Details of instruments/facilities in Annexure-1.

\*Issuer did not cooperate; based on best available information.

## **Rationale and key rating drivers**

CARE Ratings Ltd. has been seeking information from Mahamaya Steel Industries Limited to monitor the rating(s) vide e-mail communications/letters dated June 27, 2024, July 11, 2024, July 16, 2024, and Sep 02, 2024, among others and numerous phone calls. However, despite our repeated requests, the company has not provided the requisite information for monitoring the ratings. In line with the extant SEBI guidelines, CARE Ratings Ltd. has reviewed the rating on the basis of the best available information which however, in CARE Ratings Ltd.'s opinion is not sufficient to arrive at a fair rating. Further, Mahamaya Steel Industries Limited has not paid the surveillance fees for the rating exercise as agreed to in its Rating Agreement. The rating on Mahamaya Steel Industries Limited's bank facilities will now be denoted as **CARE BB+/CARE A4+; ISSUER NOT COOPERATING\***.

# Users of this rating (including investors, lenders and the public at large) are hence requested to exercise caution while using the above rating(s).

The ratings assigned to the bank facilities of Mahamaya Steel Industries Limited is constrained by moderate capacity utilization, cyclicity associated with the steel industry, susceptibility of profitability to the input prices and the exposure to group companies. However, the ratings derive strength from experienced promoters with long track record, strategic location of the plant, lower client concentration and a comfortable financial risk profile.

## Detailed description of the key rating drivers

At the time of last rating on July 31, 2023, the following were the rating strengths and weaknesses (updated for the information available from NSE).

## **Key Weaknesses**

## Moderate capacity utilization albeit improvement witnessed in FY23

The capacity utilization of the rolling mill and melting shop slightly improved from 44.23% and 48.89% respectively in FY22 to 54.23% and 72.53% in FY23 respectively, owing to increase in demand from the end user, however; it continues to remain moderate. Further the oxygen/nitrogen plant operated at 15.26% capacity in FY23 as compared to 18.85% capacity in FY22.

## Exposure to group companies albeit reduced in FY23

The company has exposure to its group companies in the form of investments and loans & advances reduced to Rs 23.51 crore as on March 31, 2023 (accounting for nearly 19.95% of the net worth as on March 31, 2023) as against Rs. 27.70 crore as on March 31, 2022 (accounting for nearly 24.40% of the net worth as on March 31, 2022).

In FY24, exposure to group companies stood at Rs. 17.51 (accounting for nearly 14.26% of the net worth).

## Profitability susceptible to volatility in the prices of raw materials

Raw material (sponge iron/scrap) is the major cost driver constituting about 80% of the cost of sales followed by power (~12%) in FY23. The prices of its raw materials are highly volatile in nature and any upward movement in the prices of the raw material without any corresponding movement in the finished goods prices may adversely affect the profitability of the company. Further, lack of captive power arrangements also makes its operations vulnerable to power related issues like shortage, upward revision

<sup>&</sup>lt;sup>1</sup>Complete definition of ratings assigned are available at <u>www.careedge.in</u> and other CARE Ratings Limited's publications.

in prices etc. Presently, the power requirements of the group are met/ sourced by Chhattisgarh Stat e Power Distribution Company Ltd (CSPDCL).

In FY24, raw material costs moderated at similar levels at around 80% of the cost of sales.

#### Cyclicality associated with the steel industry and intense competition from the unorganized sector

The steel industry is sensitive to the shifting business cycles, including changes in the general economy, interest rates and seasonal changes in the demand and supply conditions in the market. It is also characterized by a high degree of fragmentation due to the presence of numerous unorganized players. Further, the low level of product differentiation in the downstream steel segment further intensifies the competition, leading to lower bargaining power vis -à-vis the customers.

## **Key Strengths**

#### Long track record of the company and experienced promoters

MSIL incorporated in 1998 was promoted by Raipur based Mr Ramanand Agarwal who has more than four decades experience in the iron and steel industry. Currently, the day to the affairs of the company is looked after by Mr. Rajesh Agrawal, Manag ing Director (son of Mr. Ramanand Agrawal) along with the support and guidance from a team of experienced professionals/staffs.

#### Strategic location of plant

The plant location is strategic in terms of ready availability of raw materials, like sponge iron, steel scrap, power etc. in the state of Chhattisgarh. Proximity of the plant to the source of raw-material/ finished goods results in savings of transportation costs thereby improving profitability. In addition, densely populated area of Raipur ensures the easy availability of skilled labour to the company at economical rates.

#### Improvement in scale of operations in FY23 albeit low profitability margin

The company registered improvement in operating income with y -o-y growth of 31% in FY23 to Rs 649.78 crore as against Rs 495.33 crore in FY22. The increase in operating income was mainly on account of improvement in demand from the end user industries and higher realization in FY23 as compared to last year. However, the PBILDT margin reduced from 3.12% in FY22 to 2.13% in FY23 due to increase in raw material cost which couldn't be fully passed on. In addition, the company has also adopted the policy of selling products to customers on receipt of advance payments or credit of maximum 4 -5 days from FY23 onwards to reduce bad debt. This has also resulted in decline in PBILDT margin in FY23. As articulated by the management, the company expects to report PBILDT margin in the range of 3.00%-3.50% going forward.

FY24 have also exhibited an improvement in operating income with y-o-y growth of 21% in FY24 to Rs. 783.83 crore as against Rs. 647.78 crores. However, PBILDT margins moderated at similar levels from 2.13% in FY23 to 2.08% in FY24.

#### Comfortable financial risk profile

Capital structure stood comfortable with overall gearing ratio of 0.45x as on March 31, 2023 as against 0.49x as on March 31, 2022. TD/GCA also remained stable at 3.65x in FY23 as against 3.83x in FY22. In FY24, overall gearing ratio stood at 0.41x.

#### **Reduction in client concentration in FY23**

With the increase in scale of operation, the company has reduced its customer concentration in FY23. The 10 customers contributed around 23% of its total sales in FY23 as against 33% of its total sales in FY22.

#### Analytical approach: Standalone

#### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

#### **Disclaimer:**

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
