

Dali & Samir Engineering Private Limited

July 23, 2024

Facilities/Instruments	Amount (₹ crore)	Ratings ¹	Rating Action
Long Term / Short Term Bank Facilities	28.22	CARE BBB; Stable / CARE A3	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The reaffirmation of ratings to the bank facilities of Dali & Samir Engineering Private Limited (DSEPL) derives strength from experienced management along with long track record of operations, established and long-standing relationship with reputed clientele. The ratings further derive strength from comfortable capital structure and debt coverage indicators and adequate liquidity position.

However, the ratings continue to be constrained by working capital intensive nature of operations, susceptibility of profitability to fluctuations in raw material prices and presence in a highly competitive and cyclical industry.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Increase in total operating income above Rs. 350 crores on sustained basis
- Decrease in operating cycle below 40 days on sustained basis

Negative factors

- Deterioration in capital structure with overall gearing above 1x on a sustained basis
- Decrease in PBILDT margins below 4.50% on sustained basis

Analytical approach: Standalone

Outlook: Stable

The stable outlook reflects CARE Ratings Limited's (CARE Ratings') expectation that the company will continue to benefit from experienced promoters and established relations with its reputed customers and is likely to maintain its comfortable financial risk profile in the medium term.

Detailed description of the key rating drivers:

Key strengths

Well-established track record and extensive experience of management in the industry

With over five decades of operations in the industry, DSEPL has developed long-standing and established relationships with its clientele. The directors Mr. Samir Salian and Mr. Sandesh Salian have an experience of more than two decades in the industry. Their experience and strong understanding of market dynamics has enabled DSEPL to maintain healthy relations with customers and suppliers and entail repeat orders from them. They are supported by a qualified team of professionals with significant experience in their respective fields.

Association with reputed clientele; albeit customer concentration risk

DSEPL offers a wide range of products including fuel tanks, exhaust systems, oil pans, hydraulic tanks, vacuum tanks, and surge tanks for sectors like automotive and defence. DSEPL primarily caters to OEMs and other major players like Tata Motors Limited, Ashok Leyland Limited, Mahindra & Mahindra Limited among others in the domestic market. However, the customer base is concentrated with top 5 clients contributing to around 70% of its revenues. The counterparty risk is mitigated by association with reputed clientele.

Moderate scale of operations and profitability

The total operating income declined by 4.35% from ₹242.53 crore in FY23 (refers to period April 01 to March 31) to ₹231.99 crore in FY24 due to decline in sales realizations of fuel tanks. Going forward, the scale is expected to increase owing to significant growth expected from export business, product diversification and addition of new customers. Furthermore, the company has booked sales of ₹61 crore in Q1FY25 (refers to period April 01 to June 30).

PBILDT margin continues to remain moderate at 5.43% in FY24 (PY: 5.47%). The PAT margins improved to 3.26% in FY24 (PY: 2.77%) owing to lower interest costs. Going forward, the profitability margins are expected to remain stable.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Comfortable capital structure and debt coverage indicators

As on March 31, 2024, the capital structure improved and continued to remain comfortable with an overall gearing of 0.29x (PY: 0.39x) owing to lower utilization of the working capital limit as on balance sheet date and accretion of profits to reserves. In the absence of any debt funded capital expenditure (capex), the capital structure is expected to remain comfortable over the medium term.

Due to improvement in cash accruals, total debt/GCA improved to 1.24x in FY24 (PY: 1.48x). Further, lower interest cost in FY24 resulted in the improvement of interest coverage ratio to 23.94x from 10.86x in FY23.

Key weaknesses

Working capital intensive nature of operations

Being in the auto ancillary industry, the company's operations remain working capital intensive. The operating cycle remained moderate around 45 days in FY24, primarily driven by a moderate collection period of 44 days.

Also, DSEPL has to maintain sufficient inventory to ensure uninterrupted production and timely execution of orders. However, the order-backed nature of inventory mitigates this risk to a certain extent. Currently, the company meets its working capital requirements through a mix of internal accruals and working capital facilities from banks.

Susceptibility of profitability to fluctuations in raw material prices

The primary raw material required by the company is MS-Steel, the prices of which are volatile in nature. Therefore, the cost base remains exposed to any adverse price fluctuations in the prices of raw materials. However, DSEPL has entered into tripartite agreement with OEMs and suppliers which mitigates the risk to a certain extent.

Exposure to cyclical in automobile industry

Automotive industry is subject to cyclical variations in performance and is sensitive to demand and government policy changes. DSEPL's performance remains closely aligned to the performance of key customers and in-turn exposed to cyclical demand patterns inherent to the automobile industry and ability of the OEMs and their tier-1 vendors to sustain their operating performance.

Presence in highly competitive industry

The auto components industry is highly competitive with the presence of a large number of organised and unorganised players and is characterised by high degree of fragmentation. While the organized segment majorly caters to the OEM segment, the unorganized segment mainly caters to the replacement market and to tier II and III suppliers. There also exist big-sized players resulting in intense competition in the industry.

Liquidity: Adequate

The liquidity position is adequate marked by the annual gross cash accruals of ₹12-15 crore against annual repayment obligations of around ₹1 crore over FY25-FY27. As on March 31, 2024, free cash and bank balance stood at ₹7.21 crore. Also, the average maximum utilization of working capital limits stood low at around 20% for the twelve months ended March 31, 2024.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
