

## Anmol India Limited

August 21, 2024

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term Bank Facilities	20.00	CARE BBB+; Stable	Reaffirmed
Long Term / Short Term Bank Facilities	254.77 (Enhanced from 80.50)	CARE BBB+; Stable / CARE A2	Reaffirmed
Short Term Bank Facilities	325.23 (Reduced from 499.50)	CARE A2	Reaffirmed

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The reaffirmation of the ratings assigned to the bank facilities of Anmol India Limited (AIL) continue to derive strength from the experience of the promoters coupled with long track record of operations and established business relationships with the customers and suppliers. Furthermore, the ratings also continue to draw strengths from moderate scale of operations and profitability. The ratings also factor in average solvency position of the company marked by moderate overall gearing and debt coverage indicators coupled with efficient working capital management. However, the rating strengths are partially offset by the customer and supplier concentration risk, and inherent risk associated with the trading business. The ratings are also constrained by susceptibility to regulatory changes, volatility in international prices and foreign exchange fluctuations.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Improvement in gross cash accruals of more than Rs. 40 crores.
- Improvement in the capital structure at net debt level (net of lien marked cash and cash equivalents) as reflected by overall gearing below 0.60x.

#### Negative factors

- Significant decline in the scale of operations with PBILDT margin falling below around 1.50%.
- Deterioration in the solvency position at net debt level with overall gearing of above unity owing to increased working capital dependence.

### Analytical approach: Standalone

#### Outlook: Stable

The continuation of "Stable" outlook to the bank facilities of AIL takes into account continuing capabilities of the management due to its long track record of operations to mitigate the inherent risk related to the fluctuations in raw material prices and competitive nature of operations.

### Detailed description of the key rating drivers:

#### Key strengths

**Experienced and Resourceful promoters:** AIL is promoted by Mr. Vijay Kumar, Mr. Tilak Raj and Mr. Chakshu Goyal. Mr. Vijay Kumar has been involved in the same line of operations for more than 35 years. Mr. Tilak Raj also has experience of around two decades, while the third director of the company, Mr. Chakshu Goyal (son of Mr. Vijay Kumar) has been engaged in AIL for the last nine years. The promoters are further supported by professional management team having rich experience in respective domain. Besides, the promoters are resourceful and has extended continuous support to fund various requirements of the company in the past in the form of unsecured loans. The unsecured loans from directors stood at Rs. 40.90 crore as on March 31, 2024, of which Rs. 40 crores are subordinated to bank loan.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

**Long track record of operations and established business relationships with the customers and suppliers albeit concentration risk:** AIL is engaged in the coal trading business since 1998. Furthermore, the promoters of the company hold extensive industry experience, which has helped the company in building strong business relationships with its clients and suppliers. AIL has a strong and growing customer base in Gujarat, Punjab, Haryana, Himachal Pradesh, Uttar Pradesh, Uttarakhand, Chandigarh, etc. Furthermore, the majority of the sales of the company are made against advance orders at the pre-agreed prices, which protects the company from any abrupt fluctuations in the prices of the coal.

However, the company derived around 40.54% of its total income in FY24 (refers to the period April 01 to March 31) from the top five customers, which remained in similar line around 42.23% during FY23. This leads to slightly concentrated revenue stream. On the supplier side also, the top five suppliers contributed around 60.13% of the total purchases in FY24 against around 45.46% during FY23. Thus, any change in the policies or performance of the customers and suppliers will directly impact AIL.

**Moderate scale of operations and profitability:** The total operating income (TOI) of the company continues to remain moderate and has increased by 6.45% to Rs. 1501.24 crore during FY24. Furthermore, during Q1FY25 (refers to the period April 01 to June 30), the company booked total operating income of Rs. 520.93 crores as against Rs. 480.16 crores during Q1FY24. The growth in the income during FY24 was driven by the increased demand from the existing customers as well as addition of new clients. The profitability of the company also continues to remain moderate as reflected PBILDT and PAT margins of 1.94% and 1.39% respectively, in FY24. The PBILDT margin has moderated during FY24 owing to increase in overhead expenses. Further, the profitability margins moderated in Q1FY25 (PBILDT: 1.26% and PAT: 0.77%) as against Q1FY24 (PBILDT: 2.68% and PAT: 1.91%) due to the Baltimore incident in USA which resulted in delayed shipment. However, to fulfil the commitments of orders booked, the company had purchased coal from domestic markets and supplied it to its customers. The same resulted in slightly lower margins which is reflected by the moderation in profitability of the company during Q1FY25.

**Average solvency position:** The capital structure of the company continues to remain moderate, but improved, as on March 31, 2024, to 0.78x as against 2.27x as on March 31, 2023. The improvement in the capital structure was primarily due to lower utilization of working capital borrowings as on balance sheet date. Furthermore, the long term debt of the company is limited to unsecured loans infused by the promoters and related parties only which is already subordinated to bank loan. The interest coverage ratio of the company also remained moderate at 2.17x for FY24 as compared with 2.61x for FY23.

**Efficient working capital management:** The operating cycle of the company improved, although stood moderate at 37 days as on March 31, 2024 (PY: 52 days). The improvement in operating cycle was primarily owing to lower inventory as on March 31, 2024. Furthermore, the company allows very limited credit period to its customers marked by average collection period of 15 days during FY24 (PY: 14 days). On the supplier side, the company makes advance payment to domestic suppliers while imports are backed by letter of credit, usually of 90 days. The company imports coal on sight LC and uses suppliers'/buyers' credit to defer its LC payment to the extent of tenor of LC, which is usually 90 days from the date of bill of entry, suppliers'/buyers' credit outstanding as on March 31, 2024, was Rs. 44.40 crore (PY: Rs. 130.88 crore).

## Key weaknesses

**Inherent risk associated with the trading business:** The company is exposed to the risks associated with the trading nature of business like inherently low profitability margins, availability of the traded commodity in desired quantity and quality, etc. The company is also exposed to the competition in imported coal trading business due to low entry barriers.

**Susceptibility to regulatory changes, volatility in international prices and foreign exchange fluctuations:** Coal being a commodity has demonstrated significant volatility in its prices in the past. Imported coal prices are also governed by global demand-supply factors. Accordingly, any sharp adverse fluctuations in the coal prices can affect the profitability of the company. Domestically, coal has remained a highly regulated commodity. Furthermore, coal importers also face regulatory risk in the form of custom duty variations, etc. The company imports during FY24 were recorded at ~Rs. 731 crores which formed around 56% of the total purchases which used be around 46% during FY23. Although the company hedges the pricing and the exchange risk to a large extent, by booking purchases on confirmed buying orders from the customers which is also booked in foreign currency to mitigate raw material fluctuation risk and currency fluctuation risk. Further, it also provides visibility of sales and saves company from high cost on inventory holding. Moreover, company takes EMD money which generally remains at 10% against counter order from their buyer which company supplies to buyers over the period as and when required. However, the profitability margins of the company are still exposed to a significant foreign exchange fluctuation due to absence of any complete hedging mechanism.

**Liquidity:** Adequate

The company has earned Gross Cash Accruals (GCA) of Rs. 21.30 crores during FY24 and is projecting to generate GCA of around Rs ~20 crores & Rs ~22 crores in FY25 & FY26 respectively as against nil scheduled repayment obligations as company don't have any term liabilities apart from unsecured loans from related parties of Rs. 40.90 crores. The current and quick ratio stood at a moderate level of 1.92x and 1.53x, as on March 31, 2024, as compared with 1.33x and 0.74x as on March 31, 2023. The improvement in quick ratio is on account of improvement in inventory holding of Rs. 57.61 crores as on March 31, 2024, (PY: Rs. 207.56 crores). However, working capital utilisation of working capital limits remains 77.28% during last 12 months ending June 2024.

#### About the company and industry

##### Industry classification

Macro Economic Indicator	Sector	Industry	Basic Industry
Services	Services	Commercial Services & Supplies	Trading & Distributors

Initially incorporated in 1998, as a private limited company and converted into public limited company in 2000, Anmol (India) Limited (AIL) is now listed on the Bombay Stock Exchange (BSE). AIL is engaged in wholesale trading of coal: mainly USA Coal, Indonesian coal, domestic coal, petroleum coke (pet coke) and coking coal. AIL has branch offices in Kapurthala (Punjab) and Gandhi Dham (Gujarat) while it also has a warehouse in Ludhiana, Punjab. Presently, the company is importing coal from USA based coal mines while domestically, the company is procuring Indonesian and domestic coal, pet coke and coking coal from traders. AIL is also operating a mobile application, 'Anmol Coal', providing real time information on coal prices and latest news updates on the coal industry which helps in marketing and client acquisition for the company.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
