

## Ausil Corporation Private Limited (Revised)

July 04, 2024

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term Bank Facilities	35.00	CARE BBB; Stable	Assigned

Details of facilities in Annexure-1.

### Rationale and key rating drivers

The rating assigned to the bank facilities of Ausil Corporation Private Limited (ACPL) derives strength from its experienced and resourceful promoter group, established track record of over three decades of Zaveri group in bullion trading and export of bulk gold jewellery business and sound risk management policies adopted by ACPL to mitigate its exposure to price volatility risk associated with precious commodity and exchange rate fluctuation risk.

The rating also takes cognisance of ACPL's healthy scale of operations, satisfactory construction progress and sales momentum in the on-going real estate project i.e. Palash Homes, comfortable capital structure on net debt basis and adequate liquidity. The ratings also factor in significant improvement in ACPL's operating cycle and gross current asset (GCA) days during FY24 attributable to shift in company's policy to conduct business on spot payment basis as against earlier practice of providing extended credit to its customers.

The above rating strengths, are however, partially offset by ACPL's thin profitability, which is susceptible to volatility associated with commodity (gold bars) prices and revenue visibility being susceptible to change is government regulations and grant/renewal of requisite licenses. The rating also take into consideration significant investment of its surplus to group companies.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Significant growth in its scale of operations along with PAT margin in excess of 4% on a sustained basis
- Improvement in the credit profile of parent company i.e. Zaveri and Company Private Limited (ZCPL; rated CARE A-; Stable / CARE A2+)

#### Negative factors

- Decline in scale of operations owing to adverse regulatory changes affecting its demand or operating environment
- Deterioration in its financial risk profile on account of avilment of any major fund-based bank finance without it being entirely backed by FD and/ or customers' banks LC.
- Deterioration in the credit profile of the parent company i.e. ZCPL

**Analytical approach:** Standalone while factoring in strong managerial, operational and financial linkages with its holding company, Zaveri and Company Private Limited (ZCPL).

### Outlook: Stable

Stable outlook reflects CARE Ratings Limited's (CARE Ratings) expectation that the company shall be able to sustain its financial risk profile in medium term and benefit from promoters experience in precious commodity trading and jewellery business.

### Detailed description of the key rating drivers:

#### Key strengths

##### Experienced and resourceful management

ACPL is a wholly owned subsidiary of ZCPL, the flagship entity of the Zaveri Group (ZG), promoted by the Ahmedabad-based Mandalia family. ZCPL is engaged in the trading of precious commodities, gold refining, wholesale jewellery manufacturing and its exports, trading and investing in shares and mutual funds (MFs), and electricity generation. Post acquisition of ACPL, Zaveri group commenced the bulk gold jewellery and bullion trading business in this entity as well.

As on March 31, 2024 ZCPL has extended loans of around Rs.44.87 crore (Rs.79.57 crore) to support the operations of ACPL. ACPL's present operations are managed by the second and the third generation of the promoters and they are supported by a team of professionals. The present management has over three decades of experience in precious commodity trading and jewellery sales.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

**Healthy scale of operations, albeit susceptibility of revenue to change in government regulations**

FY23 marked the first year of ACPL's operations wherein it achieved a TOI of Rs.2535 crore. TOI of FY24 grew by 31% on a y-o-y basis to Rs.3320 crore. The increase in TOI during FY24 was led by commencement of bullion trading in the domestic market post receipt of requisite licence from Directorate General of Foreign Trade (DGFT) to import specified quantity of gold at a lower custom duty. During FY24, sales of bulk jewellery accounted for around 85% of ACPL's TOI (FY23: 99%), followed by domestic bullion trading 13% (PY: nil) and balance from sale of solar modules and land.

Going forward, CARE Ratings expects ACPL's TOI to remain susceptible to changes in government regulations, renewal/ grant of requisite license, etc.

**Comfortable financial risk profile**

ACPL's capital structure remained comfortable marked by overall gearing (on net bank debt basis) of 0.41x (PY:1.19x) against tangible net worth of Rs.152.96 crore as on FY24 end. ACPL follows policy of availing working capital limits from bank which are either backed by FDR (of ZCPL/ ACPL) or customer's Letter of credit (LC). As on FY24 end, apart from working capital borrowings fully backed by FDRs, total debt of the company comprises of term debt for its real estate project and unsecured loans from related parties.

**Satisfactory construction progress and healthy sales momentum in the on-going real estate project**

ACPL is currently undertaking a real estate project 'Palash Homes' in Ahmedabad, Gujarat having a total cost of Rs.125 crore, to be funded through promoter's contribution, term debt and customer advances in the ratio of 25: 28: 47. The project is expected to be completed by March 2026.

The project progress remains satisfactory with around 50% of the construction cost incurred till May 15, 2024. Furthermore, the sales momentum remains healthy with around 45% of the units sold till May 15, 2024 and the committed receivables ratio (committed receivables from sold units to pending construction cost and O/s debt) remained satisfactory at 89% as on May 15, 2024.

**Sound risk management policies**

ACPL's procurement of precious commodities (gold bars) is entirely backed by confirmed order from the customers, thereby resulting in minimal inventory and susceptibility to price volatility risk. The company also enters into back-to-back forward contracts for exports as well as imports to minimise price and forex fluctuation risk.

**Key weaknesses****Thin profitability which is susceptible to volatility in gold prices and regulatory risk**

Major revenue of ACPL is derived from sale of export jewellery and bullion trading. Bulk export of gold jewellery which yield operating margin of 3.5% - 4.50%, while bullion trading is high volume low value addition segment resulting in thin operating margin.

ACPL's PBILDT margin declined by 65 bps on a y-o-y basis to 4.35% during FY24 (FY23: 5.00%) owing to commencement of bullion trading in domestic market during FY24 which carries low profit margin. PAT margin declined by around 168 bps on a y-o-y basis to 2.59% (FY23: 4.27%) during FY24 owing to higher interest costs during FY24.

CARE Ratings expects ACPL's profitability to moderate in FY25 with expected increase bullion trading business and bulk jewellery exports limited to order-backed transactions on spot payment basis.

**Exposure in the form of investments and/or loans and advances in group companies**

The company has investments and loans and advances o/s to the tune of Rs.27.62 crore as on FY24 end (FY23: Rs.104.29 crore) against net worth of Rs. 152.96 crore as on FY24 end (FY23: Rs.66.85 crore). Going forward with low working capital intensity of existing operations, the surplus funds are expected to be invested in group companies. Significant increase in exposure towards group entities, thereby impacting the credit profile of ACPL would be a key rating monitorable.

**Liquidity: Adequate**

ACPL's liquidity remains adequate on the back of its entire working capital bank borrowings being secured against fixed deposit and / LC issued by the customer's bank (Bill discounting), sufficient cushion in GCA vis-à-vis its debt repayment obligation and healthy cash flow from operations.

As a result of switching over the jewellery export business on spot payment basis as against the earlier practice of providing extended credit during FY23, ACPL's GCA days improved significantly to 41 days during FY24 as against 410 days in FY23. The same has resulted into generation of sizeable cash flow from operations of Rs.1765 crore during FY24 as against negative cash flow during FY23. CARE Ratings expects that the company will continue its adequate liquidity position going forward with continuation of majority of its business on cash basis.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
