

## Orinda Industries LLP

October 09, 2024

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term Bank Facilities	87.80	CARE BB+; Stable	Assigned
Short Term Bank Facilities	9.15	CARE A4+	Assigned

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The ratings assigned to the bank facilities of Orinda Industries LLP (OIL) remains constrained on the account of moderate scale of operations and profitability along with moderate capital structure and debt coverage indicators. The ratings also remain constrained on account of project stabilization risk with recently completed debt funded capex, susceptibility of operating margin to volatility in the raw material as well as fuel costs, presence in a highly competitive ceramic industry with fortunes linked to demand from cyclical real estate sector and limited liability partnership nature of constitution. The ratings, however, derive strength from experienced promoters, strategically located manufacturing unit, accessibility of existing selling & distribution network of the associate companies and adequate liquidity.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Improvement in scale of operations marked by total operating income (TOI) above Rs.200 crore with PBILDT margin of more than 10% on sustained basis.
- Improvement in overall gearing ratio to below 1.25 times along with improvement in debt coverage indicators marked by total debt to GCA (TDGCA) below 5 times on sustained basis.

#### Negative factors

- Decline in scale of operations by more than 20% along with dip in PBILDT margin below 7%
- Deterioration in gearing ratio to more than 2 times
- Elongation in operating cycle above 90 days

### Analytical approach: Standalone

#### Outlook: Stable

CARE Ratings believes that entity will sustain its overall financial risk profile and continue to benefit from experience of promoters in ceramic industry along with location advantage with presence in Morbi region, Gujarat.

### Detailed description of key rating drivers:

#### Key weaknesses

##### Moderate scale of operations and profitability

OIL is engaged in manufacturing of glazed vitrified tiles (GVT) and polished glazed vitrified tiles (PGVT) and commenced operations from unit-1 from January 2022, hence, FY23 was the first full year of operations. During FY24, OIL registered TOI of Rs. 127.95 crore as against Rs.93.73 crore during FY23 with growth of 37% primarily on account of increase in sales volume and realization. Further, during H1FY25, OIL has reported TOI of Rs.52.71 crore. Profitability remained moderate marked by PBILDT margin of 9.78% in FY24 as against 11.71% in FY23 owing to increase in cost of raw material and wages. OIL reported PAT margin at 2.58% in FY24 as against 0.89% in FY23. PAT was lower in FY23 due to lower scale being first full year of operations along with relatively higher depreciation and interest costs.

##### Moderate capital structure and debt coverage indicators

The capital structure of OIL remained moderate marked by overall gearing at 1.66x as on March 31, 2024, as against 1.12x as on March 31, 2023, owing to increase in total debt with infusion of unsecured loans for their new project and higher utilization of working capital limits. The debt coverage metrics improved and remained moderate marked by interest coverage ratio of 3.63x

<sup>1</sup>Complete definition of ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Limited's publications.

during FY24 (FY23: 3.26x) mainly due to improved operating profits during FY24. Total debt to GCA (TDGCA) deteriorated to 5.51 years for FY24 (FY23: 3.96 years) where deterioration is mainly on account of increased debt level in FY24.

#### **Susceptibility of profit margins to volatility in raw material and fuel costs**

Prices of raw material i.e. clay, and feldspar is market driven and puts pressure on the margins of tile manufacturers in case of volatility into the same. Another major cost component is fuel expense in the form of gas to fire the furnace. The profitability of OIL is also exposed to volatile Natural gas prices, mainly on account of its linkages with the international demand-supply of natural gas along. Hence any adverse movement in material and fuel prices shall impact the profitability of the entity. The margins of the entity are higher than those in the industry due to the size of tiles manufactured. The tiles are currently exported to Vietnam, Dubai and Russia.

#### **Presence in a highly competitive ceramic industry with fortunes linked to demand from cyclical real estate sector**

The ceramic tile industry in India is highly competitive. Low entry barriers, easy availability of raw material and limited initial capital investment requirement has attracted a large influx of unorganized and regional players. Hence, OIL's ability to scale up its operations and achieve healthy capacity utilization levels in the light of the competitive tile industry would be crucial. Further, demand for the tiles comes from the real estate industry, which, in India is highly fragmented and cyclical. The real estate industry is also highly sensitive to interest rates and liquidity position in the market. Thus, any negative impact on the real estate industry will adversely affect the prospects of ceramic tiles industry as well as the entity. The sustainability of the growth, domestically as well as export remains a key monitorable going forward.

#### **Limited Liability Partnership nature of constitution**

Being a limited liability partnership, OIL is exposed to inherent risk of partners' capital being withdrawn at time of personal contingency, and firm being dissolved upon the death/retirement/insolvency of partners which may affect financial flexibility of the firm.

#### **Stabilization risk with recently completed debt funded capex**

OIL completed new unit within same premises for manufacturing 1200 X 1200 and 1200 x 1800 size tiles with total project costs of ~Rs.62 crore. OIL has successfully completed project with total project costs of Rs.62 crore and commenced commercial operations from September 2024. The stabilization of the said project and achieving envisaged revenue and profitability remains key rating monitorable. Loan repayment will start in June 2025.

#### **Key strengths**

##### **Experienced management**

OIL is backed by five promoters: Mr. Jaysukh Soriya, Mr. Balvant Soriya, Mr. Hardik Soriya, Mr. Nirmal Soriya, and Mr. Anil Patel. Jaysukh and Balvant Soriya have been partners at Nehani Tiles Private Limited and Orinda Granito LLP since 2013, giving them over a decade of industry experience. Additionally, Hardik Soriya is also a partner in both Aminisha Organics LLP and Orinda Wood Tech LLP.

##### **Strategically located manufacturing unit**

The manufacturing facility of OIL is located in Morbi-Gujarat which is India's largest cluster of ceramic tile makers. The major raw materials include Clay, Feldspar, Frits, China clay, Pebbles, etc. OIL has an added advantage of easy availability of raw materials owing to its presence in ceramic cluster. It also enjoys benefits in terms of road and rail connectivity as well as easy availability of labour.

##### **Accessibility of existing selling & distribution network of the associate companies**

The promoters bring extensive experience in the ceramic industry through their association with other group entities. These entities are engaged into manufacturing of glazed vitrified tiles (GVT) and Polished Glazed Vitrified Tiles (PGVT) of different sizes. OIL benefits from a robust customer base, leveraging the well-established sales and distribution networks of its affiliated companies, Nehani Tiles Private Limited and Orinda Granito LLP, which operate globally.

##### **Liquidity: Adequate**

OIL's liquidity position remained adequate marked by liquidity cushion in the form of working capital limit of Rs 20 crore whose average utilization remained at 47% during trailing 12-month period ending in July 2024. During FY24, OIL reported sufficient cash accruals of Rs.9.43 crore as against debt repayment obligations of ~Rs.3.50 to 4.00 crore arising in FY25. Further, current ratio and quick ratio remained at 1.52x and 1.12x as on March 31, 2024, respectively. Operating cycle remained comfortable at 58 days in FY24. Cash and bank balance remained at Rs.3.30 crore as on March 31, 2024.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
