Short-term bank facilities	25.00	CARE A1	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

Reaffirmation of ratings considers the comfortable operating and financial performance of Netcore Cloud Private Limited (NCPL) in FY24 and CARE Ratings Limited's (CARE Ratings) expectations of sustained performance over the coming years while maintaining a healthy capital structure and liquidity position on the back of NCPL's established market position and diversified customer profile. The company reported a consolidated revenue from operations of ~₹786 crore in FY24, down ~4% YoY, largely due to reduced global marketing spends by clients considering slowdown in major international markets. Its profit before interest, lease rentals, depreciation, and taxation (PBILDT) margin declined by 515 bps YoY to 7.22% in FY24 from 12.37% in FY23, considering duplication of marketing and technological cost in Unbx Software Private Limited (Unbx) and NCPL and allocation of resources for exploring new markets in Southeast Asia and Latin America. NCPL's credit metrics remain comfortable with overall gearing and total outside liability to total net worth (TOL/TNW) of 0.03x and 0.28x, respectively, as on March 31, 2024. Going forward, CARE Ratings expects the company's revenue to grow by 10-15% p.a. over the next two years with improvement in PBILDT margins driven by synergies following the planned merger of Unbx with NCPL and increase in revenue contribution from new geographies.

Ratings derive comfort from the company's established market position in the domestic market with ~81% of revenue driven from India, reputed client base with a history of repeat orders, and promoters' extensive experience. Ratings also factor in the company's healthy liquidity position and comfortable capital structure. These strengths are partially offset by the vulnerability of its operating margin to risk associated with expansion in the US and European markets, dynamic technological environment with evolving customer needs, and product development cost required to establish strong market presence in developed markets.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Substantially increasing revenue with increasing revenue share from export markets and sustained improvement in the earnings before interest, taxation, depreciation, and amortisation (EBITDA) resulting in return on capital employed (ROCE) above 20%.

Negative factors

- Weakening in the liquidity position and decrease in liquid cash balances to below ₹50 crore.
- Fall in EBITDA margin leading to debt/EBITDA above 1.5x.

Analytical approach: Consolidated

CARE Ratings, in its analysis, has considered the consolidated business and financial risk profiles of NCPL and its subsidiaries, as the entities are linked through a parent-subsidiary relationship. The list of entities consolidated with NCPL according to its audited results for FY23 has been placed in Annexure-6.

Outlook: Stable

The Stable outlook reflects CARE Ratings' expectations that the entity will continue to maintain a comfortable capital structure and debt coverage metrics while benefitting from its established presence in India, continuous innovation in the digital platforms segment and expansion in new markets.

Detailed description of key rating drivers:

Key strengths

Established domestic presence boosted by inorganic growth

¹Complete definition of ratings assigned are available at www.careedge.in and other CARE Ratings Limited's publications.

The company has been operating in the domestic market for over two decades and has a strong market position in mobile and email marketing, with around 81% of its revenue generated in the domestic market in FY24. NCPL has a healthy market share in other emerging markets such as Indonesia, Thailand, Malaysia, and Africa, and a growing presence in the US and European markets assisted by allied acquisitions. NCPL has acquired allied software companies including Unbxd Inc., Boxx.ai, Hansel.io over the years to expand its product portfolio, and gain footing in emerging and developed markets, which contributed ₹80-100 crore to consolidated revenue in FY24.

Reputed client base with history of repeat business

The company has a large customer base of more than 3,000 brands across segments such as banking, financial institutions, e-commerce, OTT platforms, tourism and travel, among others, including reputed brands such as Flipkart, Myntra, Big Basket, SBI Bank, Standard Chartered Bank, Pizza Hut, and Air Aisa. NCPL continues to benefit from its long-standing customer relationships with the existing clients, indicated by a history of repeat business from its key customers, providing revenue visibility. The company's foray into new geographical markets of Southeast Asia, Latin America, and the US is expected to further support its medium term revenue growth through addition of new customers.

Comfortable financial risk profile with strong credit metrics

NCPL's financial risk profile remains comfortable characterised by a sizeable net worth base of ₹768 crore and negligible external borrowings, except lease liabilities worth ₹25 crore, translating into an overall gearing of 0.03x as on March 31, 2024. Its TOL/TNW also remained healthy at 0.28x as on March 31, 2024 reflecting limited reliance on external sources of funds. While the company has pursued sizeable inorganic growth opportunities in the past, including the acquisition of Unbxd Inc. for ~₹450 crore in FY22, such acquisitions have been funded through internal accruals and cash reserves. CARE Ratings understands that the company is open to debt-funded inorganic growth opportunities in the future and such developments will continue to be monitored.

Experienced promoter in IT and marketing technology segment

The company is promoted by Rajesh Jain, who has three decades of industry experience, benefitting the company's overall strategy and client offering. He is supported by a team of professionals in top managerial roles with experience in marketing technology businesses. The management, via its acquisitions of artificial intelligence-driven businesses, has developed new technical capabilities with the integration of human assets in NCPL. CARE Ratings believes that with promoters' business acumen, the company can establish a strong market position in the US and European markets and foray into new geographies.

Key weaknesses

Operates in dynamic industry segment with evolving customer needs and risk of technological obsolescence

The company is exposed to intense competition with established players and new players entering the digital marketing automation industry. Moreover, advancements in technology and evolving customer needs create entail continuous innovation and research & development investments by the company. To maintain its competitive edge in such a scenario, the company will need to anticipate future trends and ensuring its offerings deliver with both price and product innovation in this changing technological environment. However, the company has been a leader in innovating email and automation products such as interactive email, ROI-based marketing spend evaluation tool, and others, and is well positioned to track changing trends in digital marketing space and adapt itself, retaining its market leadership. This is likely to mitigate the above risk to some extent.

Risk associated with expansion in USA and European markets

For NCPL to establish a strong market position in the US and European markets, the company will be required to adapt its products and services according to the client needs. The established players in these markets provide stiff competition to NCPL, for which the company could be required to incur heavy marketing and promotion costs. CARE Ratings believes that NCPL's ability to overcome the above is a critical sensitivity to future profitability margins.

Near-term macroeconomic headwinds impact revenue and profitability

NCPL's consolidated revenue declined by ~4% YoY to ₹785.64 crore in FY24 from ₹820.8 crore in FY23 as the company encountered industry-wide headwinds from reduced global marketing spends by clients in the light of slowdown in major international markets. The PBILDT margin was lower by 515 bps YoY primarily due to duplication of selling and technological expenses in Unbxd and NCPL and investments towards expansion of services to new geographies. The uncertainty over recovery of marketing spending by key clients and the projected lag in realisation of synergy benefits from the recent acquisitions could impact NCPL's revenue and profitability over the near-to-medium term.

Liquidity: Strong

The company's liquidity is strong with projected gross cash accrual (GCA) of ₹70-80 crore p.a. over the next 2-3 years against debt repayment obligations of ₹10-20 crore p.a. for lease liabilities and maintenance capex requirements of ₹20-25 crore p.a. As on March 31, 2024, NCPL had free cash and liquid investments of ~₹100 crore including unencumbered bank deposits of ₹67 crore. The average monthly maximum utilisation of fund-based working capital limits remained negligible for the last 12 months ended May 31, 2024, providing adequate buffer.

Environment, social, and governance (ESG) risks: Not applicable

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
