

## Veedol Corporation Limited (erstwhile Tide Water Oil India Company Limited)

October 31, 2024

Facilities	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long-term bank facilities	-	-	Reaffirmed at CARE AA; Stable and Withdrawn
Long-term / Short-term bank facilities	-	-	Reaffirmed at CARE AA; Stable/ CARE A1+ and Withdrawn
Short-term bank facilities	-	-	Reaffirmed at CARE A1+ and Withdrawn

Details of facilities in Annexure-1.

### Rationale and key rating drivers

CARE Ratings Limited (CARE Ratings) has reaffirmed and withdrawn the outstanding ratings of 'CARE AA; Stable/CARE A1+' assigned to the bank facilities of Veedol Corporation Limited (VCL) with immediate effect. The above action has been taken at the request of VCL and 'No Objection Certificate' received from the banks that have extended the facilities rated by CARE Ratings.

The ratings continue to derive strength from the company's healthy financial risk profile with negligible debt level and strong liquidity in the form of significant amount of unencumbered cash and bank balances. The ratings also factor in VCL's long track record in the lubricants industry with a relatively stable market share, where it has an established presence in the automobile segment, which constitutes ~70% of its sales. VCL sells lubricants under well-established and recognised brands 'Veedol' and 'Eneos' and continues to have a strong distribution and marketing network with a pan-India presence. Furthermore, it has overseas presence through its subsidiaries and step-down subsidiaries based out of the UK, the UAE, and Germany.

The ratings continue to remain constrained by VCL's limited presence in the industrial lubricant segment, its exposure to volatility in base oil prices due to its linkage with crude oil, and its presence in an intensely competitive industry with the presence of some large public sector undertakings (PSU) and private sector companies, which restricts VCL's ability to immediately pass on the increase in raw material cost.

**Analytical approach:** CARE Ratings has adopted a consolidated analytical approach for analysing VCL due to the operational and financial linkages between the entities. VCL has also extended guarantees towards the debt availed by few of its subsidiaries. The list of companies consolidated with VCL as on March 31, 2024, is placed in **Annexure 6**.

### Outlook: Stable

The 'stable' outlook reflects that VCL is expected to sustain its healthy business risk profile given its established market position in the lubricants industry with a strong brand positioning. The financial risk profile is also expected to remain comfortable with strong liquidity and no major capex plan in the near future.

### Detailed description of key rating drivers:

#### Key strengths

##### Seasoned player in the lubricants industry

VCL, operating since 1921, is one of the established private sector players in the Indian lubricant industry. Its repertoire of automotive products includes engine oils for trucks, tractors, commercial vehicles (CVs), passenger cars and two and three wheelers. It also produces gear oils, transmission oils, coolants, synthetic lubricant oils and greases for automobiles. For industrial applications, it manufactures industrial oils, greases, and specialty products like metal working fluids, quenching oils, and heat transfer oils.

##### Well-recognised brand with stable market positioning in the automobile segment

The company manufactures and sells its products mainly under two brands – 'Veedol' and 'Eneos', with 'Veedol' contributing around 65% of its gross domestic sales and the balance being contributed by 'Eneos'.

Domestic rights for 'Veedol' are owned by VCL, whereas global rights are owned by Veedol International Limited (VCL's 100% subsidiary). Rights for using brand 'Eneos' in India is held by Eneos Tide Water Lubricants India Private Limited (ETW), which is a 50:50 joint venture (JV) between Japanese entity Eneos Corporation and VCL. VCL pays the franchise fee to ETW for using

<sup>1</sup>Complete definition of ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Limited's publications.

brand 'Eneos'. Both the brands have established a wide market acceptance. VCL has tie-ups for the supply of genuine oils with renowned original equipment manufacturers (OEMs) in the automotive segment. 'Eneos' is mainly sold through OEMs, while 'Veedol' is majorly sold in the after-sales segment.

**Strong distribution and marketing network**

With a pan-India distribution network, VCL has the spread and penetration to provide its products throughout the country. Extensive distribution network consists of 50 distributors and over 650 direct dealers servicing over 50,000 retail outlets, fed by five plants and ~50 depots strategically across the country. The company has been introducing products with better performance levels to meet the changing needs of customers through its two in-house R&D centres.

Overseas operations are supported by its subsidiaries and step-down subsidiaries based out of the UK, UAE, and Germany.

**Healthy financial risk profile, likely to remain so**

VCL's financial risk profile is strong, as indicated by its healthy business returns, a minimal debt status, and significant cash and bank balances that provide strong liquidity to the company. Capital structure and debt protection metrics remained comfortable as the company has very low debt.

VCL's consolidated total operating income (TOI) improved to ₹1,931.19 crore in FY24 (FY23: ₹1,853.80 crore) owing to change in product mix and premiumization. Profit before interest, lease rentals, depreciation, and taxation (PBILDT) margin improved in FY24 due to various cost saving and austerity measures undertaken along with better product mix.

**Liquidity Strong.**

The liquidity position of TWOCIL is strong, as evident from the healthy cash and liquid investments of ₹212.10 crore as on March 31, 2024, with no utilisation of the fund-based working capital limits and no long-term debt repayment obligations. The current ratio of the company was also comfortable, at 1.60x as on March 31, 2023. The company has no plans of any major capex in the near future. Consequently, its liquidity is envisaged to remain strong despite a healthy rate of dividend pay-out.

**Key weaknesses****Susceptible to volatility in raw material prices, especially crude oil**

Key raw material required by the company is base oil which is obtained through fractional distillation of crude oil. Thus, the prices of base oil have high correlation with those of crude oil, which is inherently volatile in nature. Furthermore, in case of any sharp rise in the prices of base oil, it is difficult for the company to pass on the same immediately, due to high competition, price sensitive nature of end-user segments, and the company being a price taker in the industry. Accordingly, the company's profitability is vulnerable to the movement in the prices of crude oil. The company procures base oil majorly from the domestic market and imports this.

**High competition from other players**

Indian lubricant market is extremely competitive and price sensitive, primarily dominated by PSUs, followed by leading private sector players. Branding and advertisement are a substantial expenditure in the lubricants industry, owing to intense competition and commoditised nature of the product. Accordingly, after material cost, selling and distribution cost (including franchise fee) forms the second largest cost for the company. Competition at the global level is also high due to the presence of larger lubricant manufacturers with strong brands.

**Limited presence in the industrial oil segment**

With slower growth rate in the automotive segment and increasing competition, players are expected to focus on industrial lubricants as a key area for future growth in the lubricant industry. Although private players are increasing their presence in the industrial segment, penetration in this segment is expected to be slow considering well-entrenched position of existing PSUs and long gestation period associated with establishing a clientele in this segment. VCL has its major presence in the automotive oil segment (~70% of its revenue), with obvious entry barriers in the industrial lubricants segment due to the presence of major PSUs.

**Environment, social, and governance (ESG) risks:**

VCL remains exposed to the impact of tightening environmental compliances and safety norms given the nature of its business. Advent of electric vehicles (EVs) can impact the demand for lubricants in the long-term. However, penetration of EVs is slow which may not impact the company's operating performance in the short-to-medium term. In the course of manufacturing, some waste oil, solvents and sludge are generated. These are safely disposed in line with the procedures prescribed by the local Pollution Control Boards, as disclosed by the company. Total amount spent on corporate social responsibility (CSR) for FY24 stood

at ₹2.67 crore which was in excess by ₹0.33 crore from the amount required to be spent, considering set-off of ₹0.08 crore for excess spend at the beginning of the year. The board of directors comprises one executive director and nine non-executive directors, of whom five are independent.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
