Long-term / short-term bank facilities	35.74	CARE BBB-; Negative / CARE A3	Reaffirmed; Outlook revised from Stable

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

Reaffirmation of ratings of long-term and short-term ratings of bank facilities of Omaxe Limited (OL) continues to derive strength from comfortable operational performance with healthy bookings and collections along with comfortable leverage profile. Ratings continue to factor in extensive experience of the promoter and established track record of development in the real estate sector. However, the ratings continue to remain constrained by project execution and saleability risk for overall development portfolio (ongoing and upcoming projects) and continued net losses in FY24. The company has high borrowing costs and off-balance sheet exposure, moderately high unsold inventory in ongoing projects and inherent cyclicity associated with the real estate industry.

CARE Ratings Ltd. (CARE Ratings) notes that OL has recently received two orders with adverse outcomes. The first is an arbitral tribunal award issued against the company and the second is an order from SEBI indicating findings of misstatements and irregularities in company's financial statements.

The arbitration case involves a land development agreement where OL had partnered with the Patiala Urban Planning & Development Authority (PDA) in 2006, to develop an integrated township (Consisting of residential, IT park and other commercial infrastructure) however later requested to switch to a residential-only project owing to low interest from IT companies for development of IT park. However, with no resolution, the matter was referred to Arbitral Tribunal in January 2021. Recently, the Arbitral Tribunal issued an order in favour of PDA, awarding compensation for non-fulfilment of obligation, with the potential financial liability for OL is estimated at over Rs.100 crores, unenvisioned by CARE. Additionally, the company has been directed to surrender 60 acres of land intended for IT and Bio Tech Park. OL is in process of filing an appeal against the award in the competent court, and the outcome will be closely monitored.

The second order from SEBI imposes a penalty on OL and its directors. Additionally, it prohibits the company and its directors from engaging in securities transactions and holding directorship positions in any other listed company for two years. This decision follows findings from a forensic audit, which revealed misrepresentation in the company's annual accounts from FY19 to FY21. The adverse findings on accounting and governance practices may impact the group's access to capital, both debt and equity, which in turn, may impair the financial flexibility of the group.

Rating sensitivities at consolidated group level: Factors likely to lead to rating actions

Positive factors

- Significant increase in size of project portfolio with maintenance of committed receivable coverage ratio over 80% while maintaining unsold inventory levels below 18 months, on sustained basis.

Negative factors

- Deterioration in the committed receivable coverage ratio below 50%, on sustained basis.
- Significant decline in collections and resultant increase in funding from debt to total project cost over 40%, on sustained basis
- Crystallization of contingent liabilities adversely impacting the financial profile of the company.

Analytical approach: Consolidated

CARE Ratings Limited (CARE Ratings) has taken a consolidated approach for analysing Omaxe Limited, which has 117 subsidiaries/step subsidiaries/ associates (hereafter referred as OL group), which are primarily land holding companies. The details are listed in Annexure 6

Outlook: Negative

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications.

The revision in the outlook from 'Stable' to 'Negative' is on account of adverse outcome highlighted in the aforementioned orders. The order passed by appellate tribunal is likely to deteriorate the liquidity position of the company, given the potential outflow of over Rs.100 crore in connection with the compensation for non-fulfilment of obligations. While the adverse findings on accounting and governance practices is likely to impact the financial flexibility of the company. Furthermore, any implications of the said events on the operational performance, including decline in bookings and collections of the group, will be closely monitored. The outlook may be revised to stable in case the verdict in the planned appeals is in favor of the group, coupled with sales and collections being in line with the envisaged levels.

Detailed description of key rating drivers:

Key strengths

Experienced promoters with established track record in real estate sector

OL derives strength from experience of promoters, Rohtas Goel (Chairman) and Mohit Goel (Managing Director), having an experience of over two decades in construction and real estate development. The promoter group held 74.14% stake in OL as on March 31, 2024. The group has a track record of successful completion of real estate projects, including development of township, group housing, and commercial complexes, among others. As of March 31, 2024, it has a track record of executing over 131 msf as a real estate developer and as third-party contractor.

Healthy booking status and satisfactory receivable coverage ratio

Of launched area of around 53 msf, the OL group has sold around 49 msf, as on March 31, 2024. The booking ratio stood healthy at 92% as on March 31, 2024, in line with booking status of over 90% in the last two fiscals.

Among ongoing projects, the committed receivables stood comfortable at over ₹2800 crore as on March 31, 2024, which covers over 65% balance project cost and outstanding debt. Owing to phase-wise launches, the committed receivable coverage ratio stood comfortable in the last three fiscals in the range of 65-75%.

Advanced stage of completion of development portfolio

Currently, OL group has 20 ongoing projects, which are largely in advanced stages of completion. As of March 31, 2024, the total project cost is over ₹13,000 crore, with around 75% of cost stands incurred, indicating limited execution risk towards ongoing projects. Construction progress has witnessed gradual improvement in the last two years. Of the 20 projects, 12 projects are in advanced stage with more than 70% cost incurred and balance eight projects are in intermediate stage, with 40-70% of cost incurred.

Improving pre-bookings collections and low reliance on debt

Owing to healthy demand, the group has witnessed improvement in its operating performance and leverage position. In FY24, the company sold 3.11 million-sq-ft (msf) of area, with booking value of over ₹1800 crore. The group has collected ₹2335 crore in FY24, slightly improved from ₹2282 crore in FY23 and consequently the debt level (including non-fund based utilization) has reduced from ₹1007 crore as on March 31, 2023 to ₹806 crore as on March 31, 2024. The comfortable debt position of the company is also reflected from the ratio of debt/total project cost, which stood in the range of 8-15% in past three fiscals.

Key weaknesses

Sizeable future expansion plans to elevate the execution risk

Over the next two years, the group has plans to launch new projects with overall project cost of ₹8000 crore. While, these projects will be executed in phases, it is likely to elevate execution and saleability risk. Accordingly, launching these projects and overall sales momentum in these projects will remain monitorable.

Among projects in pipeline, OL group is launching a major project, where it is required to build and operate multi sports facility stadium in Delhi's Dwarka area, under DBFOT (Design, Build Finance, operate and transfer) model with DDA (Delhi Devt. Authority). Expected project cost of the stadium is around ₹1500 crore. Under this project, the group will be entitled to monetise commercial/retail portion of 7 lsf, which is likely to generate revenue of over ₹4500 crore. Given that the project is capital intensive, the company may avail additional debt, impacting its leverage position. Accordingly, maintaining comfortable leverage position will remain monitorable.

Moderate unsold inventory

As on March 31, 2024, the area of unsold units of the group stood at 4.23 msf with potential value of over ₹5,000 crore. Based on area sold in FY24, the group is maintaining moderate unsold inventory of close to two years.

Continuous net losses

In previous four fiscals, OL has posted net losses. The group recognises revenue upon transfer of possessions. The revenue recognition in previous four fiscals have been lower as compared to the cost incurred in respective years. Currently, the group has been recognising revenue of projects that were launched prior to pandemic and owing to delays in some projects expenditure also includes cost overrun. However, as Omaxe chowk, which has revenue potential of over ₹2500 crore, is now ready for possession, a major portion of revenue from the projected sale is expected to be recognised in FY25, which shall remain monitorable.

High cost of borrowing and off-balance sheet exposure

The group's debt to fund ongoing projects constitutes high cost of borrowing ranging ~14%-15%. The group has been undertaking efforts to reduce cost of borrowing, which shall remain monitorable. Additionally, as on March 31, 2024, the company has sizeable off-balance sheet exposure of ₹685.61 crore (including tax dispute of ₹351.29 crore). Adverse impacts on the company's financial risk profile of due to crystallisation of contingent liabilities, will remain key monitorable.

Inherent cyclical nature of real estate Industry

The group is exposed to cyclicity associated with the real estate sector, which has direct linkage with the general macro-economic scenario, interest rates and level of disposable income available with individuals. In case of real estate companies, profitability is highly dependent on property markets. A high interest rate scenario could discourage consumers from borrowing to finance real estate purchases and might depress the real estate market. OL groups portfolio is spread across tier-I and tier-II cities in Haryana, Punjab and NCR. Although there is stable demand currently, adverse impact in these micro-markets will remain monitorable

Liquidity: Adequate.

As on March 31, 2024, OL had maintained free liquid investments of close to ₹540 crore against scheduled debt commitments (including interest) of close to ₹337 crore in next four quarters. The group's cash flow position is comfortable as it has adequate committed receivables, which covers over 67% of balance project cost and outstanding debt. Due to low debt position and repayments in the near term, the company's cash coverage ratio (CCR) is also comfortable in the projected years. Although, the compensation awarded in favour of PDA is likely to result in cash outflow of over ₹100 crore, which will deteriorate the liquidity position of the company

Assumptions/Covenants: Not applicable

Environment, social, and governance (ESG) risks

CARE Ratings believes that OL's ESG profile supports its credit risk profile. The sector's social impact is characterised by health hazards, leading to a higher focus on labour safety and well-being, given the nature of its operations. Omaxe Group has continuously focused on mitigating its environmental and social risks. Key highlights of the ESG initiatives are as below:

- The company is designing and upgrading environment friendly buildings and its contractors are attempting to provide hygienic and healthy working environment to workers at construction sites, including training to improve capabilities of the local work force.
- The company implements building structure designs that are safer than mandatorily required under the requisite building code.
- The company disposes some of the construction waste as scrap to get it recycled and re-use it in construction works. The company has deployed sewage treatment plants at its projects and construction sites, which treat and recycle wastewater for reusing in watering plants, and toilets, among others.
- There are no anti-competitive, abuse of dominant position or unfair trade practices cases pending against the company.

About the company and industry

Industry classification

Macro-economic indicator	Sector	Industry	Basic industry
Consumer discretionary	Realty	Realty	Residential, commercial projects

OL was promoted in March 1989 and in August 1999, the company converted into a public limited company. The name was changed to Omaxe Constructions Limited and later in 2006, the company's name changed again to OL (CIN: L74899HR1989PLC051918, market cap of 2,268 crore as on July 01, 2024). The company is currently engaged in real estate development and has presence across 29 cities in eight states of India. OL group has undertaken projects in contractual construction, township development, building of commercial complexes, and multi-storied apartments, among others.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
