Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

For assessing ratings of non-convertible debentures (NCDs) and market-linked debentures (MLDs) of Save Microfinance Private Limited (SMPL), CARE Ratings Limited (CARE Ratings) has taken a view based on combined financials of Save Solutions Private Limited (SSPL, parent entity), Save Financial Services Private Limited (SFSPL), SMPL, Save Housing Finance Limited (SHFL), and Saggraha Management Services Private Limited (Saggraha), together referred to as the Save group.

The ratings derives strength from the continuous equity infusion from existing and new investors, and adequate liquidity position. Ratings also continue to draw comfort from SSPL's long track record, which has one of the largest business correspondent (BC) networks in India, and experienced promoters and management team. This apart, ratings factor the group's strategy of diversifying the business by operating across sectors such as BC, microfinance, loan-against-property (LAP), and housing finance through SSPL, SMPL, SFSPL, SHFL, and Saggraha.

However, ratings are partially offset by the moderated asset quality, unseasoned profile of operations at subsidiaries' level, geographically concentrated operations on a consolidated basis, higher portfolio vulnerability due to the relatively marginal income borrower profile and moderate profitability profile, and relatively high leverage position.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors – Factors that could individually or collectively lead to positive rating action/upgrade:

- Scaling-up operations sustainably and profitably.
- Maintaining adequate capitalisation profile with consolidated gearing below 3x on a steady basis.

Negative factors – Factors that could individually or collectively lead to negative rating action/downgrade:

- AUM/net worth exceeding 7x on a sustained basis.
- Weakness in profitability on a continuous basis.
- Significantly deteriorating reported asset quality metrics impacting profitability.

Analytical approach

Combined approach, considering four wholly-owned subsidiaries of SSPL – SFSPL, SMPL, SHFL, and Saggraha.

Outlook: Stable

CARE Ratings expects the group's asset quality to be controlled with rising scale of operations and its profitability profile to improve going forward.

¹Complete definition of ratings assigned are available at www.careedge.in and other CARE Ratings Limited's publications.

Detailed description of key rating drivers:

Key strengths

Improving scale of operations

SSPL is engaged in BC operations, including basic banking services such as account opening, e-know your customer (e-KYC) verification, providing small ticket sizes loans, providing debit and credit cards and PIN, loan deposit and recovery, and general banking transactions. The company also facilitates recharging FASTags for collecting electronic toll charges. SSPL commenced BC operations in 2009 and has a long operational track record of more than a decade. It is working with 13,588 customer service points (CSPs) across 28 states and Union Territories. SSPL has tie-ups with four public sector banks (PSBs) – State Bank of India (SBI), Bank of Baroda (BoB), Bank of India (BoI), and Punjab National Bank (PNB), and a regional rural bank – Jharkhand Rajya Gramin Bank (JRGB). The company's primary source of income is charging banks for services provided, which vary per agreements with different banks.

To further expand operations and foray into related segments, SSPL has floated two wholly-owned subsidiaries – SFSPL and SMPL. SSPL acquired a housing finance company (HFC) on January 05, 2022, renaming it SHFL, and later acquired Saggraha on July 15, 2022, which is a BC company.

SMPL contributed 46% to the Save group's AUM, followed by SHFL, Saggraha and SFSPL with 7%, 41% and 5%, respectively, as on June 30, 2024. SSPL's overall AUM stood at ₹2445 crore as compared to 2,503 crore as on Mar-24 and ₹2,266 crore as on June-23.

SMPL, engaged in microfinance lending with small ticket size (₹15,000-60,000), has been consistently growing over the years with AUM reaching ₹1,180 crore as on March 31, 2024, up from ₹1,252 crore as on March 31, 2023. However, as on Jun-24, the AUM has declined by 4% to ₹1,130 crore due to slower disbursements as compared to last year.

SFSPL is a micro, small and medium enterprise (MSME) lending business unit of the Save group, in which it lends secured loans in ticket size ranging from ₹1-30 lakh with tenure ranging from 12 to 120 months and unsecured business loan in ticket size ranging from ₹75,000 to 300,000 with tenure ranging from 12 to 48 months. The company mainly has two products – short-term individual loan (STIL) and LAP. SFSPL's AUM has remained range bound due to its focus towards collections and recoveries, at ₹125 crore as on Jun-24 as compared to ₹127 crore as on Mar-24

SHFL's AUM comes from pre-acquisition times (erstwhile New Habitat Housing Finance and Development Limited), which rose to ₹181 crore as on March 31, 2024, up from ₹121 crore as on March 31, 2023, and ₹77 crore as on March 31, 2022. It has remained at similar level at ₹183 crore as on Jun-24.

SSPL's acquisition of Saggraha is a strategic move, as the latter is a Bengaluru-based entity engaged in the micro-financing business through BC. With this acquisition, the Save group plans to leverage the already-established operations of Saggraha.

Going forward, CARE Ratings expects the AUM to continue growing at a similar pace with majority contribution from SMPL.

Adequate capitalisation profile

The group has been able to raise equity from its existing and new investors. In Q4FY24, the group has received ₹25 crore in infusion from Maj Invest. It has received ₹82 crore of infusion from Incofin in May 2024. Out of total infusion, ₹25 crore was transferred to SMPL in May-24 and another ₹25 crore in Aug-24. With these regular infusions, the group is able to maintain adequate capitalisation profile and keep gearing below 4x as on March 31, 2024.

However, with the group's AUM increasing significantly through off book share in FY23 and FY24 and further with the acquisition of Saggraha, which is engaged in BC for microfinancing lending, the off book share has increased significantly to 47% of the AUM from 8% of the AUM as on March 31, 2023. With this, the AUM/net worth ratio has also increased to 9.2x as on March 31, 2024, and 8.18x as on March 31, 2023, as compared to 2.49x as on March 31, 2022.

However, with the infusion of ₹82 crore, the AUM/net worth ratio has improved to 6.2x as on Jun-24. CARE Ratings expects the ratio to improve with planned infusion of ₹170 crore in fiscal 2025.

Moderation in asset quality

SMPL's asset quality has moderated with gross non-performing asset (GNPA) ratio increasing to 1.9% as on March 31, 2024 from 1% as on March 31, 2023 due to increased slippages, which has further rose to 3.1% as on Jun-24, however, it remains under control.

SHFL's asset quality also moderated with GNPA ratio rising to 1.8% as on June 30, 2024 as compared to 1.2% as on March 31, 2024.

SFSPL's asset quality is the weakest in the group and the major contributor to the group's non-performing assets (NPA). SFSPL's asset quality deteriorated due to the negative impact of regulations in the leather industry in Agra, SFSPL's main customer base. The asset quality further deteriorated with COVID-19. However, with significant write offs, asset quality has improved to 4.73% as on Mar-24 as compared to 13% as on March 31, 2023. Further, GNPA ratio stood at 5.3% as on June-24.

Going forward, the ability of the group to maintain asset quality while growing loan book under each subsidiary remains key monitorable.

Key weaknesses

Unseasoned profile of microfinance operations with geographically concentrated book

While SSPL commenced operations in 2013 and has a PAN-India presence in BC operations, its subsidiaries SFSPL and SMPL commenced operations in 2015 and 2018, respectively. CARE Ratings notes that SMPL's loan book is largely unseasoned with most disbursements happening over past few quarters. SFSPL's AUM has also been range bound up to FY22, as it primarily focused on collections and recoveries and started increasing afterwards.

High portfolio vulnerability due to marginal income profile borrowers

The group's microfinance arm, SMPL provides small-ticket joint-liability group (JLG) loans to low-income group self-employed women or women working in informal sector while the non-banking financial company (NBFC) arm- SFSPL provides LAP to MSMEs. SMPL benefits from the extensive CSP network of the parent company, around 75% of MFI collections are done by CSP networks only.

Moderate resource base

With rising operations of all group companies, the consolidated borrowings has reduced to ₹822 crore as on March 31, 2024 as compared to ₹1,182 crore as on March 31, 2023. SSPL has been mainly borrowing through capital markets (NCDs), followed by banks (term loans) with average cost of funds of 10.5-15.9%. SMPL is not dependent on its parent and mainly borrows through banks, followed by NBFCs with incremental cost of fund of about 13.5%. SFSPL mainly depends on its parent for borrowings. Its entire borrowings up to FY22 were from its parent, with SFSPL borrowing from an NBFC only in FY23. SHFL's major borrowings are from banks, followed by the National Housing Bank (NHB).

Moderate profitability

On a consolidated basis, the group in FY24 reported net profits of ₹1.8 crore as compared to net losses of ₹13 crore FY23 and further reported a PAT of 4.5 crore in Q1FY25. The losses reported in FY23 was due to net losses reported in Saggraha of ₹22 crore, and rising interest expenses and operating expenses in SSPL. In Q1FY25, Saggraha has reported a PAT of ₹0.7 crore as against the net losses of ₹13.7 crore in FY24. With Saggraha reaching tis breakeven level, CARE Ratings expects the profitability of the group to improve further.

However, on standalone basis, SMPL has reported decline in its profitability due to rise in credit cost. As on Jun-24, SMPL has reported decline in ROTA to 0.8% as compared to 1.3% in FY24 owing to increased credit cost of 1.2% in Q1FY25 as compared to 0.5% in FY24.

Going forward, the ability of the company to control its credit cost remains key monitorable.

Liquidity: Adequate

SMPL has positive cumulative mismatches across all time buckets per its asset liability management (ALM) statement as on June 30, 2024. The company has a free cash balance of ₹62 crore as on date.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
