operations, geographical and client concentration risk, low capacity utilization, profitability susceptible to volatility in the prices of raw materials, exposure to foreign exchange fluctuation risk and cyclical nature associated with the steel industry.

The rating further takes into consideration the ongoing project for capacity enhancement which is also expected to lead to improvement in capacity utilisation of the existing capacity. The project is being executed in two phases, the first of which is expected to be completed by Q3FY25.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Increase in scale of operations beyond Rs. 750 crores led by increase in volumes, and profitability margin beyond 8% on a sustained basis.
- Sustenance of capital structure and debt protection metrics.

#### Negative factors

- Decline in scale of operations below Rs 400 crore and operating profitability below 5% on a sustained basis.
- Deterioration in overall gearing and TD/GCA beyond 0.35x and 5x respectively on a sustained basis.
- Worsening of operating cycle beyond 75-80 days on a sustained basis.

### Analytical approach: Standalone.

#### Outlook: Stable

Stable outlook reflects the ability of the entity to sustain healthy operating performance and profitability over the near medium term.

### Detailed description of the key rating drivers:

#### Key strengths

##### Experienced Promoters

MSL is promoted by Mr. Suresh Kumar Agrawal & family. Mr. Suresh Kumar Agrawal (Chemical Engineer) has an experience of about four decades in steel manufacturing industry. Mr. Varun Agrawal (Son of Mr. S. K. Agrawal) looks after the day-to-day affairs of the company along with the support of experienced professionals.

##### Strategic location of the plant

In manufacturing of steel products, freight cost constitutes a significant portion as large amount of bulky raw material is required to be sourced to the manufacturing site. The company needs to procure HR coils and Zinc from both domestic and overseas supplier. The proximity of the plant to Haldia port area helps the company to save logistics cost.

##### Comfortable capital structure and debt protection metrics

Capital structure of the company remained comfortable although slightly moderated due to increase in debt level as on March 31, 2024 due to increase in creditors backed by LC for import of raw materials. The gearing ratios remained comfortable with overall gearing at 0.59x (PY: 0.16x) as on March 31, 2024. However, both TD/GCA and interests coverage ratio moderated due to

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

increase in debt level. The TD/GCA moderated to 4.80x in FY24 against 2.50x in FY23, whereas interest coverage ratio moderated to 4.50x in FY24 against 6.91x in the previous year.

### **Stable financial performance along with improvement in profitability**

The TOI of MSL remained stable in FY24 with Rs 631 crore against Rs 641 crore in FY23. Both the export sales and domestic sales remain at a similar level with Rs 144 crore (PY: 141 crore) and Rs 488 crore (PY: 494 crore) respectively. However, the TOI in FY23 also included job work of around Rs 6.00 crore, which resulted in increase in the turnover. The company is projected to improve its turnover and profitability going ahead with the completion of its galvalume project in FY25.

The PBILDT margin, which was previously moderated in FY23 to 2.66% owing to the imposition of duty on the export of iron ore, pellets, steel and steel intermediaries by the Government of India and the Russia-Ukraine war, has recovered to 5.13% in FY24, owing to moderation in raw material price and power & fuel cost.

### **Key weaknesses**

#### **Small scale of operation**

MSL operates on a relatively small scale as compared to other players operating in the industry, with income from operations and total capital employed of Rs 632 crore and Rs 332 crore respectively in FY24 (Rs. 641 crore and Rs. 288 crore in FY23).

#### **Geographical and client concentration risk**

MSL's customer base remained concentrated with top 10 customer contributing over 51% of its sales during FY24 (52% in FY23). The company generated revenue of around 78% in FY24 from selling its products in domestic market and rest through exports. In FY24, around 18% of sales includes supply of HR Coils and trading of aluminium sheets to its group companies based in Nigeria (MINL Limited & Sumo Steel Limited). Further, the company is currently focusing to markets like Portugal and Italy where there is notable demand for high quality colour coated sheets.

#### **Low capacity utilization albeit improvement in colour coating plant**

The production process of the company involves re-rolling of HR coils at room temperature to achieve exact shapes and better surface qualities to produce CR coils which are then galvanized (zinc coated) and colour coated. The current capacity of MSL is 192,000 MTPA (120,00 MTPA CR coils capacity ; 24,000 MTPA galvanising capacity ; 48,000 MTPA colour coating capacity) with 39% capacity utilisation in FY24 ( FY23 : 36%). However, MSL is currently in the process of debottlenecking its production facilities. With the completion of galvalume unit of 96,000 MTPA, the overall capacity utilisation is expected to increase from FY25 onwards.

#### **Profitability susceptible to volatility in the prices of raw materials**

Raw material expense is the major cost driver for MSL. The major raw materials are HR Coils, Zinc & Galvalume. The prices of raw materials are highly volatile in nature due to commodity nature of product, whose prices are determined based on global demand & supply. Given the volatility in raw material prices & lack of backward integration, the profitability of the company is susceptible to fluctuation in raw material prices.

#### **Exposure to foreign exchange fluctuation risk**

MSL procured most of its raw material, HR coils, majorly from Japan with raw material import stood at around 55% in FY24 of total raw material purchase. This was mainly on account of dip in prices of raw materials in international market and also availability of more diversified product mix as compared to domestic suppliers. Hence, the company is exposed to foreign exchange fluctuation risk to the extent of raw materials imported for the purpose of domestic manufacturing. The company reported forex loss of Rs 1.68 crore in FY24 as against Rs 1.07 crore in FY23. Furthermore, the company also exports its products to countries like Bhutan and Nigeria. However, the majority of these sales are done on advance basis.

#### **Cyclicality associated with the steel industry**

Steel is a cyclical industry, strongly correlated to economic cycles since its key users i.e., construction, infrastructure, automobiles, and capital goods are heavily dependent on the state of the economy. Fall in demand in any of these sectors directly impacts the demand of steel products. The steel industry is sensitive to the shifting business cycles, including changes in the general economy, interest rates and seasonal changes in the demand and supply conditions in the market.

#### **Project Risk**

The company is in the process of enhancing its colour coating limit to 96,000 MTPA (Currently 48,000 MTPA) and also setting up a new facility in its existing plant in Haldia to introduce new product called Galvalume. The production capacity of Galvalume Sheets are expected to be 96,000 MTPA. The COD of the project is scheduled at Q3FY25.

Total estimated cost of the project will be Rs 120 crores, which includes Rs 80 crores for Galvalume project and Rs 40 crore for colour coating capacity enhancement project. The entire project cost will be funded through existing liquid investments and internal accruals of the company. The project will be done in two phases. The first phase, which is currently ongoing, is setting up of galvalume unit, with a total capital expenditure of Rs 80 crores. MSL has invested Rs 40 crores till FY24, with the remaining amount expected to be expensed in FY25. For the second phase i.e. enhancement of the colour coating capacity, the company will expense another Rs 40 crore, which will start post the completion of galvalume unit.

#### **Liquidity: Strong**

The company's liquidity position is strong characterized with gross cash accruals of Rs. 38.12 crore in FY24 vis-à-vis negligible debt repayment obligations and low utilization of its working capital limits. The company has average maximum utilisation of 31% for 12 months period ending March, 2024 against sanctioned limit of Rs 42 crores.

As on March 31, 2024, the company has free cash and liquid investment of Rs 147.63 crore. Further, the company also has Rs 21.07 crore lien marked FD. The cash flow from operation (CFO) for the year FY24 stood at Rs 63.10 crore.

The operating cycle changed significantly during the year with 10 days against 41 days during FY23. The change was majorly due to the increase in creditor's days due to higher imports of raw material, from 19 days in FY23 to 70 days in FY24. Whereas the debtor's period and inventory cycle remained at a similar level.

## About the company and industry

### Industry classification

Macro Economic Indicator	Sector	Industry	Basic Industry
Industrials	Capital Goods	Industrial Products	Iron & Steel Products

Manaksia Steels Ltd (MSL) was incorporated on June 07, 2001 by Kolkata based Mr. Suresh Kumar Agrawal & family. It was a dormant company till October 01, 2013 before the demerger of steel division of Manaksia Ltd. (ML) to MSL. MSL is engaged in manufacturing of cold rolled sheets, galvanized plain & corrugated sheets and colour coated sheets.

The company has a manufacturing capacity of 120,000 metric tonne per annum (MTPA) of steel cold rolling products, 24,000 MTPA galvanizing plant and 48,000 MTPA colour coating line at Haldia. The company also has a 30,000 MTPA galvanizing plant at Bankura. However, the Bankura plant is not operational from FY14 onwards.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
