Long Term Bank Facilities	91.02	CARE BBB-; Stable	Reaffirmed
Short Term Bank Facilities	18.00	CARE A3	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The reaffirmation in ratings of the bank facilities of Ginni Filaments Limited (GFL) takes into account expected improvement on overall financial risk profile of the company as company has concluded the slump sale of loss-making spinning segment during February 2024. The sold division was major contributor to the company's losses sustained during FY24 (Audited, refers to the period April 01 to March 31), wherein the company has incurred loss of Rs. 84.49 crores on combined basis and of which spinning segment accounted for loss of Rs. 58.24 crores and exceptional loss of Rs. 25.71 crores (Rs. 15.20 crores on BTA and Rs. 10.51 crores of bad debts w/off pertaining of garmenting segment). Thus, the residual business operations comprise of garment, non-woven yarn and technical textile, which has generated positive PBILDT of Rs. 22.27 crores during FY24. Further the cash inflow from slump sale of around Rs ~145 crores is used for repayment of major term liabilities of the company which has been reduced from Rs. 101.91 crores as at March 31, 2023, to Rs. 22.02 crores as at March 31, 2024, & reduction in WC sanctioned limits from Rs 207 crores to Rs 69 crores.

The ratings, further, continues to derive strength from the experienced and resourceful promoters with long track record of operations, integrated operations (Non-Woven, Garments and Wipes) and diversified product mix along with established relationship with clients and distribution network.

The rating strengths, however, continue to remain constrained by volatility in the raw material prices, limited scale of operations after slump sale, loss making garments unit left over in company, susceptibility to foreign exchange rate fluctuations and intense competition in the industry.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Improvement in profitability margins marked by PBILDT margin exceeding 10% on sustained basis coupled with revenue from operations beyond Rs 400 crores.
- Reduction in gross working capital cycle days to below 50 days

Negative factors

- Deterioration in the PBILDT margin below 5% on sustained basis.
- Deterioration in the capital structure as marked by overall gearing ratio above 1.00x

Analytical approach: Standalone

Outlook: Stable

The continuation of "Stable" outlook to the bank facilities of GFL takes into account continuing capabilities of the management due to its long track record of operations to mitigate the inherent risk related to volatility in raw material prices and highly competitive nature of industry without compromising much on operational aspects.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Detailed description of the key rating drivers:

Key strengths

Experienced and resourceful promoters with long track record of operations:

GFL has been promoted by Dr. Rajaram Jaipuria and his son, Mr. Shishir Jaipuria. Dr. Jaipuria has a Doctorate degree in Economics and has been associated with the textile industry for around six decades now. Mr. Shishir Jaipuria (B. Com, LLB) has an experience of more than three decades in the textiles industry. Furthermore, GFL has a long track record of operations, as the company has been operational since 1982, the company commenced its business with an installed capacity of 26,208 spindles. Promoters are further supported by seasoned professionals in their respective domains to manage day to day operations of the company. Besides, promoters are resourceful and has shown ability to infuse funds in the business as and when required as they have infused unsecured loans during FY24 so as to fund cash losses sustained due to loss making spinning segment.

Integrated operations (Non-Woven, Garments and Wipes) and diversified product mix:

The operations of GFL are still integrated with the company providing a complete range of products to its customers which includes multiple consumer products like wipes, non-woven and garments. Although, erstwhile traditional textile segment used to contribute major proportion of revenue for the company, however, it was sustaining continuous losses from Q2FY23 and therefore company has entered into business transfer agreement with RSWM Limited for slump sale which is concluded in February 2024 and cash flow from slump sale is used for repayment of term liabilities of discontinued operations and therefore company is left with term liabilities of Rs 22.02 crores only as at March 31, 2024, as against term liabilities of around Rs 101.91 crores as at March 31, 2023. The residual business includes the consumer products segment, where the company primarily manufactures wet wipes. They produce these wet wipes both as a job worker for major brands like Johnson and Johnson and under their own brand, 'CLEA.' This segment, along with non-woven products, has been profitable and is expected to remain so in the near term. In FY24, these wet wipes and non-woven products contributed about 81% to the residual business (PY: 76%). However, the remaining 19% of the residual business comes from the garment segment, which is still operating at a loss. The company is closely monitoring this segment and shall decide whether to divest based on its performance in the current financial year.

Established relationship with clients and distribution network:

Over the years GFL has established strong relationship with customers. The company used to export yarns, garments, and wet wipes to countries like Korea, Bangladesh, Dubai, UK, USA, and Turkey. Thus, previous client base and experience is also helping company to secure export orders for its residual business, and they are in process of securing some good export orders for their consumer products segment.

Expected improvement in overall financial risk profile of the company and comfortable capital structure.

Company has concluded slump sale of loss-making spinning segment during the month of February 2024. Thus, the company is left with residual business of technical textile which is profitable as company has booked revenue from operations of Rs. 350.87 crores during FY24 with PBILDT of Rs 22.27 crores as against Rs. 373.20 crores during FY23 with PBILDT of Rs 39.41 crores. Therefore, since the loss-making segment is eliminated, company overall financial risk profile is expected to improve substantially in current financial year as cash flow from slump sale is used for repayment of term liabilities pertaining to erstwhile spinning segment and remaining funds are parked in cash and liquid investment which will be used for consolidating residual business. As on March 31, 2024, company's term liabilities are reduced to Rs 22.02 crores against term liabilities of Rs. 101.91 crores as on March 31, 2023, whereas working capital sanctioned limits has also been reduced to Rs 69 crores as on March 31, 2024, (PY: Rs 207 crores as on March 31, 2023).

Key weaknesses

Limited scale of operations after slump sale and loss-making garment unit left over in the company.

Following the slump sale, the company scale of operations have significantly declined although profitability has improved since company has sold-out loss-making spinning segment. The sold division accounted for total operating of Rs. 580.72 crores during FY23 and Rs. 500.14 crores during FY24 and the continuing operations (remaining operations) has total operating income of Rs. 371.01 crores during FY23 and Rs. 350.87 crores during FY24. Further during FY23 and FY24, the continuing operations has generated PBILDT of Rs. 37.11 crores and Rs. 22.27 crores respectively whereas company has booked loss from discontinued operations of Rs. 27.89 crores during FY23 and Rs. 58.24 crores during FY24 from the sold division. Although the company continuing operations are profitable, however the major profitability is coming from non-woven fabric division and its garment division is still loss making due to overall demand weakness in US and European market. Going forward, the company plans to consolidate its remaining divisions and closely monitor the performance of the garment division. If the garment division does not show signs of improvement within the current financial year, the company may decide to divest it as well.

Volatility in the raw material prices:

GFL's residual business of technical textile is manufactured from key raw material polyester, viscose etc which is primarily manufactured from crude oil. The price of raw materials remains highly volatile throughout the year as is dependent on multiple external factors like government policies, macro-economic factors etc. Further, the ability to transfer the volatility in raw material

prices is limited on account of the low bargaining power of the companies with its suppliers as well as its customers, as the prices of both raw materials and finished goods are dependent upon the market conditions. The ability of the company to mitigate the fluctuation risk pertaining to raw materials by keeping lowest possible inventory and ability to pass on the fluctuations to their buyers will be key monitorable.

Susceptibility to foreign exchange rate fluctuations:

As substantial portion of GFL's income is generated through the export market, thereby the company is exposed to foreign exchange fluctuation risk. However, GFL has some amount of natural hedge due to some imports of raw material. Although, the company also hedges the risk through forward contracts despite of which some proportion of forex exposure remains unhedged leading to currency fluctuation risk.

Highly fragmented, competitive and cyclical nature of industry

The Indian textile industry consists of large and organized players who contribute to 75% of the total installed capacity and the remaining 25% is contributed by unorganized segment. CARE Ratings Limited (CARE Ratings) notes that the intense competition in the highly fragmented textile industry also restricts its ability to completely pass on the volatility in input cost to its customers. Moreover, given the commoditized nature of the product with limited product differentiation, the competitive intensity is high with minimal pricing power.

Liquidity: Adequate

The company projects Gross Cash Accruals (GCA) of Rs.20-25 crores from annually from residual business against scheduled annual obligations of Rs. 4.76 crores annually as they are left with term liabilities of only Rs 22.02 crores as at March 31,2024, which implies adequate repayment capabilities of the company. Additionally, company has cash and bank balance of Rs. 21.55 crores. Furthermore, after conclusion of slump sale in Feb 2024, company's working capital limits has been reduced to Rs 69 crores from previously Rs 207 crores. During the last three months ending May 2024 maximum utilisation remains to the extent of Rs. 46.30 crores against drawing power of Rs 69 crores which reflects adequate unutilised limits so as to support any incremental working capital requirement.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
