Short-term bank facilities	16.00	CARE A3	Reaffirmed

Details of facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

Reaffirmation of ratings assigned to bank facilities of Zim Laboratories Limited (ZLL) derive strength from strong promoter background, with over three decades of experience in the pharmaceutical industry and long and the company's established track record. Ratings favourably factor in the strong research and development capability, accredited manufacturing facilities, diversified geographical presence and favourable industry outlook. Ratings also derive strength from comfortable financial risk profile marked by strong solvency and liquidity position. Ratings also take note of improved scale of operations and profitability in Q1FY25 which moderated in FY24.

The above strengths are partially mitigated by stabilisation and implementation risk associated with the planned debt-funded capital expenditure (capex), presence in highly regulated industry and intense competition in overseas market, product and customer concentration risk and foreign exchange fluctuation risk.

Rating sensitivities: Factors likely to lead to rating actions.

Positive factors

- Substantially increasing scale of operation over ₹500 crore and sustainably improving profit before interest, lease rentals, depreciation, and tax (PBILDT) margins above 17% on a sustained basis.
- Improving capital structure with overall gearing below 0.20x.
- Successfully and timely completing the expansion project and achieving desired benefits from this.

Negative factors

- Deteriorating operating profitability margin, PBILDT margin to 9% leading to adverse impact on liquidity.
- Adverse regulatory action against ZLL, significantly impairing the group's credit profile.
- Undertaking un-envisaged large debt-funded capex or working capital requirements leading to overall gearing weakening over 0.75x on a sustained basis.

Analytical Approach: Consolidated

CARE Ratings Limited (CARE Ratings) has analysed ZLL's credit profile by considering consolidated financial statements owing to financial, business, and operational linkages between the parent and subsidiaries as mentioned in Annexure 6.

Outlook: Stable

CARE Ratings believes that the company will continue to benefit from the extensive experience of promoters and established track record in the pharma industry.

Key strengths

Experienced promoters and established track record

The company has an experienced management team with Dr Anwar Daud, Dr Kamlesh Shende, and Dr Kaka Saheb Mahadik at the top. Dr Daud has been in the industry since 1981 and is responsible for product and business development, while Dr Kamlesh Shende, who has over 30 years of experience in the field of Regulatory Affairs in the Pharmaceutical sector, has worked as Drugs Formulation Expert for the entire State of Maharashtra, and was a member of the National Subcommittee on Formulations constituted by Drugs Consultative Committee. Directors are supported by a second-tier management team and a team of 100 scientists. The company also has experienced professionals leading key aspects of the business with over three decades of experience in the pharmaceutical industry. Being in the industry for so long has helped promoters in gaining adequate acumen about the industry and in the company's smooth operations.

Accredited manufacturing facilities

The company's manufacturing facilities are accredited by regulatory agencies such as ISO Certification, and WHO-GMP. Facilities are equipped with latest technologies and adhere to high standards of quality and safety, with periodic inspections by European Commission (EU), and other agencies. The company invests in ongoing capex to enhance manufacturing capacities and upgrade utilities. Facilities include an oral solid dosage form OSDF facility, LSD facility, and quality control laboratory capable of testing parameters.

Improvement in scale of operations and profitability in Q1FY25 on y-o-y basis after moderation witnessed in FY24

The company's scale of operations continues to remain moderate. The company achieved revenue at a compounded annual growth rate (CAGR) of 6% in last five years. The company's total operating income (TOI) moderated in FY24 to ₹379.03 (PY: ₹421.47 crore) and consequent reduction in PBILDT margin to 11.91% (PY: 13.81%) was considering drop in nutraceutical exports, shift of some nutraceutical orders and shortage of US Dollars in target markets, adversely impacted the pharmaceutical formulation intermediate (PFI) business. Similarly profit after tax (PAT) margin also dropped with drop in PBILDT margin to 4.55% in FY24 from 5.80% in FY23. However, in Q1FY25, improved by 18% on y-o-y basis to ₹81.82 crore with PAT of ₹1.10 crore, considering demand from exporting countries. Revenue is expected to increase by 10% in FY25, considering improvement in demand from export market.

Comfortable leverage and coverage indicators

Over the years, with accretion of profits to its net-worth and repayment of long-term debt and the company's capital structure remained comfortable. The company's overall gearing remained comfortable, though slightly deteriorated, to 0.48x as on March 31, 2024, (0.32x as on March 31, 2023) considering increase in term debt for ongoing capex. Further, debt coverage indicators marked by PBILDT interest coverage indicators remained comfortable at 6.83x for FY24 (PY: 10.82x) which was rangebound between 1.98x to 5.48x in the prior three years ending FY22. CARE Ratings expects capital structure and debt coverage indicators to moderate slightly due to the ongoing debt-funded capex planned to be implemented in a phased manner, over the next two years.

Diversified geographical presence with focus on research and development

The company has a diversified market presence in over 20 countries, with a majority revenue generated from regulated markets. In FY23, domestic and overseas markets accounted for ~18% and ~82% of the net sales, respectively. The company exports to countries in Latin America, Southeast Asia, Africa, and the Middle East. It has 40 registered products and 130 products in the pipeline for overseas markets. The company has strategically focussed on markets with better profitability and lower working capital requirements. Its geographically diversified revenue reduces exposure to adverse economic slowdowns in single geography. The company has a strong focus on research and development, with over 200 scientists at its research and development (R&D) centre in Nagpur working on innovative drug delivery systems. The company has spent 9.7% on R&D in FY24 as against 6.60% in FY23 and plans to maintain R&D expenses in the range of 7-9% of the revenue. Its R&D department also works on improving drug bioavailability and stability and developing new drug delivery systems. The company focuses on launching new products every year.

Key ratings weaknesses

Product and customer concentration risk

ZLL offers product portfolio of innovative drug delivery systems that caters a wide range of therapeutic areas. Some products in their portfolio include Oro dispersible tablets, quick dissolving films, taste-masked granules, modified-release tablets, pellets, and powders. Although there is diversified product portfolio, revenue dependence on top five products is slightly high. Moreover, revenue concentration from top three products increased contributing 59% sales in FY24 (69% in FY23), exposing ZLL to customer and product concentration risk.

Stabilisation and implementation risk associated with planned debt-funded capex

ZLL is focused on organic growth and is currently expanding its manufacturing facility to increase capacity and enhance operations in the nutraceutical division. Total project cost for this expansion, including the purchase of new machinery, is estimated at ₹66.68 crore, to be funded through a term loan of ₹42.01 crore, with the remaining ₹24.69 crore from internal accruals. Key projects include a new Tamsulosin and Dutasteride manufacturing facility and relocation of cephalosporin unit, aimed at meeting EU GMP and WHO GMP standards.

Working capital intensive operations

ZLL's working capital cycle deteriorated at 111 days in FY24 as against 82 days in FY23. Working capital cycle is elongated primarily considering high inventory and collection periods. In domestic segment, the company derives revenues mainly from selling to government bodies and institutions such as state government hospitals, railway boards and municipal corporations that normally has a relatively longer credit period of 97 days. Overseas customers are also allowed a credit period of upto 90 days, leading to an overall elongated working capital cycle.

Foreign exchange fluctuation risk

ZLL's foreign exchange fluctuation risk is significant, as 80% of its revenue comes from exports, and the company operates in international markets with transactions in multiple currencies. Primary currencies affecting the company's exposure are USD, Euro, and GBP. Fluctuations in foreign exchange rates could impact on ZLL's revenue and profitability, although the company entered contracts with major clients for a fixed exchange price to mitigate some risk. ZLL continually assesses cost structures and engages with customers to address currency volatility risks, while also entering hedging transactions as needed.

Intense competition and exposure to regulated risk

The company faces intense competition in international markets. Pricing pressure, increasing regulation, and increased sensitivity towards product performance are key issues in the pharmaceutical industry. The pharmaceutical industry has been a highly regulated industry worldwide by virtue of its direct bearing on public health. Patent laws and related regulations might hamper the plans of pharmaceutical companies to launch new products and cater to new markets. However, Indian pharmaceutical companies are expected to continue to experience growth from the US markets over the medium term backed

by sizeable generic opportunities over the next two years and strong product pipeline of abbreviated new drug applications (ANDAs).

Liquidity: Adequate

The company's liquidity remains adequate marked by sufficient cash accruals as against modest repayment obligations and modest cash balance. GCA is expected to be in the range of ₹35-40 crore as against repayment obligations in FY25 of ₹18.04 crore. The company had an unencumbered cash and cash equivalent of ₹9.88 crore as on March 31, 2024. In addition, utilization of fund-based limits continues to be on higher side in the range of 67% for the last twelve months ending August 2024.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
