Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The ratings assigned to the debt of Aadhar Housing Finance Limited (AHFL) continue to derive strength from its leading market position in the affordable housing segment, geographically well-diversified loan portfolio, comfortable asset quality, largely supported by exposure to retail housing loan portfolio, diversified resource base post-acquisition by Blackstone with access to a wider base of banks and financial institutions, and increased market borrowings. The ratings take into account AHFL's comfortable capitalisation levels, further supported by fresh equity infusion of ₹1,000 crore through initial public offering (IPO) proceeds in May 2024. Although the asset quality has remained comfortable in the past, ratings are constrained considering the target customer segment comprising low-income group rendering the asset quality vulnerable to economic downturns. The seasoning of the portfolio remains moderate considering the long tenure of housing loan portfolio although it has been on an improving trend with growth stabilising in last three years.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Increasing operational scale depicting improved competitive positioning in the segment.
- Maintaining profitability with return on total assets (ROTA) more than 3% and stable asset quality on a sustained basis.

Negative factors

- Weakening AHFL's leading market position in the affordable housing finance business.
- Increasing gearing levels beyond 4.5x on a net basis.
- Weakening asset quality on a continuous basis with gross non-performing asset (GNPA) more than 3%.

Analytical approach: Standalone

Outlook: Stable

CARE Ratings Limited (CARE Ratings) believes that AHFL shall sustain its business and financial risk profiles with stable asset quality and comfortable capitalisation in the medium term.

¹Complete definition of ratings assigned are available at www.careedge.in and other CARE Ratings Limited's publications.

Detailed description of key rating drivers:

Key strengths

Comfortable capitalisation levels supported by regular equity infusion by investors

As on March 31, 2024, capital levels remained comfortable with a tangible net worth (TNW) of ₹4,445 crore (March 31, 2023: ₹3,695 crore) resulting in a capital adequacy ratio (CAR) of 38.46% (March 31, 2023: 42.73%) and Tier-1 ratio of 37.74% (March 31, 2023: 41.66%). As on June 30, 2024, the overall capital adequacy level further improved to 48.89% which is well above the regulatory requirement. In Q1FY25, the company has raised ₹1000 crore fresh capital by the way of IPO and post IPO, Blackstone's (promoter) stake in the company is 76.5%. This will provide AHFL with ample headroom to fund its growth for the next two to three years. CARE Ratings expects the company's capitalisation (as measured by CAR) to be comfortable above 35% in the near term.

Leading market share in affordable housing segment with geographically diversified operations

AHFL is a leading, low-ticket, affordable housing finance company. Asset under management (AUM) outstanding stood at ₹21,121 crore as on March 31, 2024, registering a y-o-y growth of 23% in FY24 which further increased to ₹21,726 crore as on June 30, 2024. The proportion of home loan and loan against property (LAP) stood at 75% and 25% as on June 30, 2024, respectively. The geographic concentration risk is relatively low with presence across India and has improved over time. AHFL has presence across 20 states in India with penetration into the Tier-2 and Tier-3 cities. Top five states per AUM are Maharashtra (13.9%), Uttar Pradesh (13.3%), Rajasthan (13.1%), Gujarat (11.0%), and Madhya Pradesh (9.6%), as on March 31, 2024. Going forward, AHFL's growth is likely to be supported by the overall impetus provided to the affordable housing sector through government schemes and initiatives. CARE Ratings expects AHFL to further widen its reach in the existing states in newer cities, especially outskirts of urban cities and semi-urban areas through its deeper impact strategy.

Healthy profitability parameters

The company's profitability has been on a rising trend with improving net interest margins (NIMs) and stable credit costs. The company's NIM² stood at 7.19% in FY24 as against 6.31% in FY23. Improvement in NIM is attributed to higher increase in yield on advances as compared to increase in costs of funds in FY24, accompanied by passing on rising cost of funds to customers through revision in lending rate by 75 basis points effective from April 01, 2023. This led to improvement in pre-provisioning operating profits (PPOP) by 30% to ₹1000 crore in FY24 (FY23: ₹770 crore). In FY24, the company's operating expense to average total assets stood at 3.01% (FY23: 2.75%), which witnessed increase considering branch additions and increase in employee count. The credit cost remained low at 0.23% in FY24 (FY23: 0.32%) due to improving asset quality, considering which, ROTA improved to 4.19% in FY24 as against 3.52% in FY23. In Q1FY25, the PPOP showed an increase of 26% y-o-y from ₹219 crore in Q1FY24 to ₹276 crore in Q1FY25 led by 40% y-o-y increase in other income. CARE Ratings notes that the company's ability to source funds at competitive rates and keep operational expenses under control along with stable credit costs would be critical for sustenance of healthy profitability.

Diversified resource profile with wider access to lenders and increased market borrowings post-acquisition by Blackstone

Funding mix as on June 30, 2024, consists of bank borrowings (52%), non-convertible debentures (NCD) including subordinate debt (21%), NHB re-finance (26%), and public deposits (0.01%). The company has been able to diversify its resource base over the years, borrow at competitive rates and build relationships, especially with public/private banks. The company has established lender base network of 23 lenders (banks+ NHB) as on March 31, 2024. Further, the company has also raised funds from the debt capital markets and built relationship with debt market capital participants.

Asset quality supported by a retail housing finance portfolio

The company's asset quality continues to remain healthy with Gross Stage 3 and Net Stage 3 at 1.10% and 0.65%, respectively, as on March 31, 2024 (March 31, 2023: 1.17% and 0.77%). However, the asset quality slightly moderated as on June 30, 2024 with Gross Stage 3 and Net Stage 3 at 1.35% and 0.86%, respectively, mainly due to seasonality impact as stated by the management. Provision coverage ratio stood at 36.1% and 41.3% as on June 30, 2024, and March 31, 2024, respectively. One-time restructured assets stood at 1.87% of total loans outstanding as on March 31, 2024 (March 31, 2023: 2.44%). CARE Ratings notes that AHFL has nil exposure towards developer finance segment and is gradually increasing its exposure to non-housing, LAP segment, which is expected to stabilise. Average ticket size of LAP book stood between ₹7 lakh to ₹8 lakh in FY24. Borrowers are largely from the retail salaried class, which has helped AHFL to maintain asset quality metrics in a moderate range. However, asset quality remains vulnerable due to exposure to low-income borrowers, who have a high likelihood of revenues being affected

² NIM is based on CARE Ratings calculation (does not include fee income and DA income).

adversely, especially in economic downturns. While the company has been able to maintain the asset quality till now, its sustenance remains a key monitorable amidst higher growth in LAP book in the last two years ended March 31, 2024.

Experienced management

The company's operations are led by Rishi Anand (MD & CEO), who has a vast experience of more than 25 years in the financial services sector. Prior to his current appointment as MD and CEO on January 03, 2023, he held the position of COO of AHFL. Rajesh Viswanathan is the CFO of AHFL. He is a chartered accountant and has an overall experience of over 25 years working for companies such as Capital Float, Bajaj Allianz Life Insurance & Bajaj Finance Limited. Anmol Gupta is the Chief Treasury Officer, having vast experience of 20+ years as Former Head – Corp. Planning and Control. As on May 31, 2024, private equity firm, Blackstone Group L.P., held 76.48% of AHFL's shareholding through its private equity fund, BCP Topco VII Pte. Limited. Following the acquisition by Blackstone, AHFL strengthened its corporate governance framework, with the induction of three independent directors. Operational oversight has been reflected through undertaking measures such as overhaul of IT systems and technology to bring in operational efficiencies.

Key weaknesses

Moderate seasoning of portfolio

AUM increased to 23% y-o-y (FY23: 17%) in FY24 and 21% y-o-y in Q1FY25. The portfolio's seasoning is moderate mainly due to higher tenure of loans provided by the company. However, it is expected to improve as growth stabilises going forward.

Exposure to economically weaker borrower segment

AHFL's customers are from the economically weaker, low-to-middle income segment, who have lower possibility to access to credit from traditional banks and housing finance companies. They are vulnerable to economic downturns, which increases the risk for maintaining asset quality especially in times of stress. This is partly offset by higher share of salaried borrowers in AHFL's portfolio at 57%; of which, formal salaried customers accounted for 47% and informal customers account for 10%. Self-employed borrowers constituted 43% of AUM as on March 31, 2024.

Liquidity: Strong

As per the asset liability management (ALM) statement dated March 31, 2024, the company's liquidity profile is strong with positive mismatches in all timeframe buckets individually. The company's debt obligation outflows including interest are around ₹2,803 crore in the next one year, against which, the company has inflow from loans and advances (including interest) of ₹4,516 crore, which strengthens its liquidity. Currently, the liquidity is also supported by undrawn credit lines of ₹1,241 crore and unencumbered cash and bank balances are around ₹245 crore as on June 30, 2024. The company plans to maintain minimum of 6-8% of loan book in the form of on-balance sheet liquidity in addition to undrawn bank lines.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
