|---------------------------|------------------|---------------------|----------------------------------|
| Long Term Bank Facilities | 5.00             | CARE B+; Stable     | Downgraded from CARE BB-; Stable |

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The revision in the rating assigned to the bank facilities of Diya Hygiene Flours Private Limited (DHFPL) is due to deterioration in financial risk profile marked by decline in scale of operation coupled with continued net losses during FY24 (Audited, FY refers to period April 01 to March 31) and stretched liquidity. Further, the rating continues to remain constrained due to moderate capital structure, weak debt coverage indicators and its presence in fragmented, competitive and regulated nature of industry along with volatile agro commodity prices with linkages to vagaries of nature for raw material availability.

The ratings, however, continues to derive strength from the experience of promoters and locational advantage.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Sustaining scale of operations marked by Total operating income (TOI) with generating adequate cash accruals to repay debt obligations.
- Sustaining comfortable operating cycle

#### Negative factors

- Continued cash losses and generating negative cash flows from operations

### Analytical approach: Standalone

#### Outlook: Stable

CARE Ratings believes that entity will sustain its overall financial risk profile and will continue to derive benefit from vast experience of promoters along with location advantage.

### Detailed description of key rating drivers:

#### Key weaknesses

##### Decline in scale of operations with continued net losses in FY24

The scale of operations moderated marked by TOI of Rs.64.91 crore during FY24 as against Rs.78.37 crore during FY23 on account of decline in volume and sales realizations. Further, DHFPL reported TOI of Rs.38 crores in H1FY25. Profitability margins deteriorated marked by PBILDT margin of 0.02% during FY24 as against 0.52% during FY23 mainly on account of increased material cost. Further, realization was declined with increase in competition. DHFPL reported net losses of Rs. 0.34 crore during FY24 as against net loss of Rs.0.02 crore in FY23.

##### Moderate capital structure along with deteriorated debt coverage indicators

DHFPL's capital structure improved while remaining moderate marked by overall gearing of 1.74 times as on March 31, 2024, as against 3.20 times as on March 31, 2023. Total debt remained low mainly on account of lower utilization of working capital limits as on balance sheet date. DHFPL's debt coverage indicators deteriorated and remained weak due to cash losses reported in FY24. Interest coverage ratio deteriorated to 0.06 times during FY24 as against 1.26 times during FY23.

##### Fragmented and competitive nature of industry

The commodity nature of the product makes the industry highly fragmented. More than two third of the total number of players belong to unorganized sector with very less product differentiation. Due to the fragmented nature and low entry barriers in the industry, the flour mill units have limited flexibility over pricing their products which leads to low profit margins.

##### Volatile agro-commodity prices with linkages to vagaries of nature for raw material availability and regulated nature of the industry

DHFPL is primarily engaged in the processing of wheat. Wheat being an agricultural produce is dependent on the vagaries of monsoon. Also, it being a staple food, its price is subject to intervention by the government. In the past, the prices of wheat have remained volatile mainly on account of the government policies in respect of Minimum Support Price (MSP), along with controls

<sup>1</sup>Complete definition of ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Limited's publications.

on its exports. Any volatility in the wheat prices will have an adverse impact on the performance of the flour mill. Further, wheat is cultivated between November-April and harvested in March-April every year. Its cultivation is dependent more on irrigation and less on the monsoon pattern. Hence, irregular rainfall patterns, improper irrigation facilities, coupled with pre-harvest and post-harvest losses can majorly impact its production and availability. The company is susceptible to supply side constraints like seasonal nature and exposure to the vagaries of monsoon. Therefore, any adverse climatic change in the region can impact the procurement plans of the company and in turn can impact the financial risk profile of the company.

## Key strengths

### Experienced Promoters

DHFPL is promoted by Mr. Shankar Patel and Mr. Kirit Patel who looks after the overall management of the company. Both the promoters have experience of more than three decades in the agro commodities processing industry.

### Location Advantage

DHFPL's manufacturing unit is in wheat growing belt of Gujarat having large network of wheat growers from whom raw material can be acquired easily, thereby making it beneficial for DHFPL in terms of transportation and connectivity. Wheat is classified as Rabi crop having season from October to March. DHFPL's presence in wheat producing region results in benefit of consistent demand providing sustainable and clear revenue visibility.

### Liquidity: Stretched

The liquidity profile of the DHFPL remained stretched marked by cash losses in FY24. Average utilization of working capital remained around 51% during past 12 months ended September 30, 2024 owing to seasonality in agro-product. Net cash flow from operating activities remained positive at Rs.1.51 crore during FY24 as against negative Rs.1.23 crore during FY23 majorly owing to decrease in inventory and receivables. The cash flows remained positive as the season for wheat began from April for current year as against March for previous year. Further, the unencumbered cash & bank balance remained low at Rs.0.11 crore as on March 31, 2024. The entity also reported cash losses during FY24. The repayment obligation for FY25 is ~Rs.0.95 crore which is expected to meet from cash flows of current year and promoters will infuse funds to in cash of inadequate cash flows. Operating cycle remained comfortable at 28 days during FY24 owing to low credit period in agro processing industry.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
